PINECONE • JESUS DASH • JESUS NEW OS

NOV 2026 **$14.99**

LJ2026Q401

A life with Christ at its center.

Dear reader,

Welcome to Living Jesus, your quarterly update catalog. This first collector's edition invites you into a vision: technology shaped around a life with Christ. Faith, study, creative work, friendship and the ordinary tasks of a day deserve to belong together.

Our mission reaches from software into the devices and places we inhabit. PineCone is our dedicated Christian phone project. Jesus New OS brings the personal experience together; Trinity Core and Popcorn Kernel belong to the foundation beneath it. Jesus Dash carries our wider distribution and dashboard direction.

The ambition continues into homes, cars, boats and aircraft: connected spaces dedicated to Christ, with your mobile device linking you to the dashboard. Those hardware integrations form a roadmap. The pages that follow introduce the software experiences and source features that give this vision its substance.

Read slowly. Follow the feature that answers a need, awakens a question or simply brings you joy. In these pages, we hope you find the beauty of a considered design and the welcome of a Christian family.

With gratitude,
The Living Jesus Editorial

FAITH. INTELLIGENCE. LIFE.

One connected foundation.

A personal experience, with faith at the center.

01 JESUS NEW OS

The shell: study, creativity, community and daily life.

02 TRINITY CORE

The service layer connecting the experience.

03 POPCORN KERNEL

The kernel foundation in the public platform account.

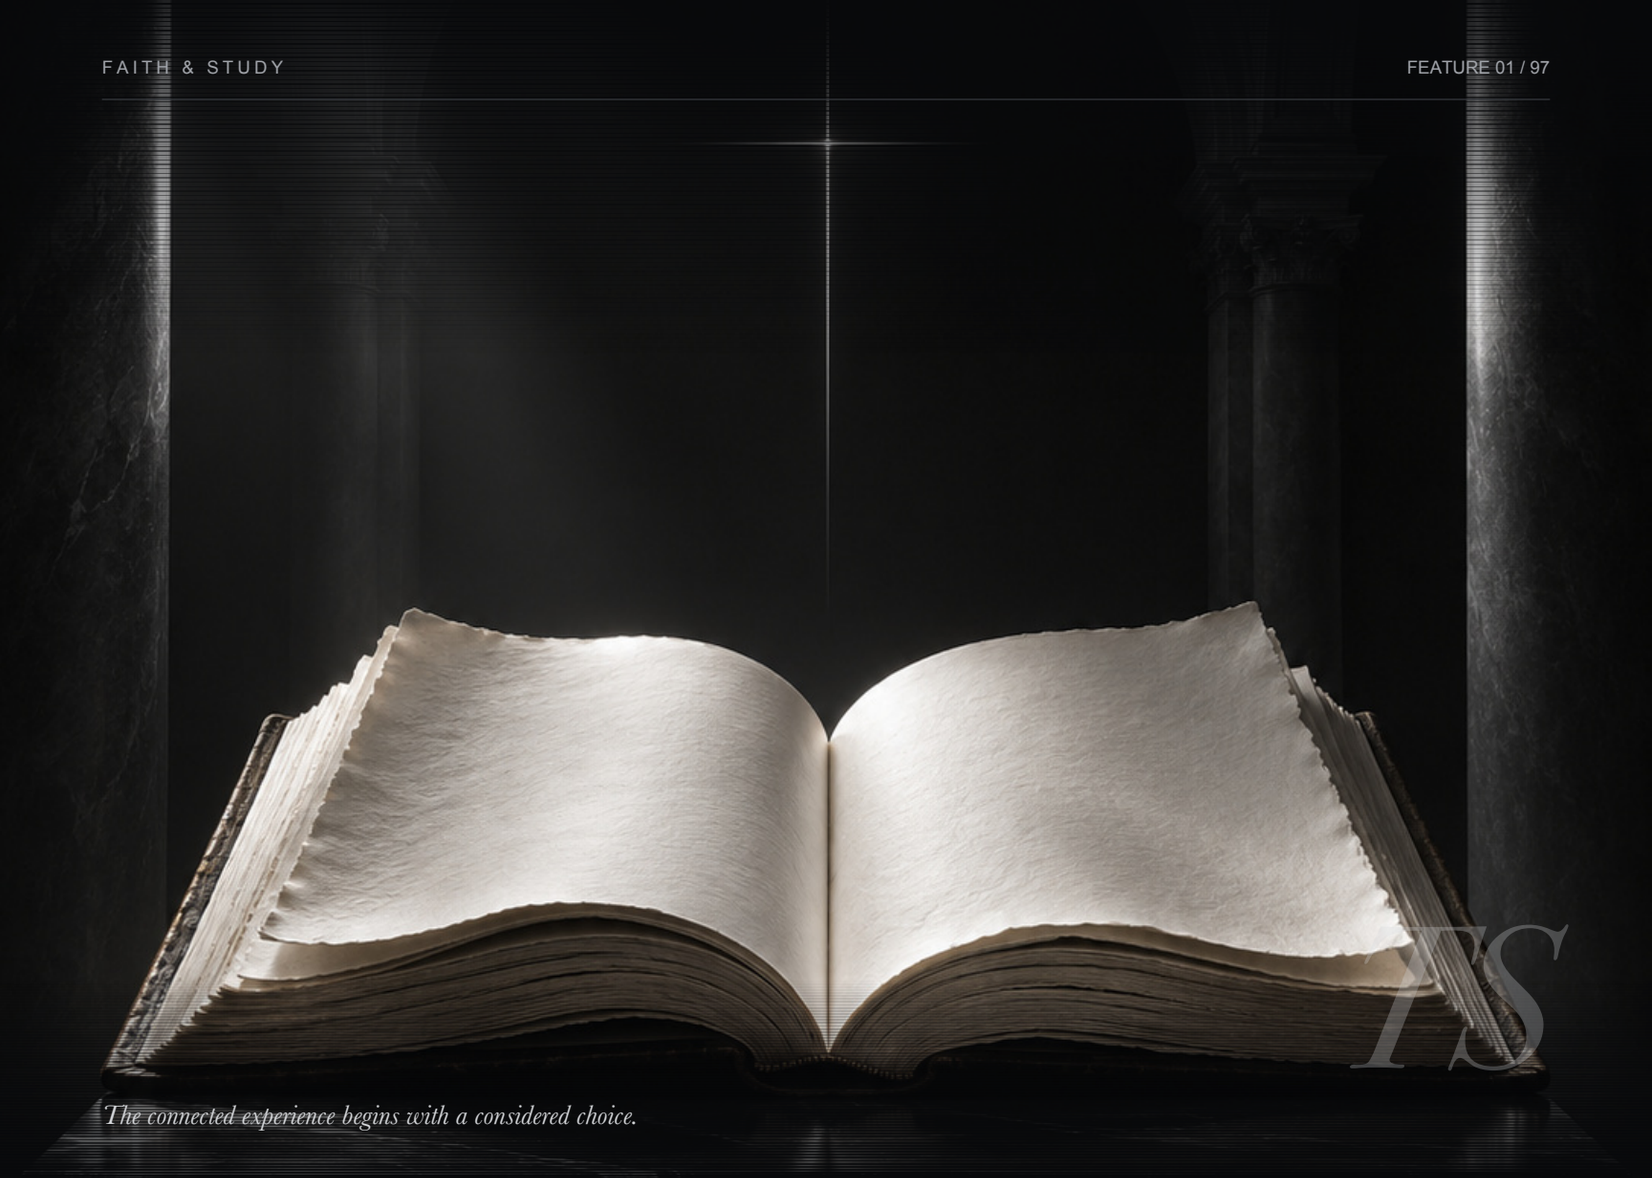

04 JESUS DASH

The wider distribution and dashboard direction.

PineCone and the dashboard horizon

Our direction reaches from the dedicated phone project to connected homes, vehicles, boats and aircraft. Future hardware and adapters require their own qualification. This magazine describes the connected vision and the source-based software inventory.

Reader note: features depend on edition, account, hardware and connected services. Source inspection is distinct from installed-device testing. AI conversations are generated experiences grounded in their stated material. Editorial illustrations are conceptual, not interface screenshots or hardware specifications.

The connected experience begins with a considered choice.

TEMPLE SUITE

A Place for Everything Meaningful

Faith, learning, conversation and practical help meet in a personal home designed around the life you actually live.

A useful phone should make room for the whole person. Temple Suite gathers the connected Jesus New experience into one personal home, giving faith and everyday purpose a shared starting point. Move toward a Scripture conversation, open a study resource or choose the kind of assistance the moment requires. The arrangement invites intention before activity.

Its value is the relationship between those possibilities. Study can lead to a question; a question can lead to reflection; reflection can suggest a practical next step. Temple Suite gives that movement a place to begin. Each visit becomes an opportunity to choose what deserves your attention today.

A personal starting place

Faith beside daily purpose

Connected experiences together

BEGIN HERE Open Temple Suite and choose one experience that fits today's most important need.

LIVING JESUS

Return to the Words of Jesus

Bring a question into a Scripture-grounded conversation centered on Jesus' words, with space for careful reflection and personal meaning.

Some questions deserve more than a hurried answer. Living Jesus offers a conversational setting for exploring the words of Jesus and considering how they relate to your circumstances. A passage, a difficult decision or an ordinary moment of uncertainty can become the starting point. The emphasis stays on Scripture and the teaching being discussed.

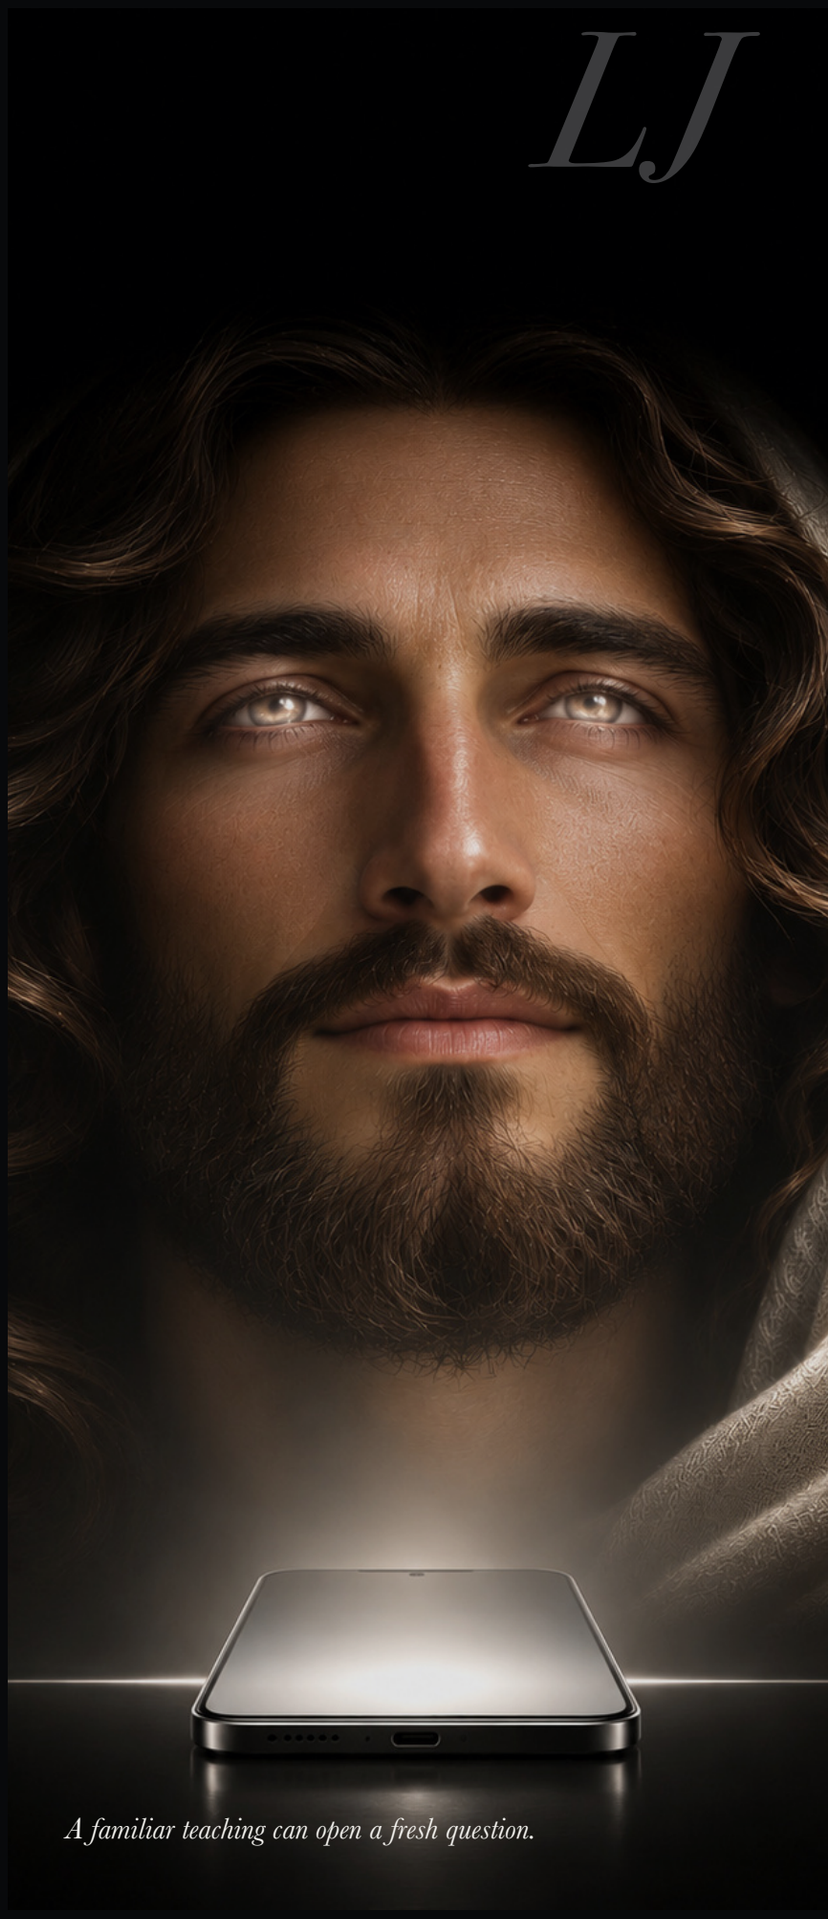

Conversation makes room for another question when the first response opens something new. Ask what a teaching means, examine its setting or reflect on a possible application. Read the Scripture itself alongside the explanation. This is an invitation to thoughtful engagement with Jesus' words, carried into the rhythm of your day.

01 The words of Jesus

02 Scripture-grounded conversation

03 Room for follow-up questions

BEGIN HERE
Ask about one teaching of Jesus and read the passage discussed in the response.

A familiar teaching can open a fresh question.

LIVING GOD

Hear the Old Testament Anew

Explore Old Testament passages through a Scripture-grounded conversation that welcomes questions about their language, setting and meaning for faith.

Ancient passages invite patient reading and living questions.

The Old Testament holds prayers, histories, wisdom and prophetic challenges that reward patient attention. Living God creates a conversational approach to those passages. Bring a verse you find moving, a story you find difficult or a theme you want to understand. The exchange centers on Scripture as you explore the text and its meaning.

A conversation can help you notice a detail you passed over or frame a question more clearly. Return to the passage, consider the explanation and ask what still needs examination. The experience offers a thoughtful companion to reading, giving ancient words a deliberate place in a modern day without replacing your own reflection.

Old Testament focus	Questions welcomed	Reading with reflection

BEGIN HERE Choose an Old Testament passage and ask what its surrounding context contributes to its meaning.

LIVING WORD

Let Scripture Open the Conversation

A conversational approach to Scripture turns a verse, a theme or a question into an invitation to deeper understanding.

Reading can begin with recognition and continue with curiosity. Living Word gives you a conversational way to explore Scripture, following the questions that arise as you encounter its language and ideas. Ask about a passage, examine a biblical theme or consider how an explanation fits the words on the page. Scripture remains the center of the exchange.

The benefit is a more active relationship with your reading. You can pause over an unfamiliar expression, follow up on a difficult thought and return with a clearer question. Allow the conversation to sharpen your attention, then spend time with the text itself. Understanding grows through that deliberate movement between reading and reflection.

Explore biblical meaning

Follow your questions

Keep Scripture central

BEGIN HERE Enter a verse that interests you and ask for an explanation of its central idea.

Choose the conversation that fits the question ahead.

TRINITY CHAT

Intelligence With a Sense of Direction

Choose device help, personal assistance, Internet research or Conqueror library research, then keep useful conversations close in saved Notebooks.

Different questions need different kinds of attention. Trinity Chat brings together Device assistance, the personal Assistant, Internet research and Conqueror library research. Choose the conversation that suits your purpose, whether you are understanding your phone, thinking through a request or pursuing a question through research. The choice gives your inquiry a useful direction from the outset.

Saved conversation Notebooks make the exchange worth returning to. Keep a helpful response, revisit the reasoning and use it as the beginning of your next question. Within a faith-centered phone, this is intelligence with a practical role: helping you examine a matter and carry useful understanding into the work before you.

Four focused conversations

Internet and library research

Saved conversation Notebooks

BEGIN HERE Choose a Trinity Chat mode, ask one focused question and save a useful response to Notebook.

CORNELIUS

Make Space to Check In

The Temple Healer offers an AI companion for wellness questions and reflection, bringing a considerate conversational presence to your day.

Wellness begins with paying attention to how you are doing. Cornelius, the Temple Healer, offers an AI conversation for exploring wellbeing and making room for personal reflection. Describe a concern, put a feeling into words or ask a general question about a healthier daily routine. The experience gives you a place to gather your thoughts with care.

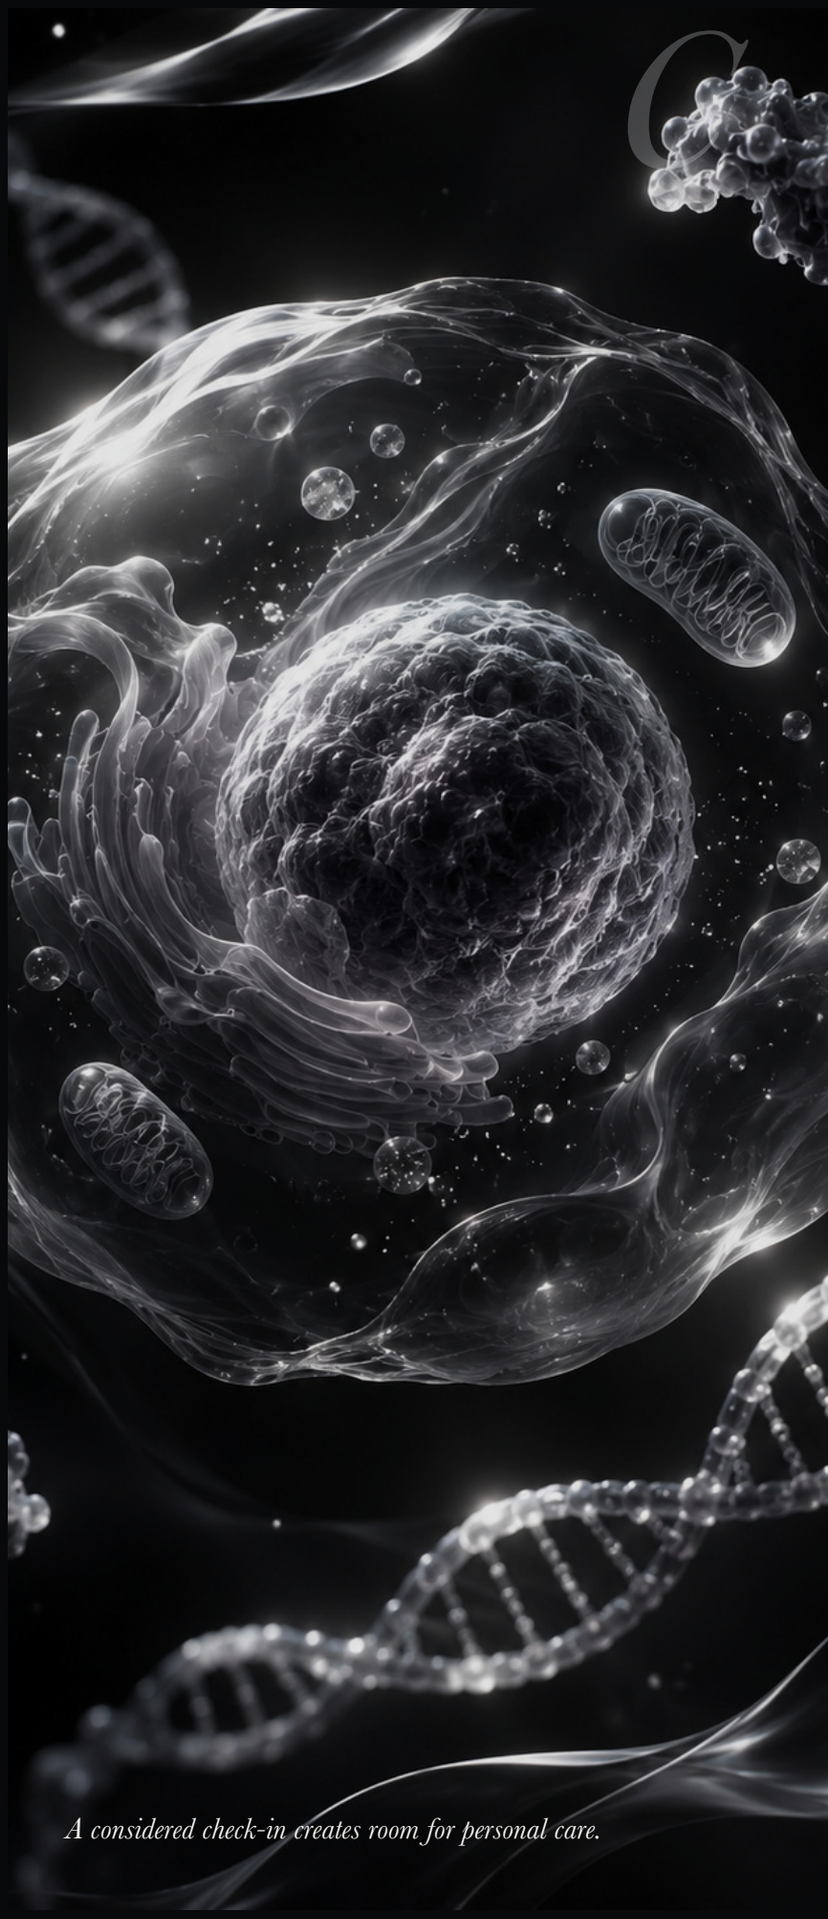

Its role is companionship in that reflection. A useful exchange may help you identify the question you want to pursue or articulate what matters to you today. Bring your judgment to what you read and take time with your own experience. Care for the person belongs within a phone built around faith and daily life.

01 Wellness conversation

02 Personal reflection

03 A considerate companion

BEGIN HERE
Tell Cornelius how your day has felt and ask for a general reflection on a manageable wellness routine.

A considered check-in creates room for personal care.

LAURA

Decide With More Thought Behind You

A royal assistant brings conversational attention to research, purchases and everyday choices, helping you approach decisions with greater clarity.

A good decision often starts by asking a better question. Laura is a royal assistant for thoughtful research, purchase considerations and the choices that shape an ordinary day. Explain what you are trying to accomplish, describe the options you see and give the conversation enough context to be useful. Attention to the actual decision makes the exchange more valuable.

The appeal is measured assistance: room to examine a possibility before committing your time or money. Ask a follow-up, clarify a tradeoff or reconsider what you need. Laura gives that thinking a conversational home, bringing practical discernment into the wider Jesus New experience while leaving the final choice in your hands.

Good choices begin with attention to what matters.

Thoughtful research

Purchase considerations

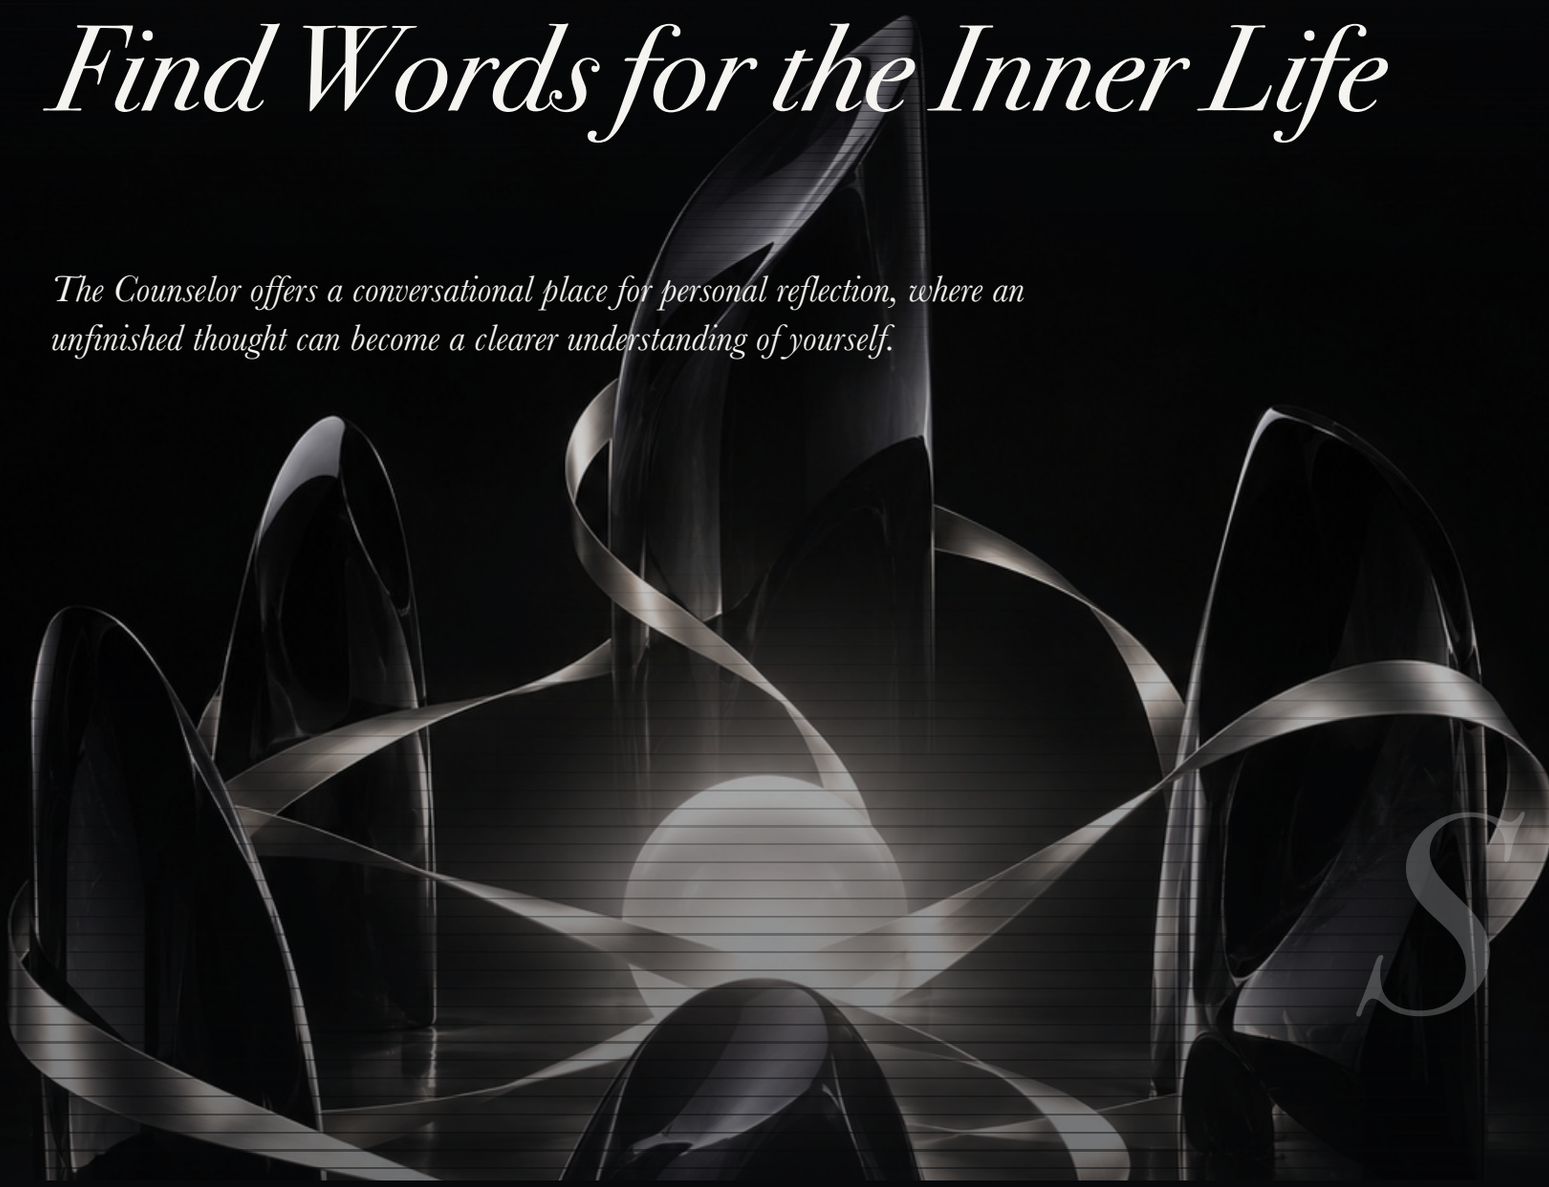

Everyday decision support

BEGIN HERE Describe a purchase you are considering and ask Laura which questions would clarify your actual needs.

SCOTT

Find Words for the Inner Life

The Counselor offers a conversational place for personal reflection, where an unfinished thought can become a clearer understanding of yourself.

You do not always arrive with a neatly formed question. Sometimes you arrive with a feeling, a recurring concern or a thought you have not yet said aloud. Scott, the Counselor, is a conversational companion for personal reflection. Begin with your own words and give yourself time to discover what you are trying to express.

A reflective conversation can help you approach an experience from another angle and recognize the question beneath it. Ask Scott to explore a thought with you, then consider what resonates and what requires more attention. In a faith-centered life, taking your inner experience seriously can be a meaningful part of caring for your relationships and responsibilities.

Personal reflection

Space for unfinished thoughts

Conversational companionship

BEGIN HERE Describe a recurring concern and ask Scott to help you frame the question you most want to understand.

Perspective makes the next stretch easier to consider.

JAMES

A Clearer View of What Comes Next

The Guide brings perspective to a conversation and helps you consider useful next steps for the situation in front of you.

When a situation feels crowded, perspective can be the most useful beginning. James, the Guide, offers a conversational companion for looking at what is happening and considering a practical way forward. Describe where you are, what you hope to change and the limitations you need to respect. Those details give the conversation its direction.

A next step does not have to solve the entire situation to be worthwhile. It can be a question to ask, a choice to consider or a small action that makes the path more visible. James gives you a place to explore those possibilities with intention, connecting reflection to the responsibilities and opportunities of daily life.

Fresh perspective

Useful next steps

Your situation in focus

BEGIN HERE Describe one situation you feel unsure about and ask James for a small next step you can consider.

TEMPLE CHEF

Bring Intention to the Table

Recipe ideas and meal-planning support connect with Fitness, giving the everyday work of eating well a thoughtful place to begin.

The daily question of what to eat can carry more thought than the time available to answer it. Temple Chef offers recipe ideas and meal-planning support, giving your next meal a conversational starting point. Describe the kind of food you want to prepare and the practical circumstances around it. A clear request makes the suggestions easier to consider.

Its connection with Fitness places food within the wider pattern of your day. Meals and movement can be considered together as parts of caring for yourself. Bring curiosity to the recipes, adapt ideas to your own needs and enjoy the ordinary creativity of the kitchen. There is dignity in making something nourishing for yourself or someone you love.

01 Recipe inspiration

02 Meal-planning support

03 Connected with Fitness

BEGIN HERE
Ask Temple Chef for a meal idea using ingredients you already have, then review the suggested recipe.

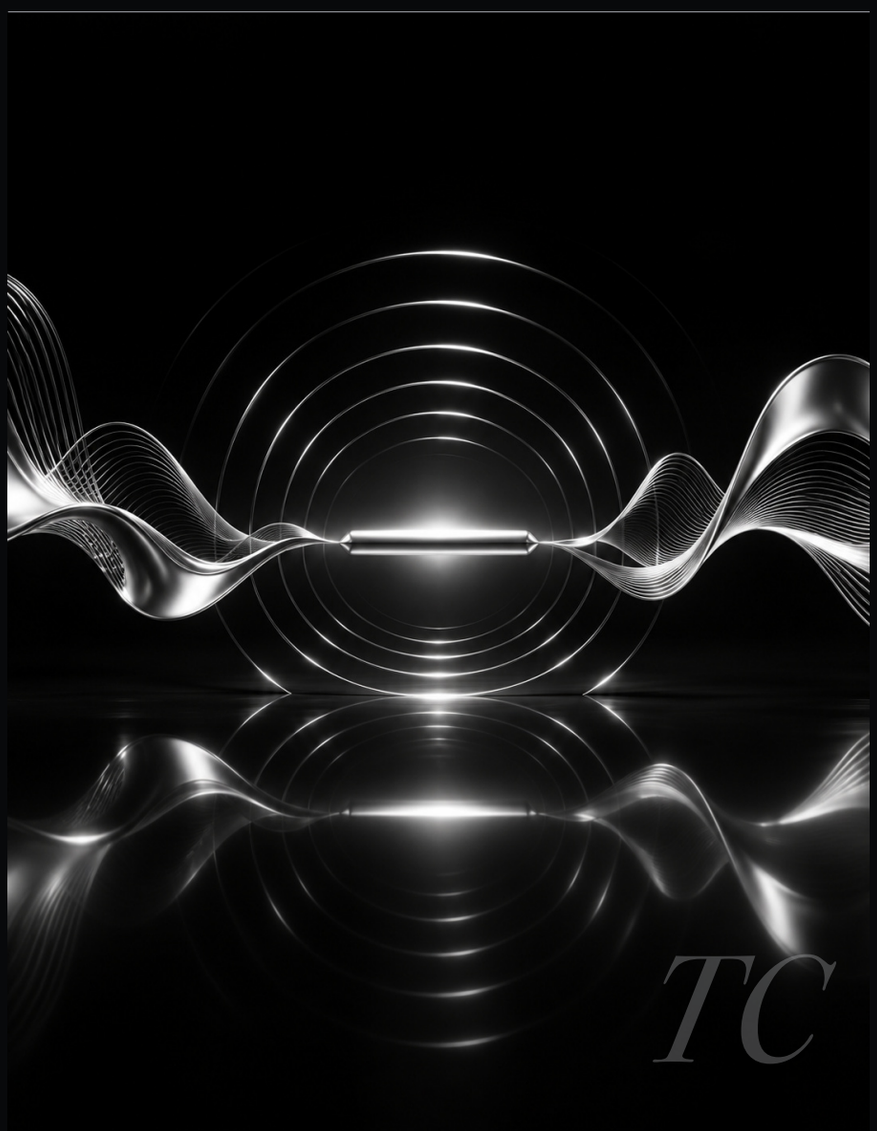

Everyday ingredients can begin something worth sharing together.

TRINITY CALM

Give the Moment Some Room

When pressure narrows your attention, Trinity Calm offers a place to reflect and choose one calmer action to consider next.

Pressure can make every demand feel immediate. Trinity Calm invites you to pause long enough to describe what is happening and consider a calm next action. You can bring a tense moment, a crowded day or a decision that feels larger than your available attention. Putting it into words gives the conversation somewhere concrete to begin.

The emphasis is on the next useful movement. A calmer action may be small enough to consider without taking on the whole problem at once. Read the response at your own pace and choose what fits the moment. Within the Jesus New experience, this focused space brings reflection into the places where daily life asks most of you.

A little room can change the next moment.

Work through pressure

A focused conversation

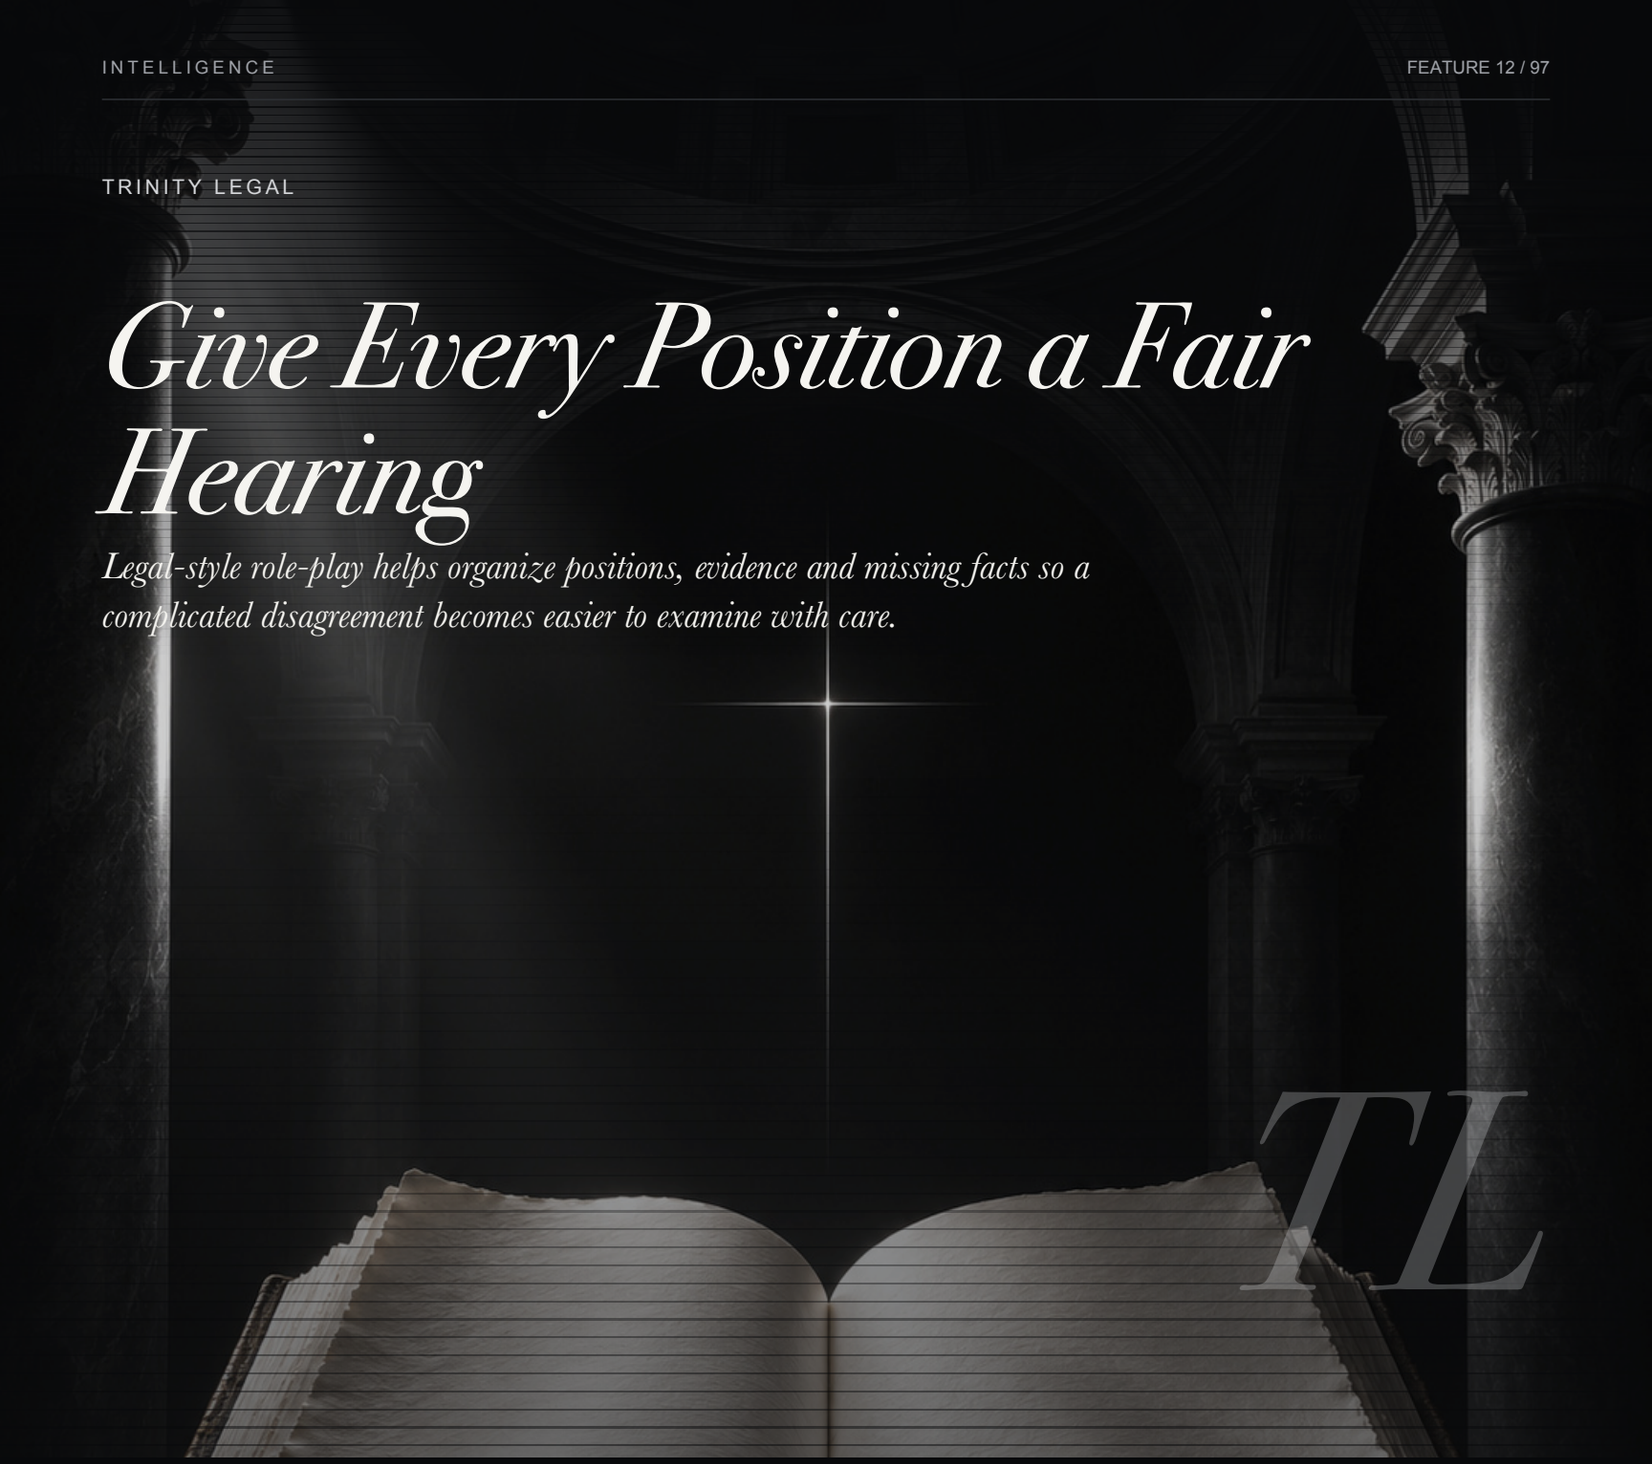

Consider a calmer action

BEGIN HERE Describe the pressure you feel right now and ask for one calm next action you can consider.

TRINITY LEGAL

Give Every Position a Fair Hearing

Legal-style role-play helps organize positions, evidence and missing facts so a complicated disagreement becomes easier to examine with care.

A dispute can become difficult to understand when claims, feelings and evidence arrive together. Trinity Legal offers legal-style role-play for organizing the positions involved. Describe the issue and explore how a position might be presented, what evidence supports it and which facts remain missing. The format creates a more disciplined conversation about the matter.

That discipline has practical value even before a conclusion is possible. You may discover that an important question is unanswered or that an interpretation has been mistaken for a fact. Use the role-play to understand the structure of a disagreement and prepare clearer questions. Fairness begins with taking both the evidence and its limits seriously.

Legal-style role-play

Positions and evidence

Missing facts made visible

BEGIN HERE Use a fictional disagreement and ask Trinity Legal to separate each position from its supporting evidence and missing facts.

Thoughtful language gives an idea room to shine.

TRINITY WRITING

Give Your Ideas Their Finest Form

Start with notes and develop clearer writing, exploring better possibilities for what you want to say and how it reaches people.

A promising idea does not always arrive as a finished sentence. Trinity Writing gives you a place to develop notes into clearer writing and explore other possibilities for expression. Bring the rough paragraph, the scattered points or the thought that still needs shape. Tell the conversation what you want the writing to accomplish.

The work is as much about intention as polish. Consider which words carry your meaning, where the reader needs more help and what can be made simpler. Explore a revision, compare it with your original and retain the choices that sound true to you. Clear language can be an act of care for the person who will read it.

Develop rough notes

Explore better possibilities

Write with greater clarity

BEGIN HERE Paste a short draft and ask Trinity Writing to make its main point clearer while preserving your meaning.

TRINITY ACTION

Give Good Intentions a First Step

Turn a desired result into ordered actions, bringing practical sequence to the work you want to move forward with purpose.

A result can be easy to imagine and difficult to begin. Trinity Action helps you turn that desired outcome into an ordered set of actions. Describe what you want to achieve, along with the circumstances that shape the work. The conversation focuses attention on the sequence between where you are and where you hope to arrive.

Order makes effort more deliberate. It gives you a first step to consider and a way to see how later steps depend on earlier ones. Review the suggested actions, adjust what does not fit and choose a manageable beginning. Purpose gains practical expression when a good intention becomes something you can actually do today.

01 Name the desired result

02 Put actions in order

03 Choose a practical beginning

BEGIN HERE
Describe one result you want this week and ask Trinity Action to suggest an ordered sequence for reaching it.

Purpose takes shape through the action you choose.

TRINITY SIMULATOR

Explore the Turns Before They Arrive

Consider possible scenarios and the signals that would change your plan, giving uncertainty a more useful place in your thinking.

A considered plan leaves room for changing conditions.

Planning becomes more thoughtful when it makes room for more than one possible future. Trinity Simulator lets you explore scenarios around a situation and consider the signals that would change your response. Describe the decision, the assumptions behind it and the possibilities you want to examine. The conversation gives those alternatives a clearer shape.

The value lies in preparation. You can ask what might unfold if a condition changes, then consider what you would notice and how you might respond. Treat the scenarios as possibilities to examine. With attention to the signs that matter, a plan can become more adaptable while remaining anchored in the purpose that first inspired it.

Explore possible scenarios

Examine changing conditions

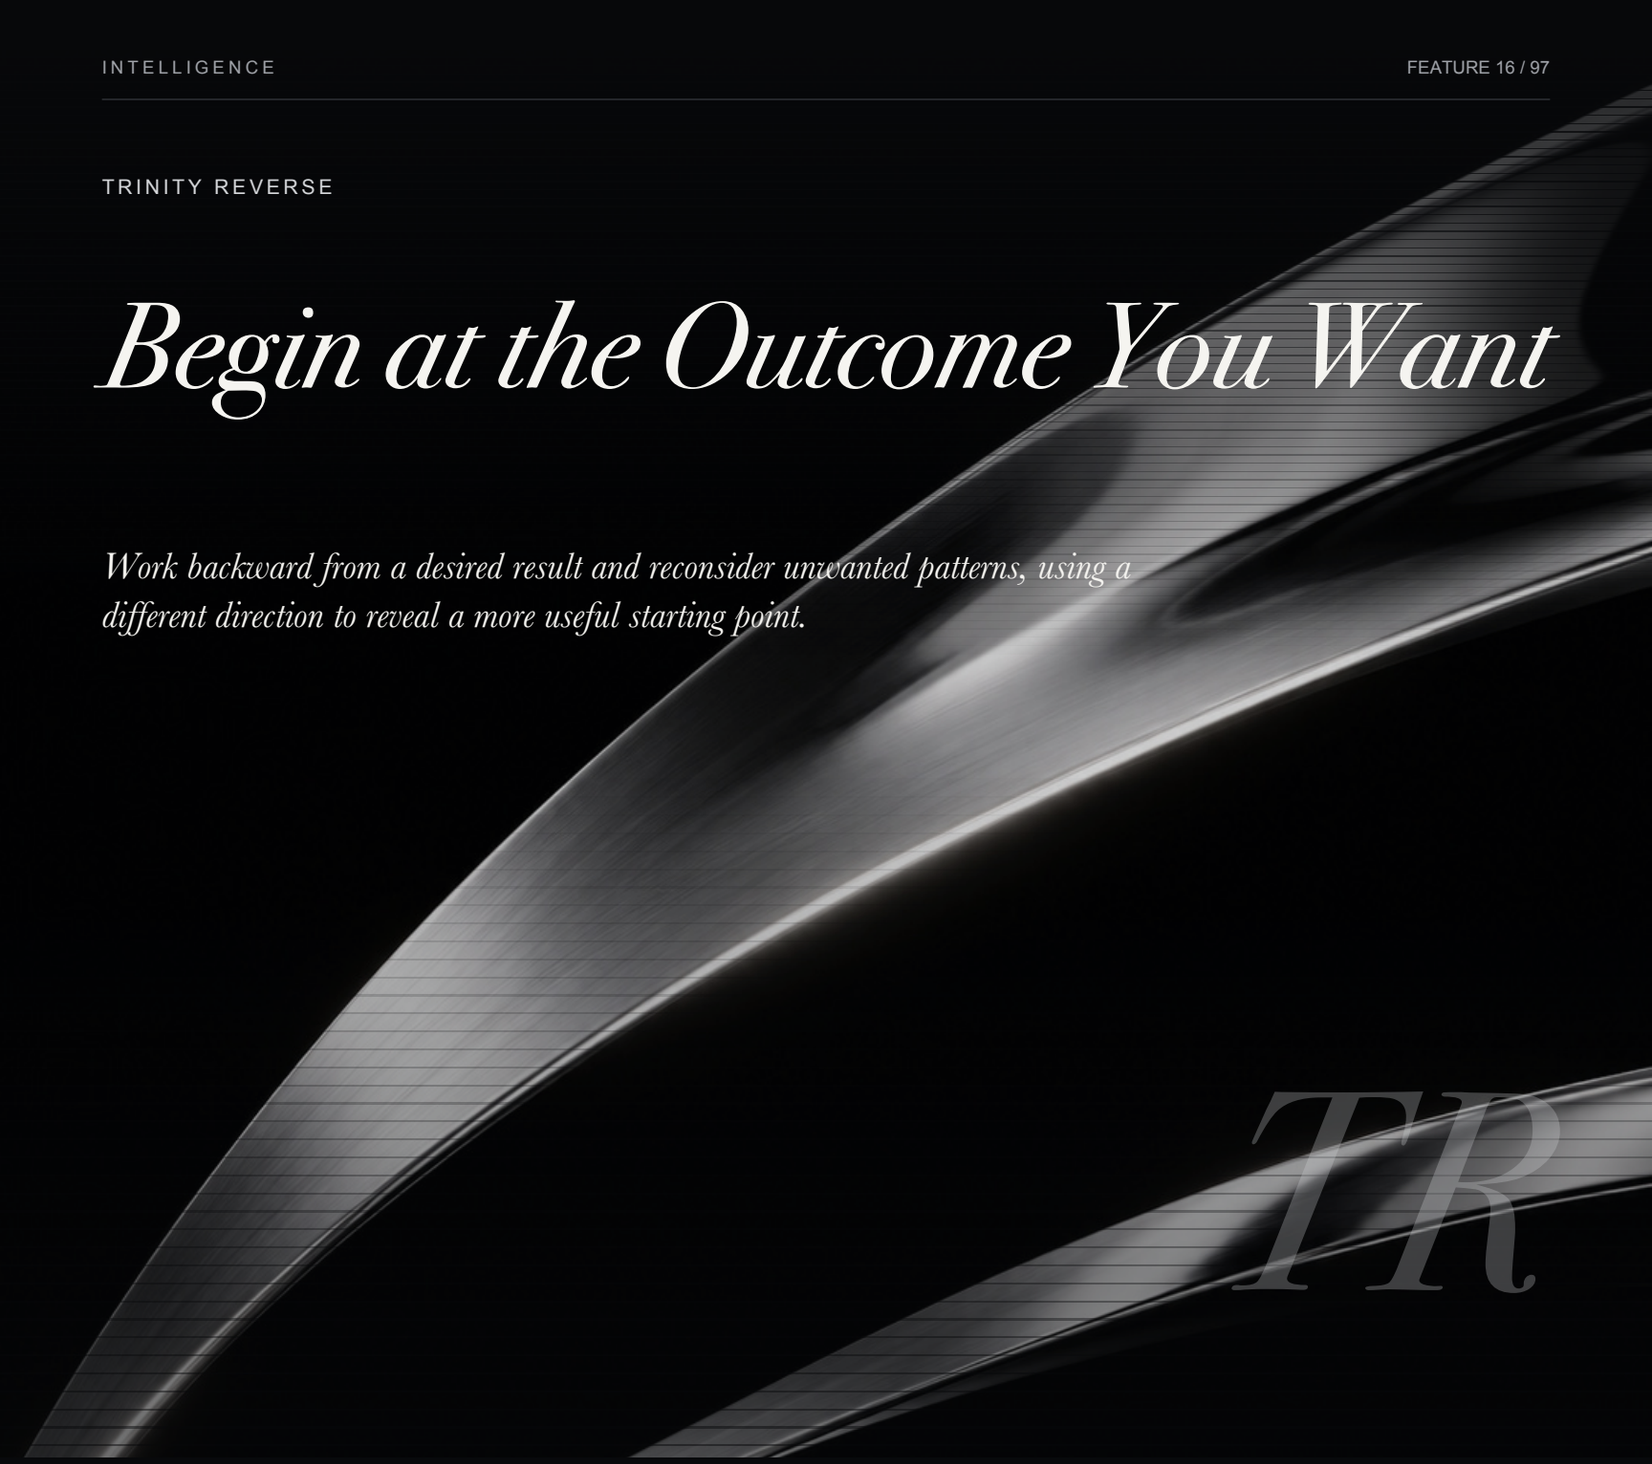

Recognize decision signals

BEGIN HERE Describe a plan and ask Trinity Simulator how two different changes in circumstances could affect your next step.

TRINITY REVERSE

Begin at the Outcome You Want

Work backward from a desired result and reconsider unwanted patterns, using a different direction to reveal a more useful starting point.

Sometimes the familiar direction of thinking keeps returning to the same obstacle. Trinity Reverse begins with the result you want and works backward, creating another way to approach the situation. Describe the outcome clearly, then explore what would need to be true immediately before it and what might come before that. The reversed view can reveal useful questions.

The same approach creates room to reframe an unwanted pattern. Examine the result the pattern produces and consider where a different choice might interrupt it. Read the possibilities with your own circumstances in mind. A change in perspective can make the beginning more visible, especially when moving forward has felt difficult to imagine.

Work backward

Reframe unwanted patterns

Find a new starting point

BEGIN HERE Name a desired result and ask Trinity Reverse to work backward toward one step you could take now.

Clarity grows when evidence and interpretation stand apart.

TRINITY TRUTH

Give Clarity the Evidence It Deserves

Separate claims, interpretations, evidence and unknowns, bringing a careful structure to questions where certainty may have arrived before understanding did.

A confident statement can conceal several different things: an observed fact, an interpretation or a question that has not been answered. Trinity Truth helps you separate claims, evidence, interpretations and unknowns. Bring a statement you want to examine and describe the information available. The conversation gives each part a clearer place in the inquiry.

This approach makes intellectual honesty practical. You can see what is supported, what is being inferred and what still requires attention. Ask which missing information would most change the assessment, then consider how you might pursue it. A faith-centered life has room for this discipline: taking truth seriously means being willing to examine how a conclusion was reached.

Claims separated

Evidence considered

Unknowns kept visible

BEGIN HERE Enter a non-sensitive claim and ask Trinity Truth to distinguish its evidence, interpretations and unanswered questions.

TRINITY DEEP THINKING

Stay With the Question Longer

Examine underlying reasons and more than one perspective, giving a difficult idea the sustained attention it needs to become clearer.

The first explanation is sometimes only the surface of a question. Trinity Deep Thinking offers a conversation for examining the reasons beneath it and considering more than one perspective. Bring an idea that feels unresolved, a choice with competing values or a question that keeps returning. Give it enough detail to make a serious examination possible.

Sustained thinking can reveal an assumption you had not noticed or a perspective you had not yet considered. Ask why a proposed explanation holds together, then explore what another viewpoint would emphasize. Take time to consider the differences. The reward is a more examined understanding, shaped by attention rather than the pressure to arrive at an immediate conclusion.

01 Examine underlying reasons

02 Consider several perspectives

03 Question hidden assumptions

BEGIN HERE
Bring an unresolved idea and ask Trinity Deep Thinking to examine the assumptions behind two different interpretations.

Some questions become clearer through sustained, patient attention.

TRINITY PRIORITY

Choose What Deserves Your Next Hour

Consider responsibilities through urgency, importance and cost, bringing a thoughtful order to the demands competing for your limited time today.

A full list of responsibilities does not tell you where to begin. Trinity Priority helps you examine those demands through urgency, importance and cost. Describe what is waiting, what matters most and the constraints around your time. The conversation gives you a more considered way to approach the order of the work.

A useful priority reflects consequences as well as deadlines. Something quiet may deserve attention because of its importance, while something loud may need a proportionate response. Review the suggested order and compare it with your actual responsibilities. In a life shaped by faith and service, choosing where to place your attention is itself a meaningful act of stewardship.

Your attention deserves a purpose as clear as time.

Urgency and importance

Costs considered

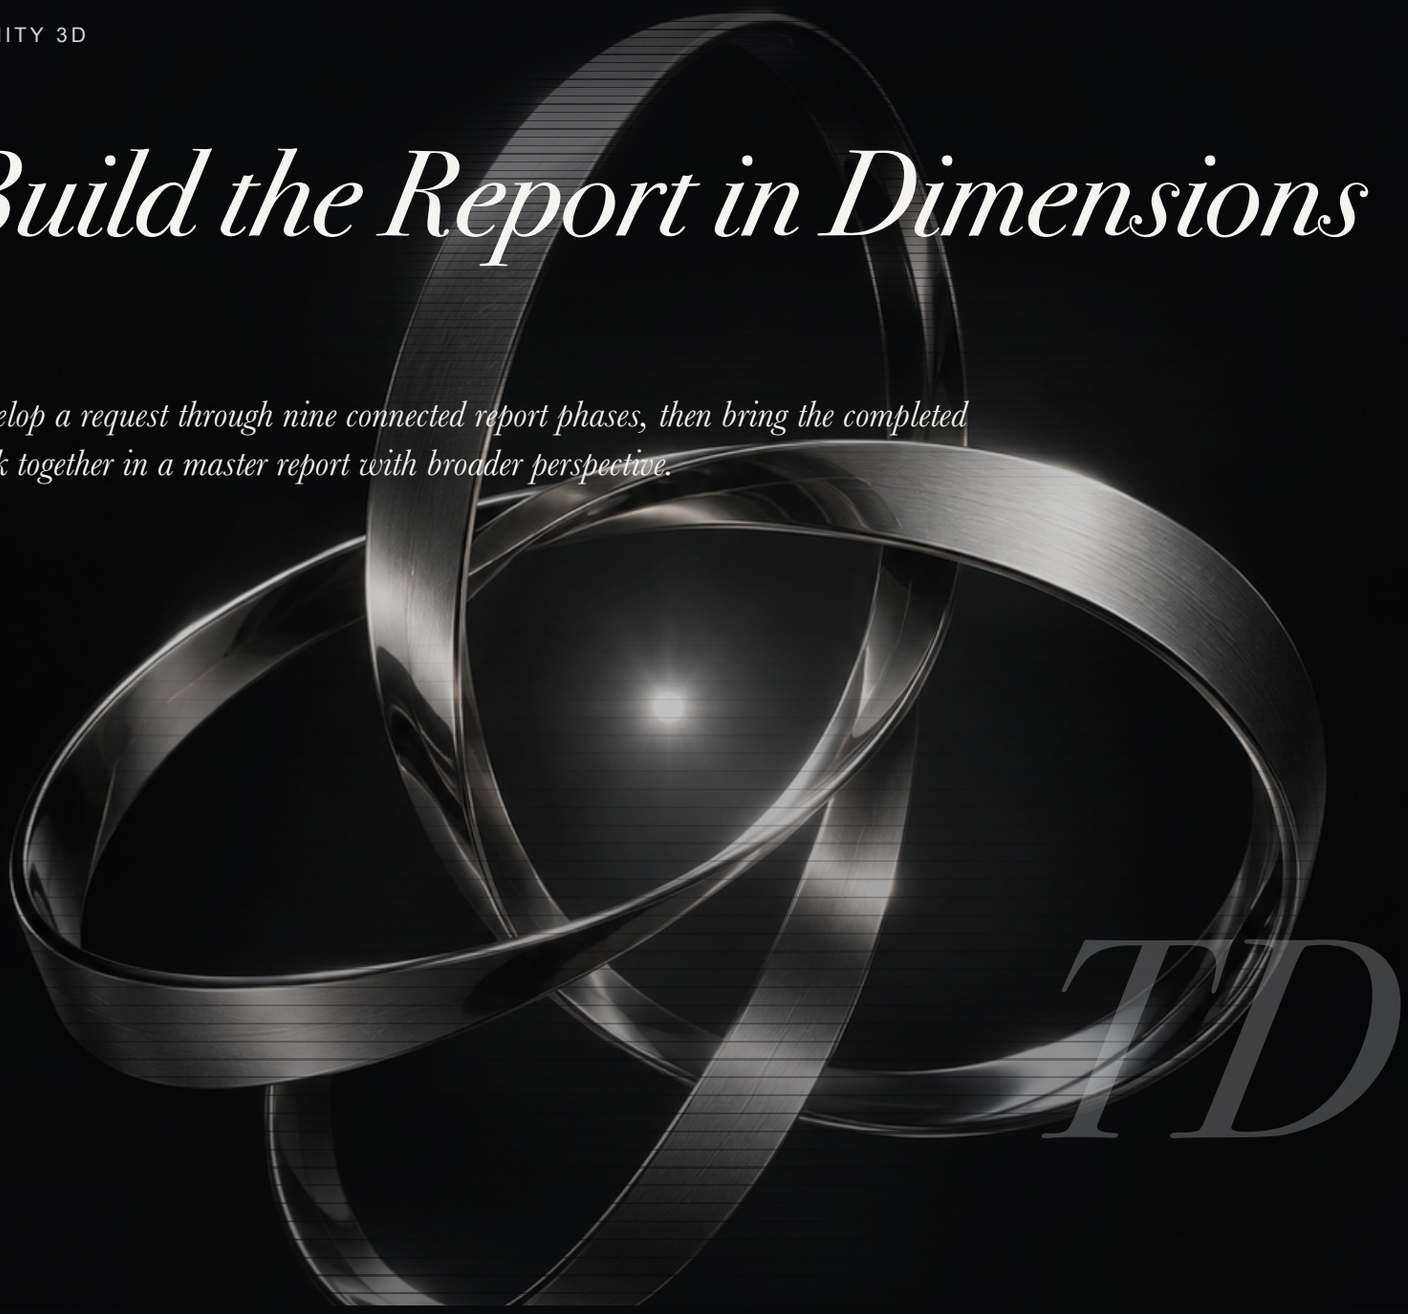

A thoughtful order of work

BEGIN HERE List three responsibilities with their deadlines and ask Trinity Priority to help you consider an order.

TRINITY 3D

Build the Report in Dimensions

Develop a request through nine connected report phases, then bring the completed work together in a master report with broader perspective.

Some requests deserve a structure large enough to hold several stages of thought. Trinity 3D develops a request through nine connected report phases and gathers the completed work into a master report. Begin by describing what you want to examine. The staged format gives the request room to develop beyond a single conversational answer.

Each phase contributes to a broader piece of work. Following the progression lets you consider what the developing report adds and how its parts relate. The master report then offers a place to see that work together. For a substantial question or project, this measured process supports an inquiry you can approach with both ambition and attention.

Nine connected phases

A developing inquiry

One master report

BEGIN HERE Give Trinity 3D a clearly bounded report request and review the first phase before continuing through the process.

Care becomes more deliberate when purpose meets preparation.

TRINITY MINISTRY

Give Service a Thoughtful Foundation

Develop a ministry need through nine connected report phases, bringing sustained attention to the people, purpose and work you hope to serve.

Ministry often begins with a person to care for or a need that has become impossible to ignore. Trinity Ministry offers a staged way to develop that need through nine connected report phases. Describe the work you have in mind and the community it is meant to serve. The process gives that intention a considered place to grow.

Moving through the phases encourages attention beyond the first idea. Consider what each stage contributes and how it relates to the ministry's purpose. Let the developing work inform your own judgment, conversations and preparation. Faithful service asks for both heart and thought; this experience gives the thinking a structure while keeping the human need at the center.

Ministry-centered development

Nine connected phases

Purpose with preparation

BEGIN HERE Describe a modest ministry need and begin a report focused on the people you want to serve.

PERSONAL INTELLIGENCE

An Experience Shaped by Your Words

UL personalization connects your words, goals and preferences with the experience, while Unity Learning gives you ways to contribute more context.

Personal Intelligence begins with the context that makes you a person with particular interests, language and aspirations. UL personalization draws on supported personal context, while Unity Learning provides ways to add your own words through document uploads and saved speech. Goals and local preferences contribute further direction. Fusion brings material together into synthesis within supported experiences.

These parts have related roles. Unity Learning collects the words you contribute; personalization uses relevant context to shape an experience around you. Start with something that represents your own voice and review the goals you have expressed. Thoughtful personal context gives the technology a clearer sense of what you are trying to pursue, learn and understand.

01 Your words and goals

02 Unity Learning contributions

03 Context for personalization

BEGIN HERE
Open Unity Learning and review its information before choosing a document of your own words to contribute.

Personal context begins with the words you contribute.

HOLY GHOST

Let Your Meaning Come Through

Integrated writing assistance works within supported text workflows, bringing attention to expression where your words are already taking shape on screen.

Writing assistance is most useful when it meets you at the place you are already writing. Holy Ghost is integrated into supported text workflows across the experience. It brings help into the act of expression, where a sentence is still becoming what you mean to say. Your draft remains the starting point for the work.

The purpose is clear communication. As you write, keep your intended meaning in view and read the final wording with attention. A personal message, a question or a practical request deserves language that carries your thought faithfully. Within Jesus New, the Holy Ghost name belongs to this writing feature; the human value is found in helping your words reach another person more clearly.

Clear expression gives your intended meaning a voice.

Integrated writing assistance

Supported text workflows

Your meaning in focus

BEGIN HERE Write a short message in a supported conversation and read the final wording carefully before sending it.

NAVIGATOR

Follow the Verse Into Deeper Study

JNV reading, classic commentary, cited Codex research and language resources create a study desk you can carry into everyday life.

Navigator brings several ways of studying Scripture around the verse in front of you. Read the JNV, explore a verse study and consider five classic commentary choices. Cited Codex Commentary adds another research path, while concordance and lexicon resources support closer attention to biblical language. The collection invites you to examine a passage from several useful angles.

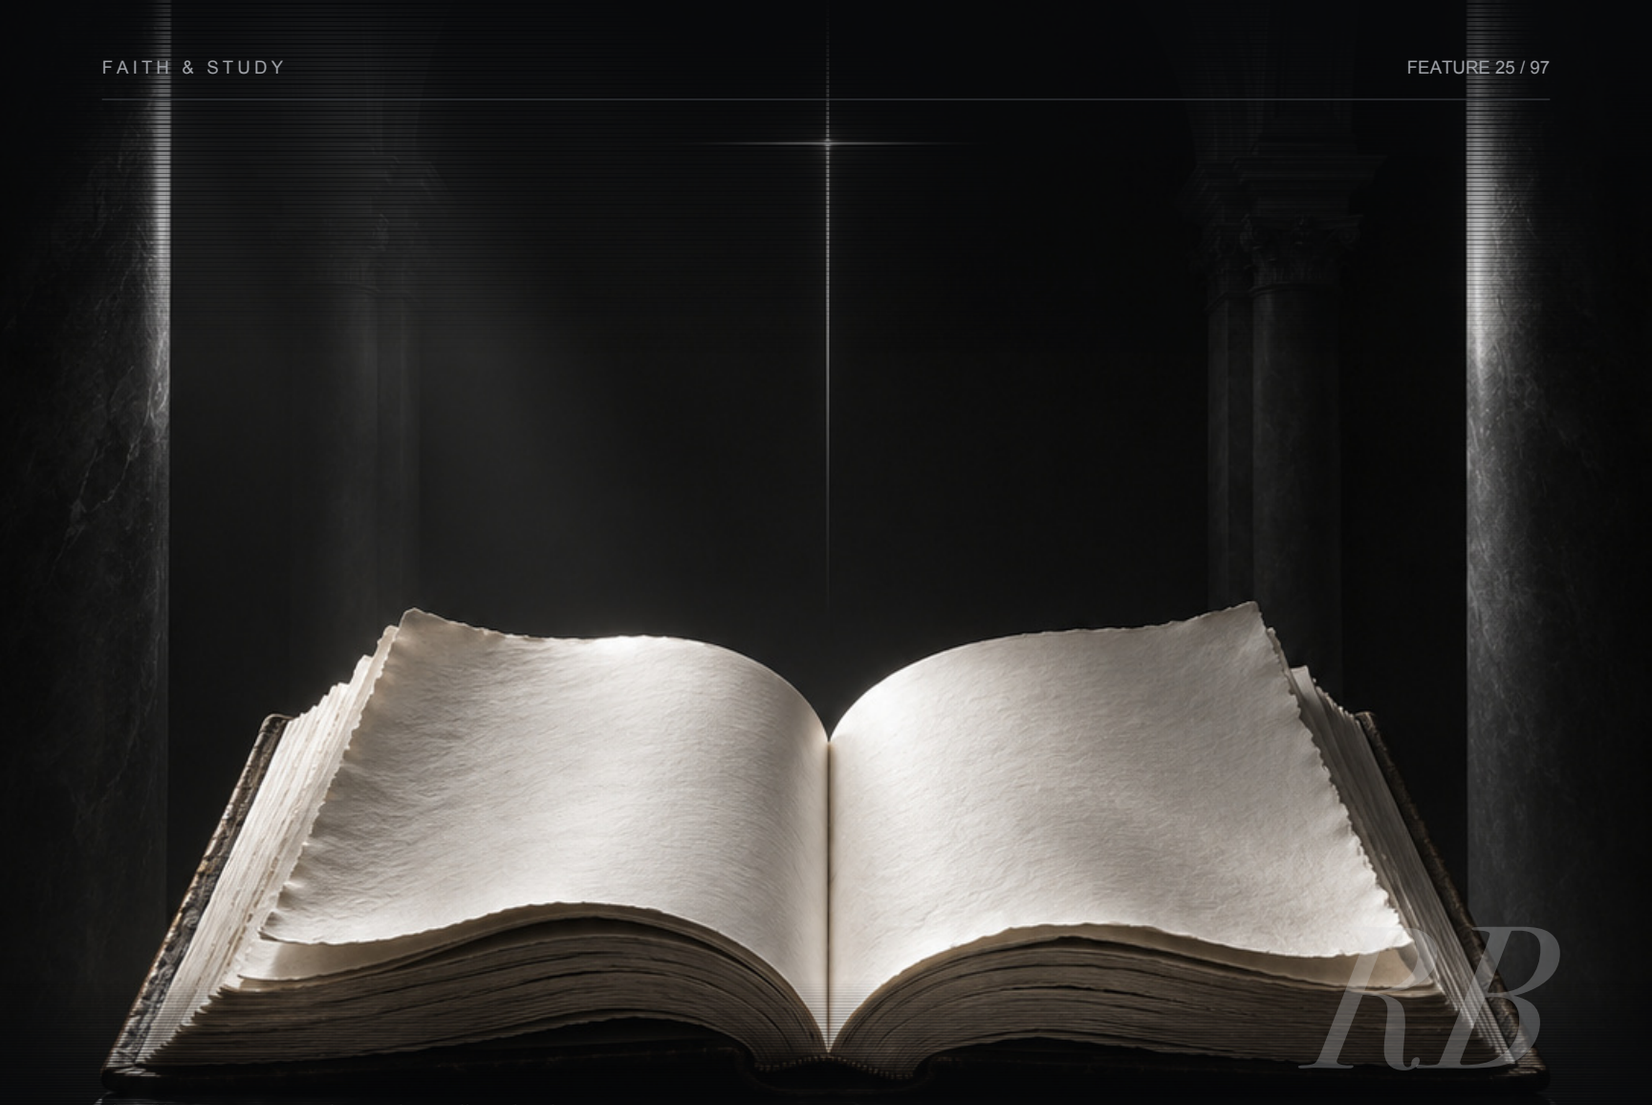

Saved passages and notes give continuity to the work. Keep what you want to revisit, record the question a passage raises and return when you have more time. Study becomes a practice with a memory of its own. Whether you have a quiet hour or a brief opening in the day, Navigator gives careful reading a practical home.

JNV and verse studies

Commentary and language tools

Saved passages and notes

BEGIN HERE Open a verse, read one commentary option and save a note about a question you want to revisit.

A deliberate pause can deepen the reading ahead.

REVEAL BIBLE

Pause Where a Verse Invites You

Read the Bible with generated explanations around individual verses, creating room to explore a passage before moving to the next.

There are moments in Bible reading when one verse asks for a little more attention. Reveal Bible combines reading with generated explanations around individual verses, giving you a way to pause over the words that interest or challenge you. The passage supplies the starting point, and the explanation offers material for further consideration.

That close focus encourages an active reading practice. Compare what the explanation says with the verse itself and consider how the surrounding passage affects your understanding. A brief stop can bring a question into sharper focus or make an unfamiliar idea easier to approach. Keep reading with curiosity, allowing the text to set the pace of your exploration.

Bible reading

Individual verse focus

Generated explanations

BEGIN HERE Choose a verse in Reveal Bible and compare its generated explanation with the passage around it.

CODEX

Enter a Library Worth Returning To

Search preserved and restored books, discover distinctive collections and manuscripts, and make time for sustained reading in your personal reading room.

A library offers more than answers to the question you brought with you. Codex opens preserved and restored books alongside Artifact and Visionary collections, manuscripts and a personal reading room. Search with a subject in mind or explore a collection that invites your curiosity. The experience makes room for encounters with ideas beyond the immediate conversation.

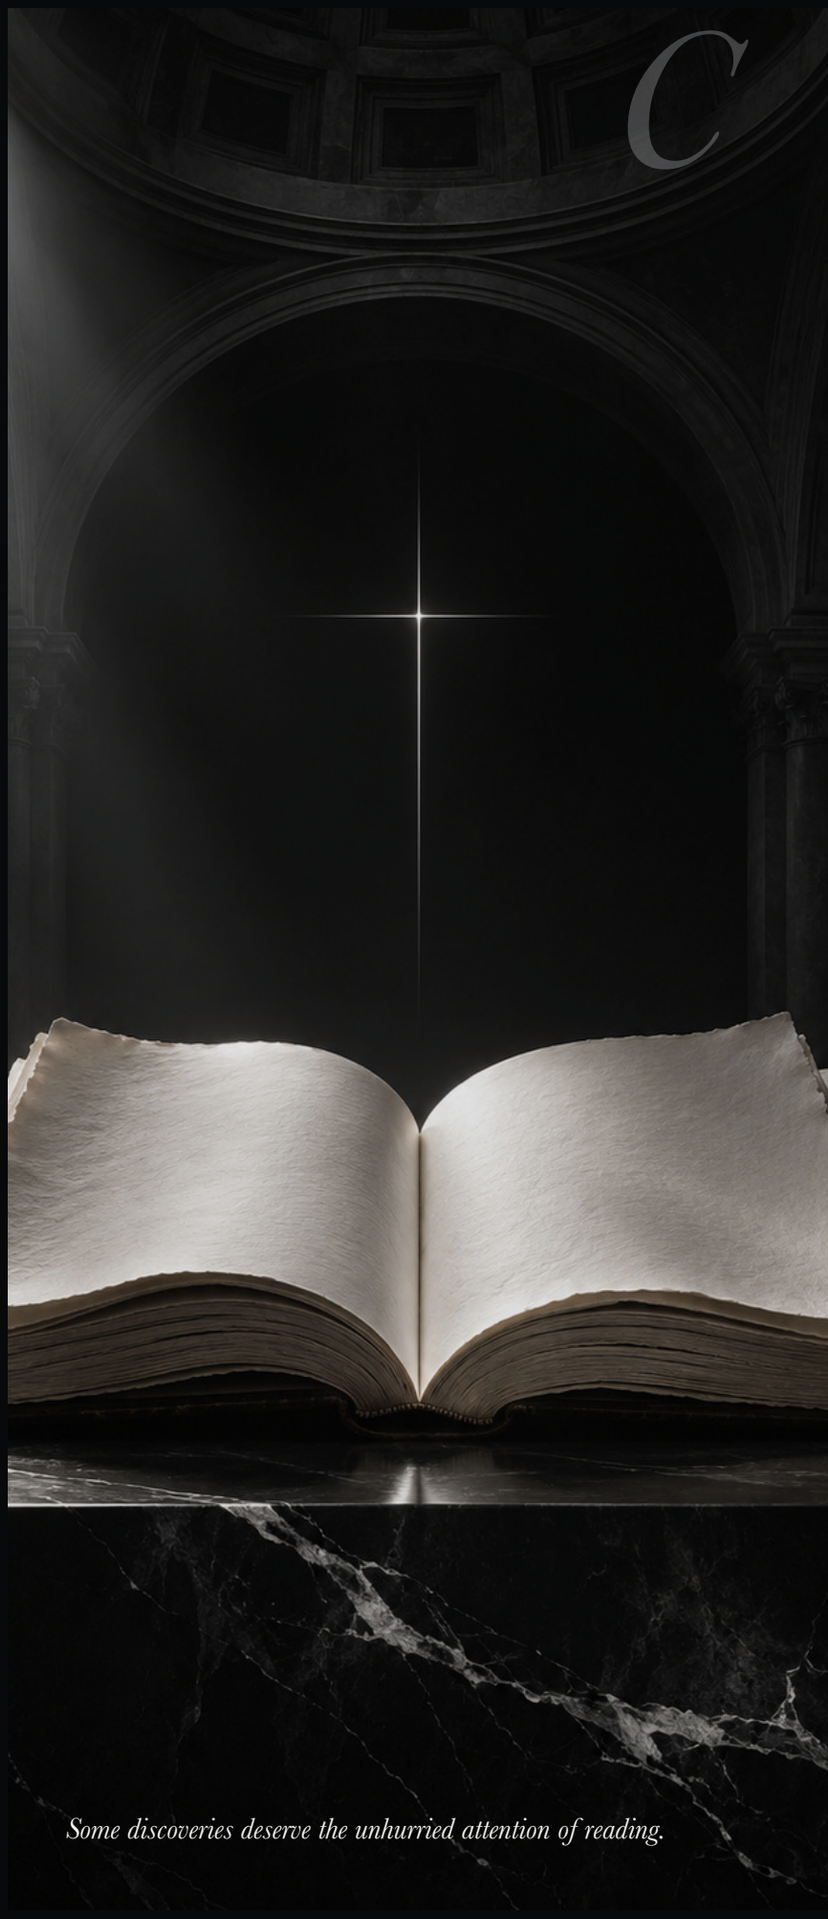

Reading has its own pace. Give a work enough attention to hear its language, follow its argument and consider its place in your studies. Different books and editions carry different histories of preservation and restoration. Codex brings those materials into a connected reading experience, where the next useful discovery may be a page you choose to stay with.

01 Preserved and restored books

02 Collections and manuscripts

03 A personal reading room

BEGIN HERE
Search Codex for a subject that interests you and open a book to read beyond its title and description.

Some discoveries deserve the unhurried attention of reading.

ALEPH

A Quiet Place for Personal Reading

A dedicated reader gives personal spiritual content its own space, inviting a slower encounter with words that matter to your faith.

Personal spiritual reading often asks for a different kind of attention from the rest of a busy day. Aleph is a dedicated reader for that content, offering a place to spend time with words that speak to your faith. Open the material you want to read and let the passage hold your attention for a while.

A dedicated setting can give a reading its own significance. You may approach it with a question, return to an idea you want to consider or simply read with openness. There is no need to turn every encounter into a task. Aleph makes space for the personal dimension of spiritual content and the meaning you bring to it.

Personal reading begins with the attention you offer.

Dedicated reading space

Personal spiritual content

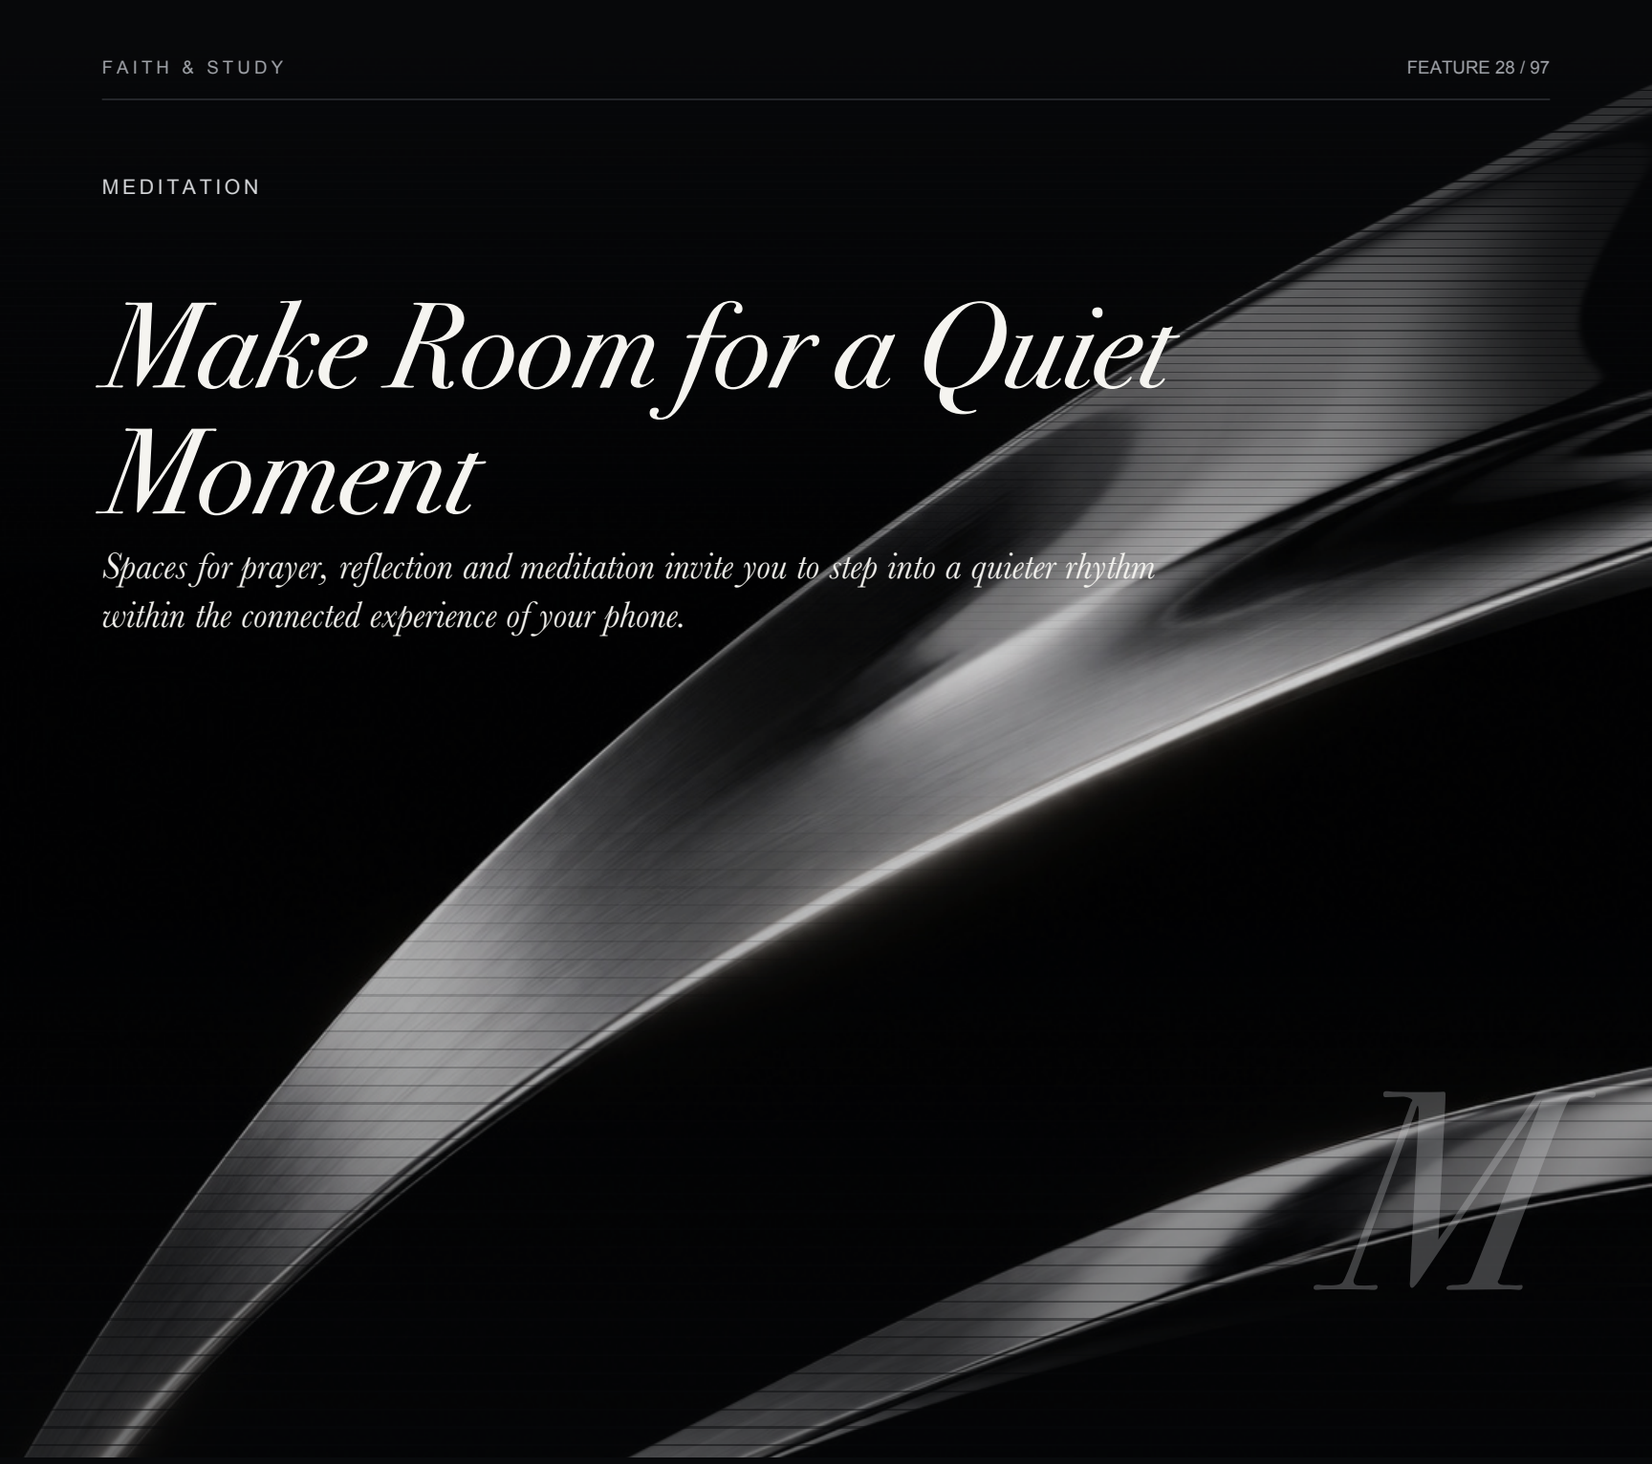

Time for attentive reading

BEGIN HERE Open a personal spiritual reading in Aleph and spend a few uninterrupted minutes with one passage.

MEDITATION

Make Room for a Quiet Moment

Spaces for prayer, reflection and meditation invite you to step into a quieter rhythm within the connected experience of your phone.

Quiet can be a deliberate choice in the middle of an active day. Meditation offers spaces for prayer, reflection and meditation within Jesus New. Enter with something you want to hold in prayer, a thought you want to consider or a desire for a few minutes of stillness. Your intention gives the moment its character.

These pauses need not be elaborate to have a place in your life. Set aside a little attention and allow yourself to remain with the purpose that brought you. In a phone that carries so many practical possibilities, a quiet space honors another human need: time to reflect on your faith, your day and the people entrusted to your care.

Prayer and reflection

A quieter rhythm

Space for meditation

BEGIN HERE Open Meditation and choose a quiet space for a brief period of prayer or reflection.

Give listening a little of your undivided attention.

LIFEFLOW

Choose a Gentler Rhythm to Hear

Meditation recordings, relaxing audio and local tracks give listening a reflective role, with program information available to guide your own exploration.

Listening can change the character of a moment. LifeFlow brings together meditation recordings, relaxing audio, local tracks and program information, giving you several ways to explore a more reflective soundscape. Choose what suits the time you have and the kind of listening you want. The experience begins with your attention to the sound before you.

A recording can accompany a pause you have chosen for yourself, while locally stored LifeFlow recordings remain within reach. Read the available program information and approach the choices at a comfortable pace. LifeFlow creates a place for sound within the quieter side of the Jesus New experience, alongside your own practices of reflection and faith.

Meditation recordings

Relaxing and local audio

Program information

BEGIN HERE Browse LifeFlow's recordings and program information, then choose a short listening session at a comfortable volume.

CHURCH

Keep Faith's Stories Within Reach

Sacraments, stories and sermons come together in a dedicated faith library, offering recordings for listening, reflection and continued attention to Christian life.

Faith is carried through teaching, shared stories and the practices that give a community its shape. Church gathers sacraments, stories and sermons into a dedicated audio library. Enter through the subject that meets your interest today and spend time with the material it offers. The collection gives those parts of Christian life a clear place within the phone.

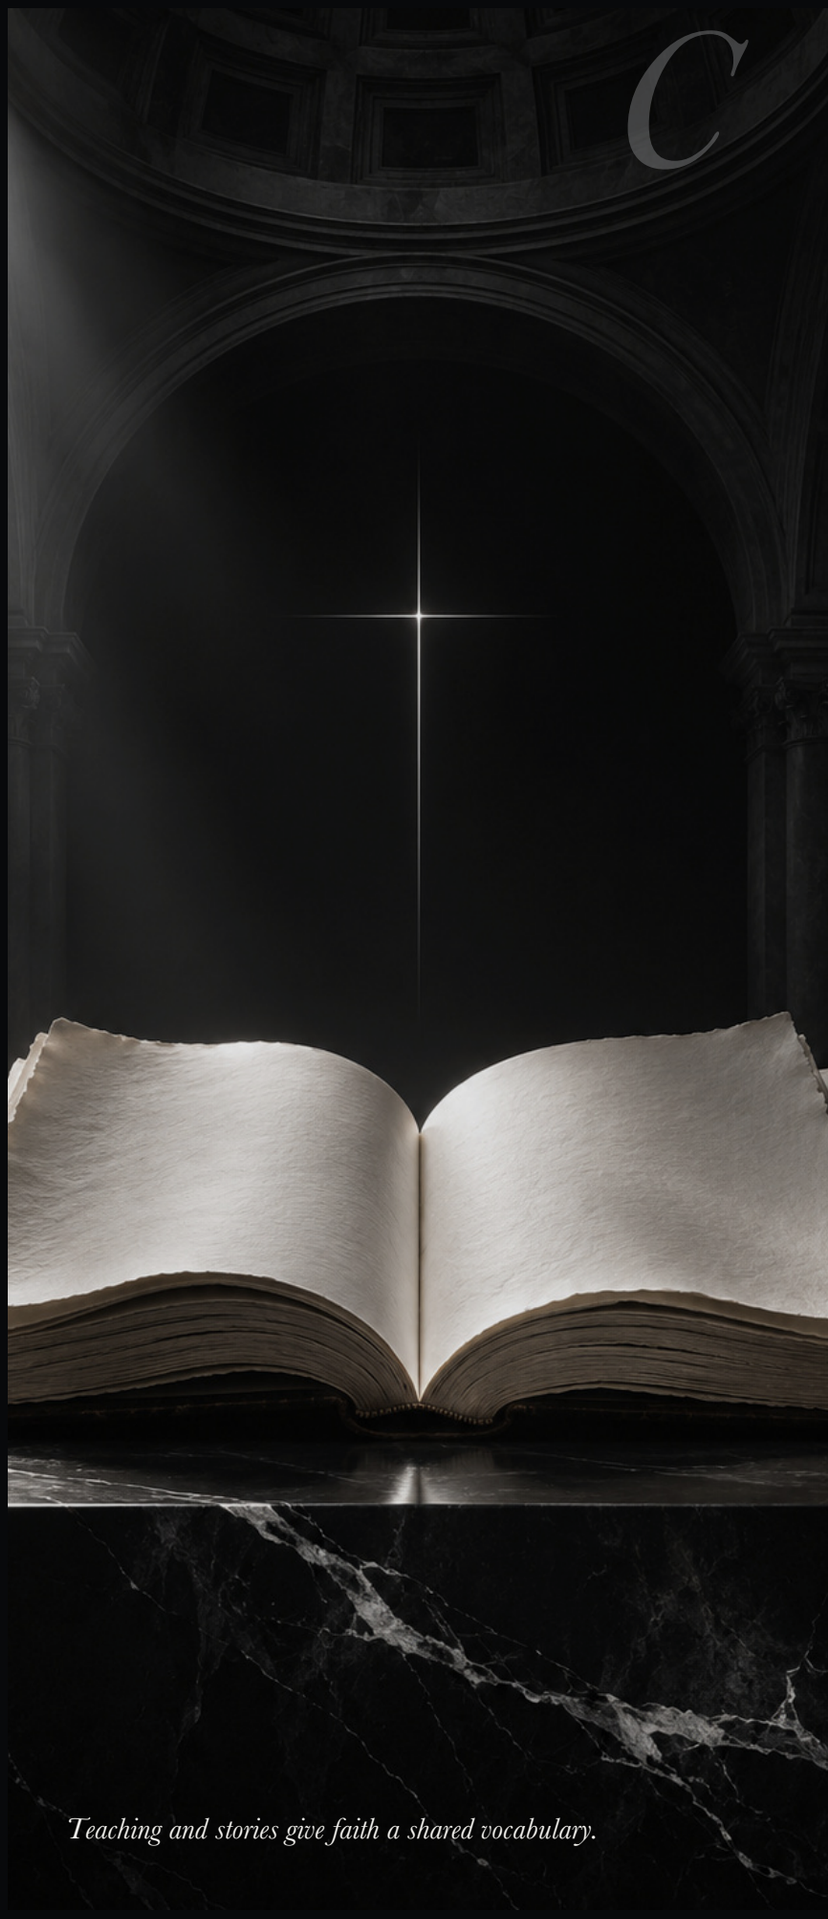

A sermon may prompt a question; a story may invite reflection; learning about a sacrament may open a subject you want to understand more fully. Follow that interest with patience. Church offers a resource for the attention you bring to your faith, keeping meaningful material available when you are ready to explore it.

01 Sacraments

02 Stories

03 Sermons

BEGIN HERE
Open Church and choose a story or sermon to listen to with one question in mind.

Teaching and stories give faith a shared vocabulary.

REMEMBER THAT VERSE

Carry the Verse Into Your Day

Verse memorization and repeated practice give Scripture an active place in your routine, with progression and eligible rewards marking supported milestones.

A verse remembered can return to you when a screen is no longer in front of you. Remember That Verse gives Scripture memorization a dedicated practice, bringing repetition and progression into the experience. Choose the verse you want to learn and return to it with attention. Familiarity develops through the work of meeting the words again.

Eligible milestone rewards add another marker along the way, while the central activity remains your engagement with the verse. Let each practice be an opportunity to notice its wording and consider its meaning. A little repeated effort can become part of a larger spiritual routine, placing Scripture among the words you carry through an ordinary day.

Return to the words you want to remember.

Verse memorization

Practice and progression

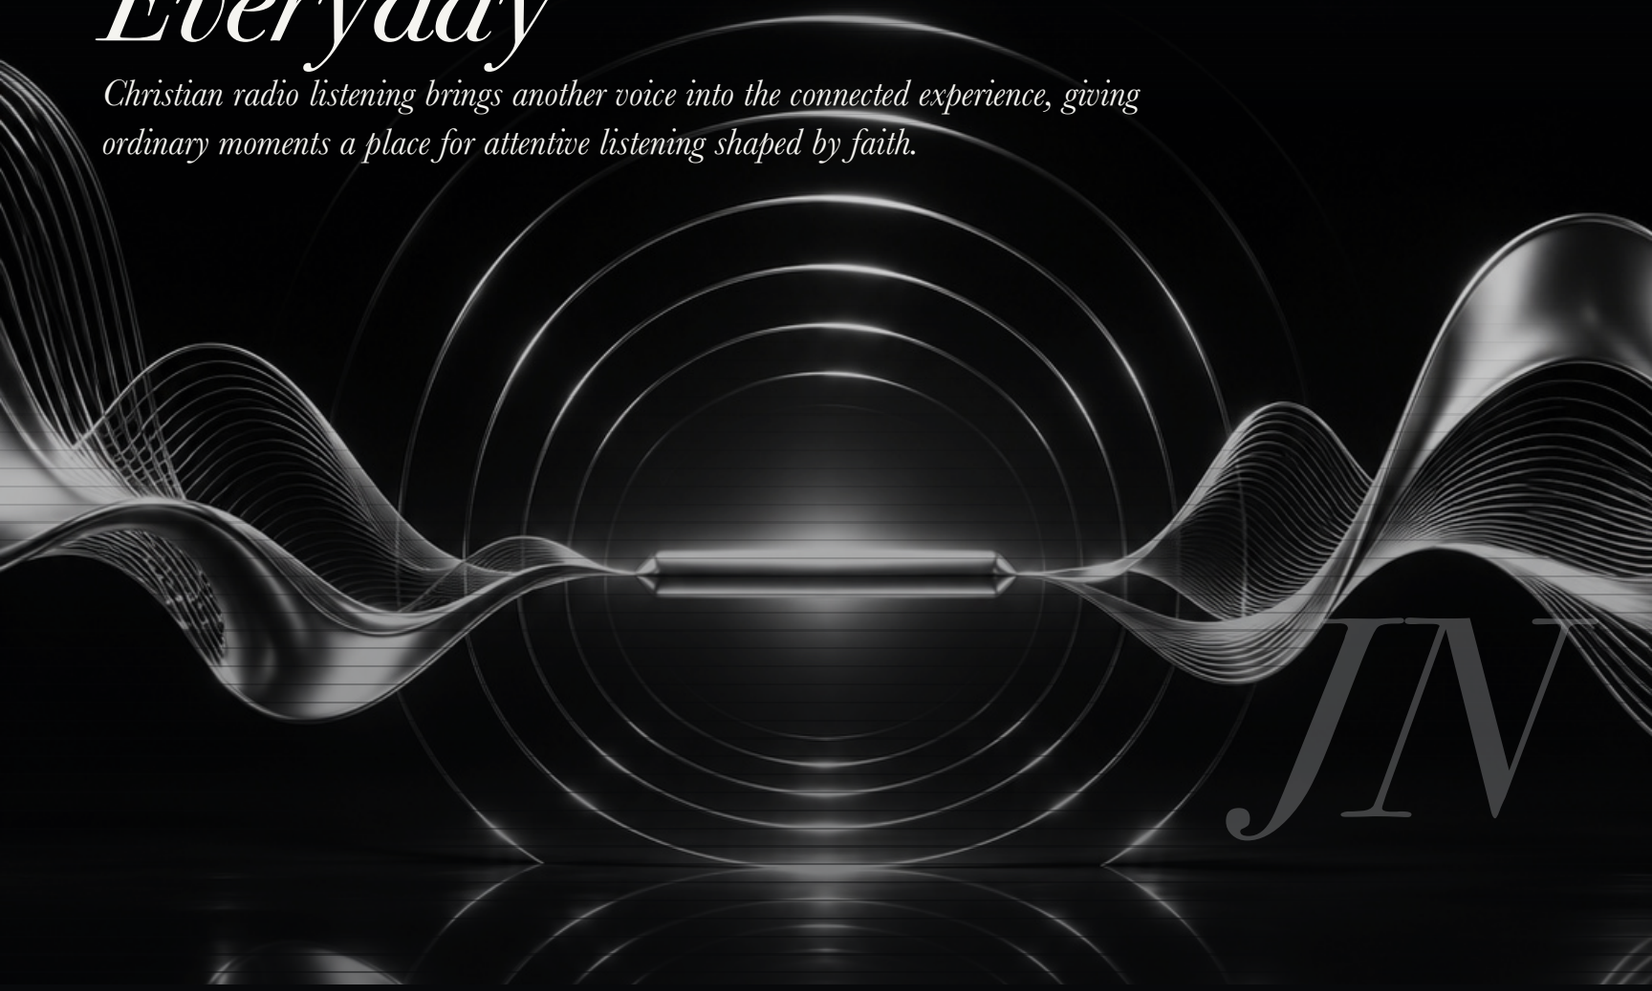

Eligible milestone rewards

BEGIN HERE Choose one verse in Remember That Verse and complete a practice before reading it once more for meaning.

JESUS NEW RADIO

Let Faith Accompany the Everyday

Christian radio listening brings another voice into the connected experience, giving ordinary moments a place for attentive listening shaped by faith.

Some parts of the day make room for listening in a way they do not make room for reading. Jesus New Radio brings Christian radio into the connected experience of your phone. Open the listening experience when you want faith-centered audio to be part of the moment. A simple choice creates another way to spend your attention.

Radio offers the character of something unfolding as you listen. You can give it a dedicated pause or make room for it during an undemanding part of the day. Choose a comfortable volume and attend to what interests you. Within Jesus New, the service gives Christian listening an accessible place beside study, reflection and daily life.

Christian radio listening

Within the connected experience

Faith in everyday moments

BEGIN HERE Open Jesus New Radio and begin a listening session at a comfortable volume during a quiet moment.

A course gives lasting curiosity a useful direction.

UNIVERSITY / SCHOOL OF SOLOMON

Give Curiosity a Course to Follow

Courses, books, audio and Professor Solomon support a structured learning experience, with exams, progression and bookmarks keeping your studies moving forward.

Curiosity becomes a practice when you give it structure. University, the School of Solomon, brings a degree catalog, courses, materials, books and audio into a connected learning experience. Explore the available studies and choose a subject worth your sustained attention. Financial education offers another practical dimension, while Professor Solomon provides a conversational presence within your learning.

Exams and progression give the work a sequence, and bookmarks help you return to material you want to revisit. Consider the course, engage with its resources and make time to examine what you are learning. Within a faith-centered phone, education becomes a continuing invitation to develop understanding and bring greater thought to the responsibilities of your life.

Courses and learning materials

Exams and progression

Professor Solomon

BEGIN HERE Browse the University catalog, open one course and bookmark a resource you want to study next.

SCIENCE CENTER

Wonder Begins Beneath the Surface

Enter a quieter frontier of discovery, where microscopic exploration and saved experiences give curiosity somewhere thoughtful to return.

A great journey can begin at a scale the eye cannot see. Science Center brings microscopic exploration into the personal Jesus New experience, creating a place to approach small things with attention. Cells, environments and the questions they awaken become reasons to slow down, look closer and appreciate the complexity of creation.

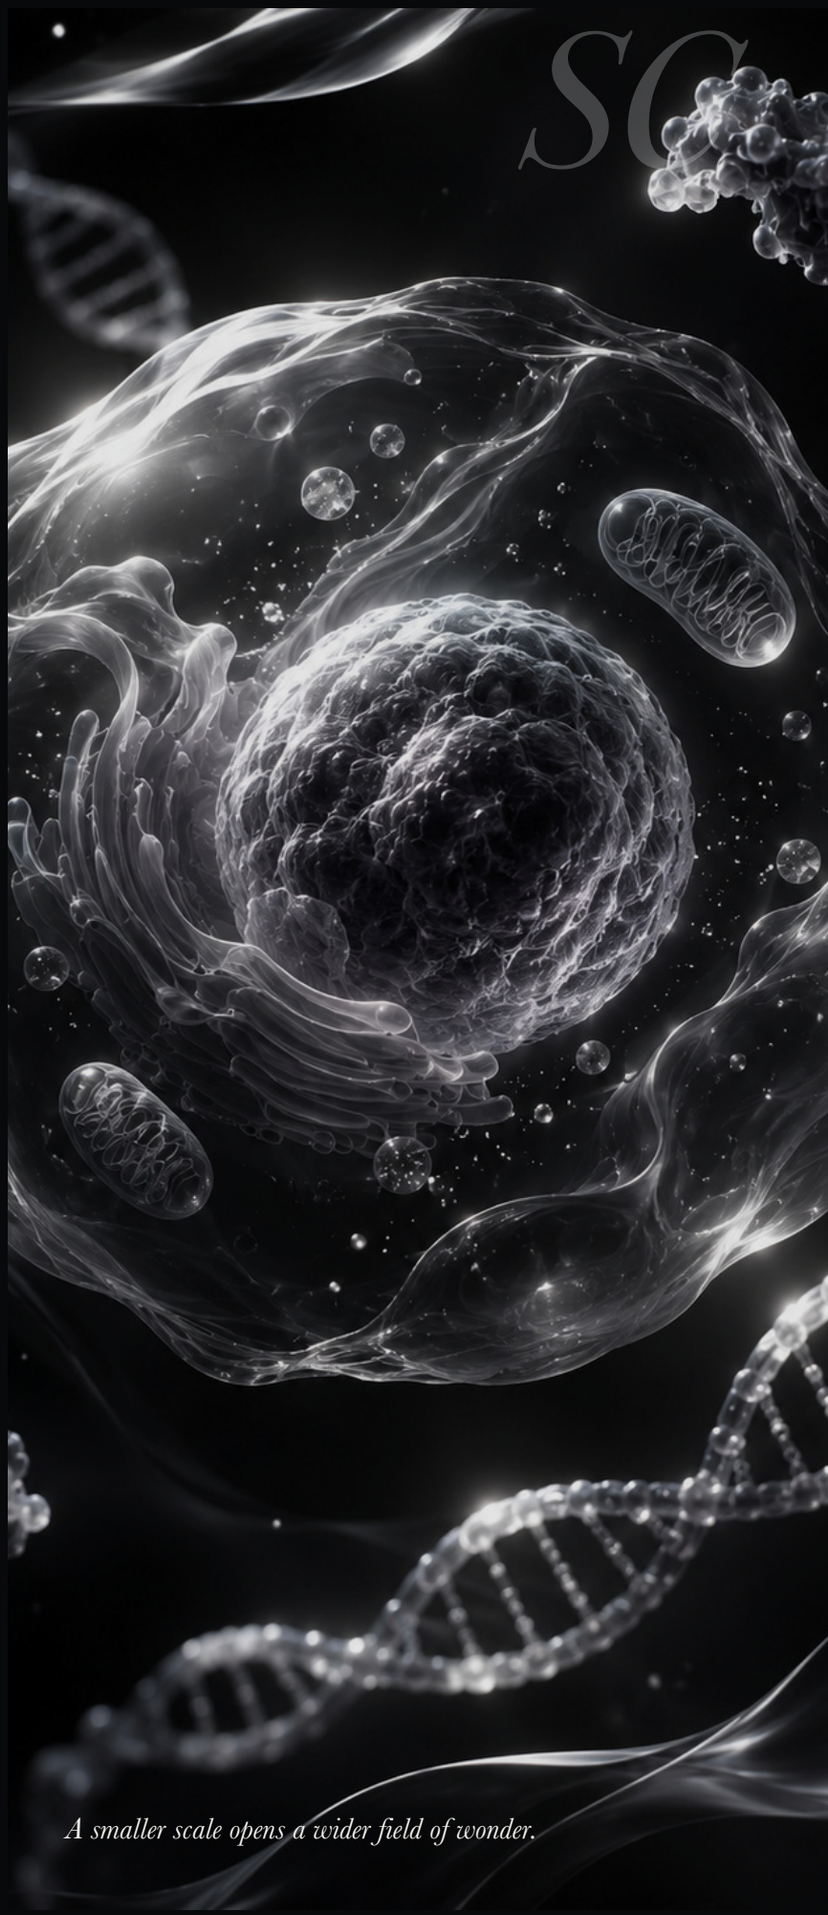

Its saved experiences give research a sense of continuity. Return to an earlier exploration, remember what interested you and decide which question deserves another look. The pleasure is in patient discovery: a personal encounter with ideas that can be examined again, carried further and held with the humility good inquiry requires.

01 Microscopic exploration

02 Saved experiences

03 Thoughtful research

BEGIN HERE
Open Science Center and revisit one saved exploration.

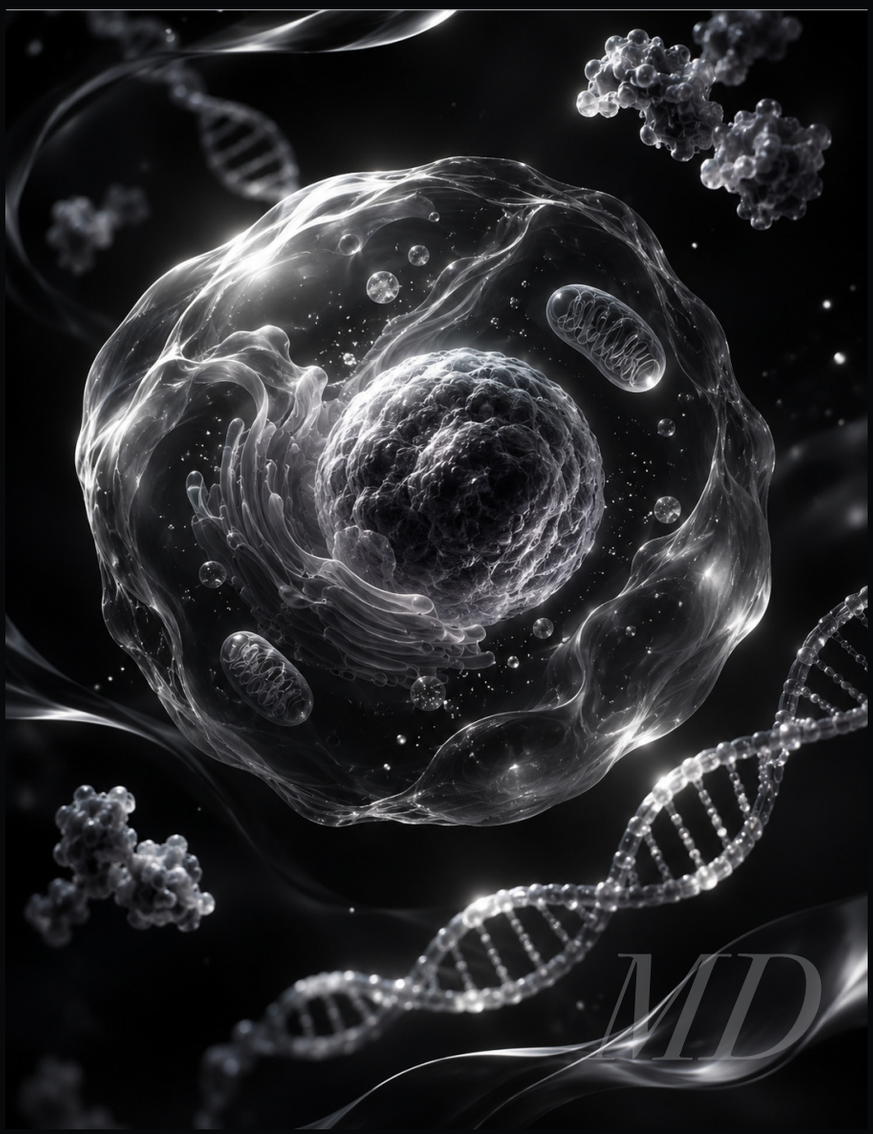

A smaller scale opens a wider field of wonder.

MICRO 3D

Small Worlds, Serious Curiosity

Choose a cell, microbe or molecule, then explore modeled environments and the questions that emerge from each encounter.

Micro 3D invites you into the scale of cells, microbes and molecules. Select a subject, model its environment and explore the resulting reports. It is an approach to learning that gives the question room to develop: what changes, what stays recognizable and what might deserve closer investigation?

Communicate offers another way into the subject, while the accumulated Brain lets you query material gathered through exploration. These are tools for examining modeled ideas and their explanations. Bring curiosity, compare what you read and keep the distinction between a simulation and an observed biological result clear. Wonder gains depth when imagination travels with careful questions.

Explore the intricate possibilities inside the very small.

Cells and molecules

Modeled environments

Accumulated Brain

BEGIN HERE Select one molecule and explore its report in a modeled environment.

CURES

Keep the Baseline in View

Compare modeled environments with a preserved starting point, keeping research hypotheses and the evidence they need clearly visible.

A useful research question needs something stable to compare against. Cures preserves a baseline, then places eight additional modeled environments beside it. That structure gives an exploration a reference point: a way to consider differences without losing sight of where the inquiry began. Each comparison can sharpen the next question.

The retained synthesis gathers existing approaches, research hypotheses and the evidence still needed. Its proposals remain hypotheses for investigation, not established cures or treatment instructions. For a faith centered life, compassion and intellectual care belong together. This workspace gives curiosity a disciplined form while leaving medical decisions with qualified professionals and the people receiving care.

Preserved baseline

Eight modeled comparisons

Explicit research hypotheses

BEGIN HERE Review a saved synthesis and identify one stated evidence gap.

UNI·VERSE

Let Your Questions Travel Further

Move from planets to galaxies through exploration, comparison and imagined journeys that invite a larger view of creation.

There is a particular freedom in changing scale. Uni·verse lets you explore planets, stars, galaxies and the cosmos, orbiting and zooming as your attention moves outward. Explore, Adventure and Challenge offer different entrances to the same vast subject. Across time, Compare and Think bigger encourage you to reconsider the view rather than settle for the first impression.

Any conversational voice or interpretation here is a speculative AI perspective, not an actual celestial person speaking. Hold that imaginative frame as you travel. The experience can stir questions about distance, time and creation while leaving room for awe: an invitation to look beyond the familiar and return with fresh attention.

Orbit and zoom

Across time and Compare

Explore, Adventure, Challenge

BEGIN HERE Choose a planet and use Compare to examine another perspective.

WI-FINANCIAL

Give Every Thesis a Closer Look

Bring market lookup, charts and sourced analysis together in a research workspace that keeps assumptions and uncertainty within sight.

An asset deserves more than a passing glance. wi-financial brings market lookup, charts, research rankings and Fibonacci evidence into one place. Move between projected increase and historical hits, then examine the evidence behind an individual candidate. The experience encourages a slower, more deliberate relationship with a financial idea.

Financial Summaries organize strengths, weaknesses, risks and unknowns. The Investors' Table adds framework based perspectives, while formula analysis opens another layer of inquiry. Save assets and reports to your Portfolio to revisit the original research snapshot. These are educational tools with dated inputs and limits, giving personal stewardship a place for questions before conclusions.

01 Charts and Fibonacci evidence

02 Summaries and formula analysis

03 Saved research Portfolio

BEGIN HERE
Open an asset and read its risks and evidence dates.

A considered financial question begins with the underlying evidence.

DASH CASH

Make Room in the Household Budget

Review everyday spending with your household in view, then compare sourced alternatives and preserve the possibilities worth considering.

Small commitments accumulate into the shape of a household budget. Dash Cash gives bills, subscriptions, groceries, goodies and loans a common place for review. Add the details you know, connect spending with household members and set the location and preferences that matter. Your own circumstances provide the starting point for the search.

A savings review places entered items beside sourced alternatives, including relevant conditions and tradeoffs. Select the comparisons you would consider and examine potential monthly, annual and first year savings. Save the report, copy it or return to unfinished items later. The result is a practical conversation about stewardship, with every decision still yours to make.

Everyday spending deserves a thoughtful second look at home.

Household spending review

Sourced alternatives

Saved savings reports

BEGIN HERE Add one recurring subscription and start a savings review.

SKEDADDLE

Set the Weight Down Here

Start with everything on your mind, then let connected resources help shape a report you can revisit and act upon.

Some days arrive as an untidy collection of unfinished thoughts. Skedaddle begins there. Write what is bothering you, confusing you or waiting for attention, without making it presentable first. The notebook gives those thoughts a place outside your head before the work of sorting them begins.

When you create a report, relevant text goes to selected connected services, bringing their contributions into a personal response. Saved runs preserve the report, its evidence and suggested next steps, including links into useful apps and learning topics. Return when you have the attention for another step. It is a humane way to approach a crowded day with prayerful intention and practical movement.

Mind unloading notebook

Connected resource reports

Evidence and next steps

BEGIN HERE Write one unfinished concern and create a personal report.

A local possibility becomes a date, then a memory.

SWERVE / SWURF

Make Room for a Memory

Discover experiences around your interests and budget, then carry a possibility from first consideration to a memory worth keeping.

A new experience does not have to begin far from home. Swerve uses your interests, area and budget to help you discover possibilities nearby. A meal, a place or a change in routine can become an occasion for attention. Switch It Up brings a specific event or an ongoing issue into that search for a different next experience.

Keep an idea in Consider, commit when you are ready and give it a date. Calendar links connect the intention with your day, while notes and saved memories preserve what followed. This is discovery with a personal rhythm: space for friendship, gratitude and the small adventures that give ordinary life its texture.

Personalized local discovery

Consider and Commit

Notes and saved memories

BEGIN HERE Set your area and budget, then consider one suggested experience.

TRAVEL

Give the Journey Its Own Space

Step from local discovery into a separate planning workspace, giving a possible trip the attention its larger questions deserve.

Some possibilities stretch beyond an afternoon. Travel gives trip planning a separate workspace, linked from Swerve when your curiosity is ready to go further. The change of setting matters: a journey can ask different questions from a local outing, and it deserves a place where you can consider those questions together.

Begin with the trip you have in mind and use the workspace to develop it at your own pace. Keep your personal priorities close, whether they involve time with loved ones, rest or the desire to see somewhere new. The first useful outcome may simply be a clearer idea of the journey you would like to make.

01 Dedicated trip workspace

02 Linked from Swerve

03 Space to develop plans

BEGIN HERE
Open Travel from Swerve and begin with one destination idea.

Let a possible journey become a considered personal plan.

JOBS

Your Next Opportunity Deserves Attention

Search nearby or remote roles, revisit saved searches and bring a prepared résumé profile to the opportunities you choose.

Looking for work is both practical and deeply personal. Jobs gives the search a clear starting point with ZIP code, radius and keyword preferences, alongside a remote only option. Open the details of a role, consider its fit and move through further results when the first page does not hold what you need.

Your application profile and résumé give preparation a dedicated place. Search history lets you return to earlier searches without rebuilding the question each time. When an opportunity deserves action, the application handoff opens its website. The workspace supports a measured search for work that can serve your responsibilities, abilities and hopes for the next season.

Preparation and a focused search can open another door.

Nearby and remote search

Résumé application profile

Saved search history

BEGIN HERE Search one job title near your ZIP code and read a role’s details.

JESUS NEW MAPS

Find the Place, Remember Its Meaning

Search destinations, plan and save routes, and leave room for prayer in the places that become part of your life.

A destination is more than a point on a screen. Jesus New Maps helps you search for an address or place, choose a starting point and examine route instructions. Save a place with a name that means something to you, or preserve directions for a journey you expect to make again.

The invitation to pray over or bless a selected place adds another dimension to arrival. A workplace, a home or an unfamiliar neighborhood can become a prompt for care and attention. Practical directions and personal meaning share the same map, helping you think about where you are going and how you would like to be present when you get there.

Destination and route search

Saved places and directions

Place prayers and blessings

BEGIN HERE Save a meaningful place and give it a recognizable name.

A useful local search begins with a clear intention.

CRAIGSLIST

Look Closer to Home

Explore local listings through the browser, using search controls and saved searches to keep a practical question within reach.

The answer to an everyday need may be nearby. Craigslist brings local listings into the browsing experience, with search controls to help you focus on what you came to find. Start with a clear question and give the results enough attention to distinguish a promising listing from a passing distraction.

Saved searches make it possible to return to the same interest over time. A useful search does not need to be rebuilt from memory every visit. Keep your criteria practical, read each listing carefully and take the next step only when its details make sense to you. Local discovery works best when curiosity travels with patient personal judgment.

Local listing discovery

Search controls

Saved searches

BEGIN HERE Create a focused local search and save it for a later visit.

SURFER

Follow Curiosity With Some Direction

Browse the web, search for a specific answer and discover websites selected around the interests that make your world personal.

A browser can be an instrument for purposeful curiosity. Surfer lets you search the web and open the sites you want to explore, while discovery around personal interests offers another starting point. Go directly to a question or allow something relevant to catch your attention. Both can become a worthwhile use of a quiet moment.

The important part is what you bring to the journey: a subject you care about, a question worth checking or a new corner of the world to understand. Read with discernment and follow sources that earn your confidence. Surfer gives that movement a familiar place within the wider Jesus New experience.

01 Web browsing

02 Direct search

03 Interest led discovery

BEGIN HERE
Search a subject you care about and open a relevant source.

Give your next web journey a question worth following.

CALENDAR

Give Your Intentions a Time

Shape days and months with appointments, then share selected plans while keeping personal contingency notes within your own care.

A plan begins to feel real when it has a place in the day. Calendar lets you move between days and months, add appointment names and times, and return to edit them as circumstances change. It gives the coming week a visible shape without asking you to hold every commitment in memory.

Selected appointment sharing brings trusted friends into the plans they need to see. Names and times can be shared while contingency notes stay private. Local appointments can also be imported into the connected calendar where supported. Make space for work, worship, friendship and rest with a schedule that reflects the life you are trying to live.

A meaningful commitment deserves room in the coming day.

Day and month views

Editable appointments

Selected friend sharing

BEGIN HERE Add one appointment with a clear name and a realistic time.

JOURNAL

A Private Place for Honest Words

Write, save and revisit your own reflections in a protected journal, with entry history and locking close at hand.

There are thoughts that become clearer only after they are written. Journal offers a protected place for those words, whether they arrive as a brief observation, a prayer or a longer account of the day. Save an entry when it says enough, and return to edit it when you understand something more.

A four digit code and a direct locking control support the privacy of the workspace. Saved entries and history let you revisit earlier seasons in your own language. Give yourself permission to write plainly. A personal journal does not need a performance; it needs the honesty to record what you noticed and the patience to hear yourself think.

Protected personal writing

Saved entry history

Immediate locking

BEGIN HERE Unlock Journal, write a short reflection and lock it when finished.

Small details find a practical home for the day.

NOTEBOOK

Keep the Day Within Reach

Bring notes, reminders, weather and appearance tools into a practical notebook for the small details that support daily life.

A well considered day depends on more than its largest decisions. Notebook gathers Notes, Reminders, Weather and Appearance tools into a practical workspace for the details around them. Capture a thought while it is fresh, give a future task a reminder or look at the weather before deciding how the day will unfold.

Its range is useful precisely because everyday attention moves between different kinds of need. A note may hold a shopping idea, a reminder may protect an important promise, and a visual choice may make the space feel more personal. Keep the essentials close and let this modest collection support the responsibilities and pleasures already in your life.

Notes and Reminders

Weather tools

Appearance choices

BEGIN HERE Open Notes and capture one detail you want to remember today.

CALCULATOR

A Clear Space for the Numbers

Open a dedicated calculation utility when an everyday decision needs arithmetic, giving the figures a moment of focused attention.

There is quiet value in a tool with a clear purpose. Calculator provides a dedicated place for calculation within the Jesus New experience. When a number matters to the next decision, bring it here and work through the arithmetic with the attention it deserves. A brief calculation can turn a vague impression into something easier to assess.

Use it for the ordinary figures that accompany daily life, then carry the result back to the task in front of you. Thoughtful stewardship often includes these small acts of checking. The utility keeps that moment straightforward: enter the numbers, consider the result and decide how it informs your next step.

01 Dedicated calculation utility

02 Focused number work

03 Everyday arithmetic

BEGIN HERE
Calculate the total of two everyday costs you are comparing.

A moment with the numbers can clarify the decision.

JESUS NEW MAIL

Your Words, Ready to Travel

Activate and connect a Christic Mail mailbox, then compose messages and keep useful attachments within the connected mail workspace.

Careful words help everyday correspondence carry its purpose well.

Email carries much of the ordinary work of a life: an introduction, an answer, a document someone needs. Jesus New Mail brings Christic Mail mailbox activation and connection into a dedicated path, followed by a workspace for composing and sending. It gives your correspondence a place within the broader Jesus New experience.

Write with a clear purpose, review the recipient and include the material the conversation requires. Attachment saving helps preserve useful files that arrive with a message. The feature is practical, but the human intention remains central. A careful email can make a promise understandable, show consideration for another person and move shared work forward with grace.

Mailbox activation and connection

Compose and send

Save received attachments

BEGIN HERE Open your connected mailbox and compose a clear, unsent practice draft.

GMAIL WORKSPACE

Bring the Conversation Into Focus

Read and search connected mail, compose thoughtful replies and handle attachments while keeping the continuity of a draft within reach.

An inbox contains more than new messages. It holds ongoing conversations, reference material and work waiting for a considered reply. Gmail Workspace brings connected folders, search and message reading into the phone experience, with composing, replies and forwarding close to the thread. Cc and Bcc support the moments when a message needs a more deliberate audience.

Attachments can travel with a draft, and received files can be revisited through the supported file workflow. Draft recovery helps retain writing during reconnection. Take a moment to read what came before and review what you intend to send. Good communication often rests on this ordinary care for context, detail and the person receiving it.

Folders and mail search

Replies, forwarding, Cc/Bcc

Attachments and draft recovery

BEGIN HERE Search for a familiar message and read its conversation before drafting a reply.

A familiar voice can change the shape of a day.

PHONE

Make Room for a Real Voice

Use the supported voice over IP service to place a call, giving a conversation the immediacy of hearing another person.

Some conversations deserve the sound of a familiar voice. Phone provides voice over IP calling through the supported service, giving live conversation a dedicated place in the device experience. When the service is connected and available, a call can bring an immediate human presence to something that might otherwise remain a line of text.

Choose a good moment, think about what you want to say and make room to listen. A check in, a practical question or a conversation with someone you care about can carry its own quiet importance. The technology provides the connection; your attention gives that time its value and makes another person feel heard.

Voice over IP calling

Supported phone service

Live voice conversation

BEGIN HERE Open Phone and review the supported calling service’s connection state.

MESSAGES

A Place for the Next Word

Open the phone's dedicated messaging workspace when a short conversation needs a clear, familiar place within your daily rhythm.

A brief message can hold a surprising amount of care. It may acknowledge someone, settle a small detail or keep a conversation moving through a busy day. Messages gives phone messaging a dedicated workspace, making room for this everyday form of connection within the wider device experience.

Bring a clear intention to the conversation. Read the context, choose words that mean what you intend and give the other person room to respond in their own time. The value of a message often lies in its simplicity: a considerate sentence at the right moment. This familiar part of the phone supports the small exchanges through which relationships and responsibilities continue.

01 Dedicated messaging workspace

02 Everyday phone conversations

03 A focused place to respond

BEGIN HERE
Open Messages and review an existing conversation for its current context.

A short message can carry a thoughtful human presence.

JESUS ONLINE

Find Your Place in the Conversation

Move between community rooms and personal connections, with familiar people, recent conversations and shared material gathered in Jesus Online.

Community takes shape through repeated encounters. Jesus Online brings conversations, direct messages and chat rooms into a connected social space, with Jesus World and Trending Rooms offering ways to explore what is happening. Recent Chats helps you return to conversations already underway rather than begin every visit from the outside.

The Cuddy List and profiles give personal connections a recognizable home, while Dropbox supports shared material within the experience. Choose a room with care, listen to its conversation and contribute something that serves the people there. A faith centered community becomes meaningful through these human acts: showing up, remembering one another and making space for a voice beyond your own.

Community grows through the care brought to each conversation.

Rooms and direct messages

Cuddy List and profiles

Recent Chats and Dropbox

BEGIN HERE Open a community room and read the current conversation before contributing.

COMMUNITY COMMUNICATION

Let Connection Take Another Form

Bring prayer, animation, shared material and touch into supported conversations, giving familiar connections more than one way to speak.

Words are only one part of how people acknowledge each other. Community Communication brings Prayer Share and Prayer Mode alongside animated emojis, AirDrop sharing and Echo touch or haptic messages. Each offers a different gesture within the supported experience, from a prayerful expression to the simple liveliness of an animation.

Choose the form that suits the person and the moment. A shared prayer can invite attention, an item can give a conversation something concrete, and a brief Echo can offer a tactile expression of connection. These tools work best when they carry a clear human intention. Use them with the consideration you would bring to the same person across a table.

Prayer Share and Prayer Mode

Animated emojis and AirDrop

Echo touch and haptics

BEGIN HERE Open Prayer Share and review how a prayer is prepared for sharing.

A visible milestone can mark a worthwhile stretch of effort.

REWARDS

See the Progress You Have Made

Follow Rings, eligible activity rewards, packages and levels in a dedicated view of participation across the connected experience.

Progress can become easier to recognize when it has a visible record. Rewards brings Rings, eligible activity rewards, reward packages and levels into the connected experience. It gives qualifying participation a place to appear, letting you review what is available and understand the progression shown for your account.

Let that record support the activities you already find worthwhile. The deeper value of learning, practice and community remains in the activity itself; a reward can add a small moment of recognition along the way. Review eligibility and the details attached to each package before deciding what to do next. A considered pace leaves room to enjoy both the effort and its visible milestones.

Rings and eligible activities

Reward packages

Reward level progression

BEGIN HERE Open Rewards and review the eligibility details for one activity.

STORE

Choose Something That Feels Personal

Browse digital items in the connected Store and review supported Ring purchases with the same care you bring to any choice.

A digital collection can carry its own sense of taste and personality. Store gives you a place to browse available items and consider supported purchases with Rings. Take time to look at what an item offers and whether it belongs in the collection you would like to build.

There is no need to make a choice simply because something is available. Let curiosity lead the visit and let personal judgment finish it. Review the item and its displayed purchase details before deciding. Within the wider experience, Store turns earned or available Rings into a particular selection, making the next addition a deliberate expression of what interests you.

01 Browse digital items

02 Supported Ring purchases

03 Considered personal selection

BEGIN HERE
Open a digital item and review its details and Ring price.

A considered choice gives a collection its personal character.

INVENTORY

A Collection With Your Name On It

Return to owned digital items in a dedicated Inventory, keeping the pieces you have gathered visible within the connected experience.

Choosing an item is one moment; returning to it is another. Inventory gives owned digital items a dedicated home, allowing you to keep and revisit the collection associated with your account. It makes the things you have gathered easier to recognize as your own part of the wider experience.

Spend a little time with the collection instead of moving immediately toward the next addition. Notice what drew you to an item and what still holds your attention. A personal inventory can become a record of interests and choices made over time. The pleasure is in having somewhere to return, where the pieces already yours are present and ready to be seen again.

The collection you have gathered deserves another attentive look.

Owned digital items

A dedicated collection view

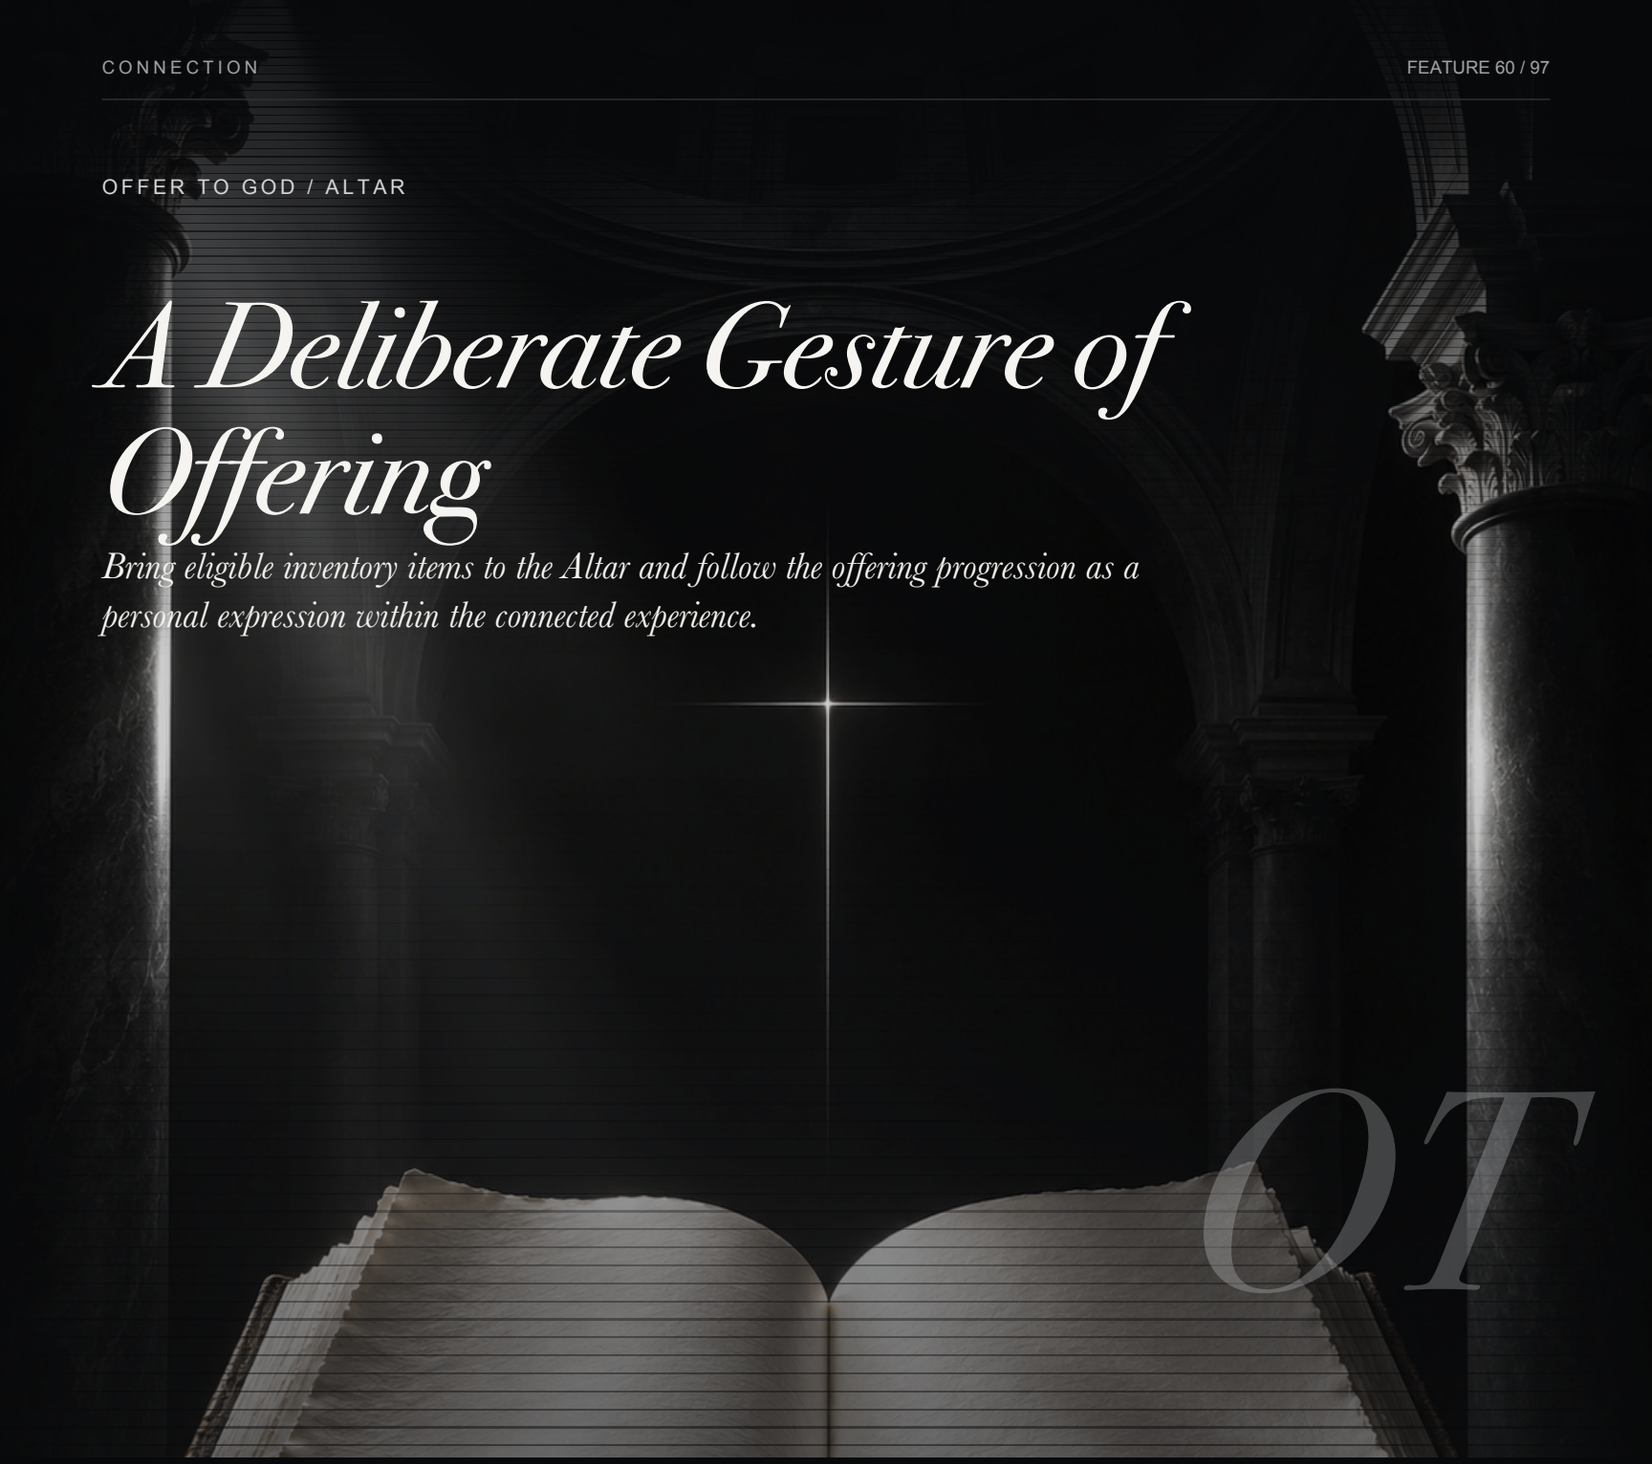

Return and revisit

BEGIN HERE Open Inventory and revisit one item you already own.

OFFER TO GOD / ALTAR

A Deliberate Gesture of Offering

Bring eligible inventory items to the Altar and follow the offering progression as a personal expression within the connected experience.

An offering begins with intention. Offer to God, also presented as the Altar, gives eligible inventory items a path into an offering experience. Review what is eligible, consider the item you are bringing and follow the progression shown within the app. The action is digital; the meaning you bring to it is personal.

Allow a moment for gratitude before proceeding. This can be a place to acknowledge what you have received and reflect on generosity as part of a life of faith. Offering levels record progression inside the experience. They do not measure a person's worth or standing before God; let the gesture remain thoughtful, voluntary and grounded in your own conscience.

Eligible inventory offerings

Dedicated Altar experience

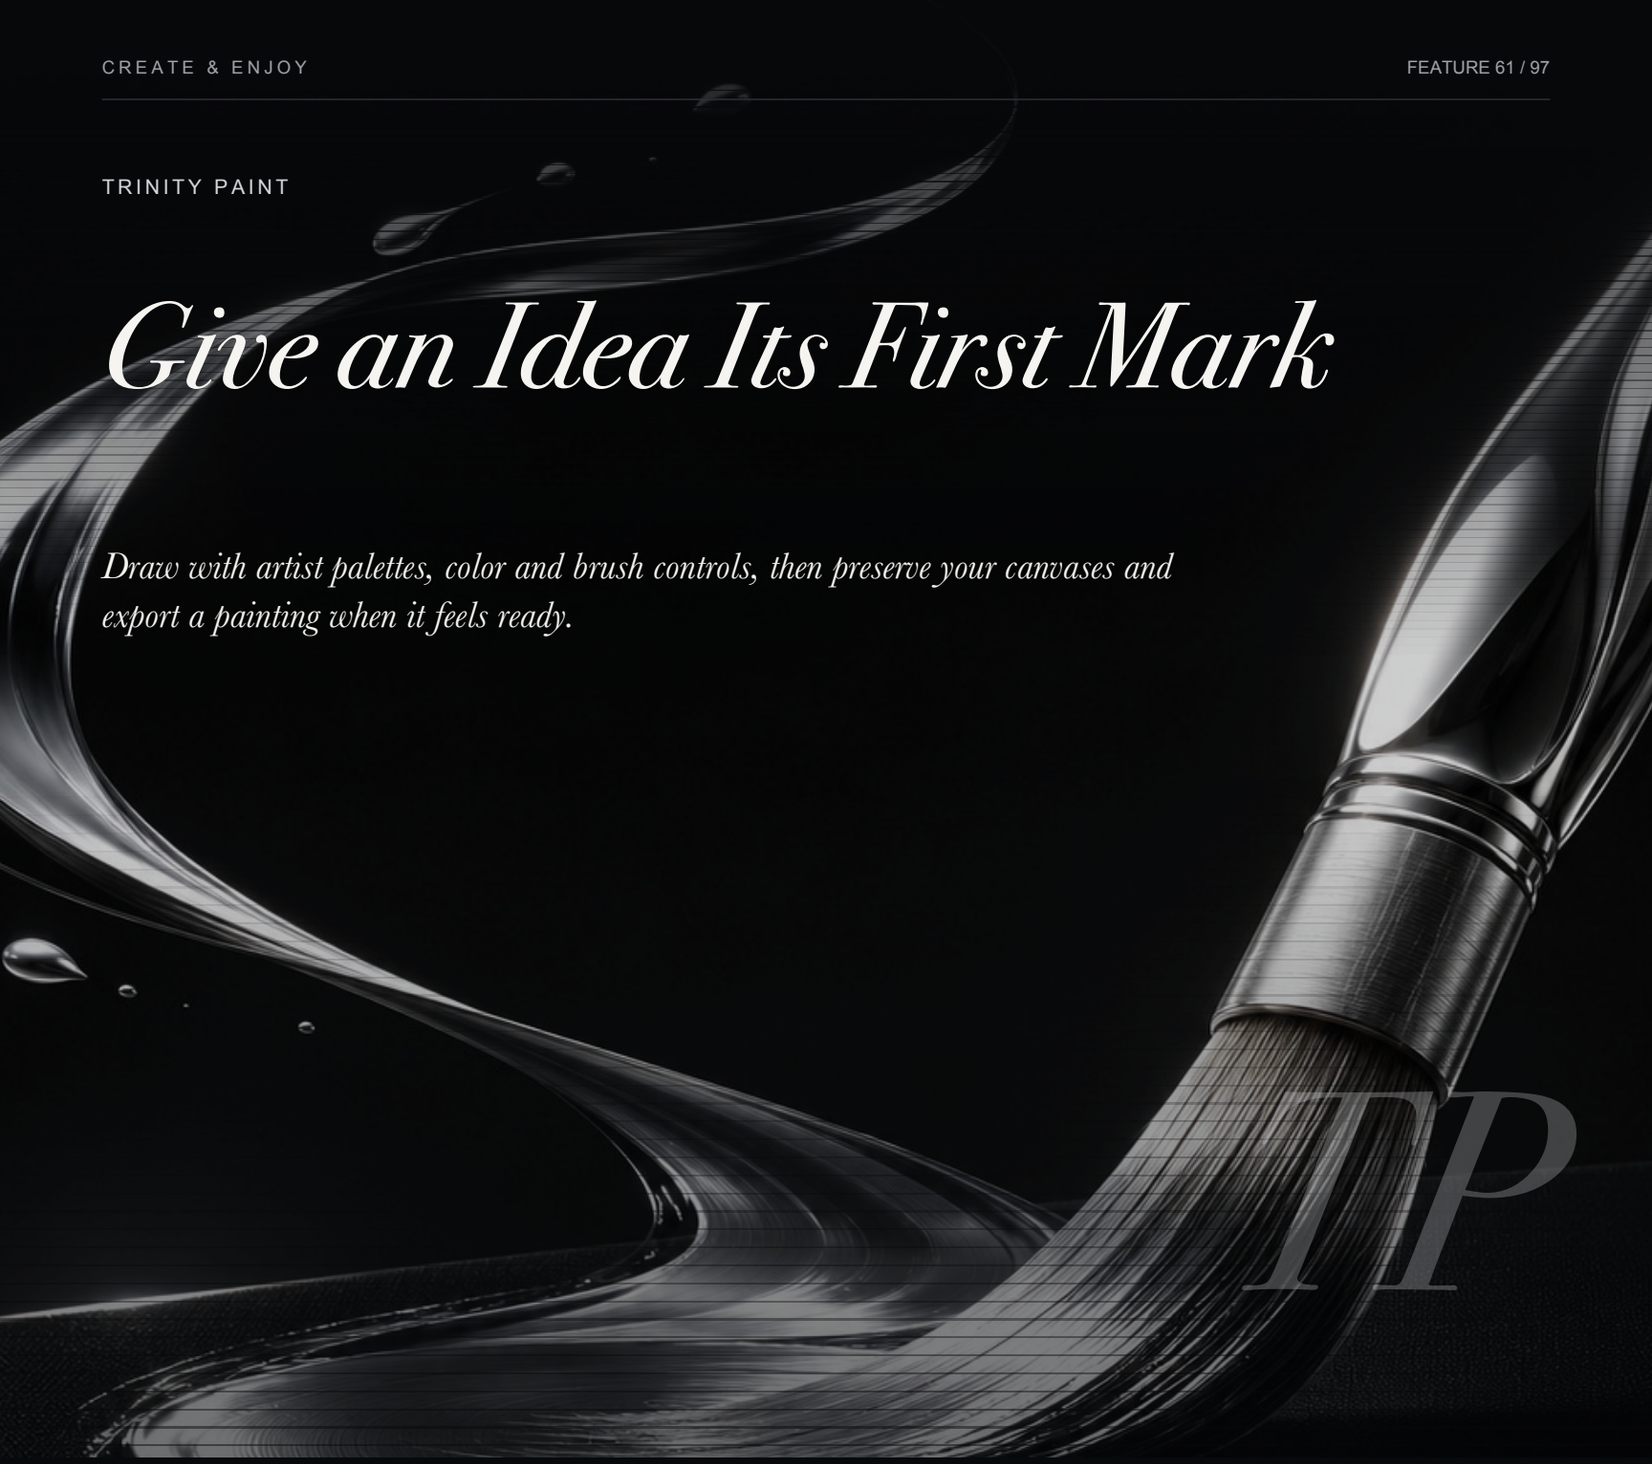

Offering level progression

BEGIN HERE Open the Altar and review eligibility before choosing an item.

TRINITY PAINT

Give an Idea Its First Mark

Draw with artist palettes, color and brush controls, then preserve your canvases and export a painting when it feels ready.

A blank canvas asks for only the first mark. Trinity Paint gives that beginning a set of creative tools: artist palettes, colors, brush controls and pressure support where available. Work with a light hand or a more deliberate stroke, then use undo and redo as the image finds its direction. The process can stay exploratory.

Canvases and MyPaintings provide a place to keep what you create. PNG export lets a finished or unfinished piece leave the workspace as an image. Bring a remembered landscape, an abstract pattern or a quiet response to the day. Art does not need a grand occasion; a little attention and a willingness to begin can be enough.

Palettes and brush controls

Undo, redo and canvases

MyPaintings and PNG export

BEGIN HERE Create a canvas and explore one brush with three colors.

POPCORN READS

Let a Story Take the Lead

Move from movie discovery and YouTube scanning into personalized Christian stories, then return to your collection for a longer read.

The desire for a good story can begin with a film, a search or a subject that stays in mind. Popcorn Reads brings movie discovery and search together with YouTube scanning, then offers personalized Christian story generation as another direction for that curiosity. It opens a route from discovering a narrative to spending time with one shaped for reading.

Your Stories keeps the resulting collection within reach, while the reader gives it room to unfold. Choose a moment when you can settle into the page and let the story develop at its own pace. Faith centered storytelling can create space for imagination, reflection and the simple pleasure of wondering what comes next.

01 Movie discovery and search

02 Personalized Christian stories

03 Your Stories and reading

BEGIN HERE
Open Your Stories and begin reading one saved story.

A little curiosity can become an evening with a story.

TRINITYTUBE

Turn Watching Into Something You Keep

Build short or long reading lessons from transcripts, then deepen the encounter through recall, reflection, discussion and personal notes.

A useful idea deserves more than a moment of attention. TrinityTube uses transcripts to create short or long reading lessons, giving spoken material another form you can move through deliberately. Choose the length that fits your time and let the lesson turn an encounter with content into an opportunity to examine what it says.

Recall and reflection encourage you to consider what remained with you. Discussion and notes give your own questions a place, while Saved tubes lets you return to material worth revisiting. Learning becomes personal through this act of response: noticing the point, testing your understanding and carrying one useful thought into the next part of your day.

An idea becomes useful when you give it another thought.

Transcript based reading lessons

Recall and reflection

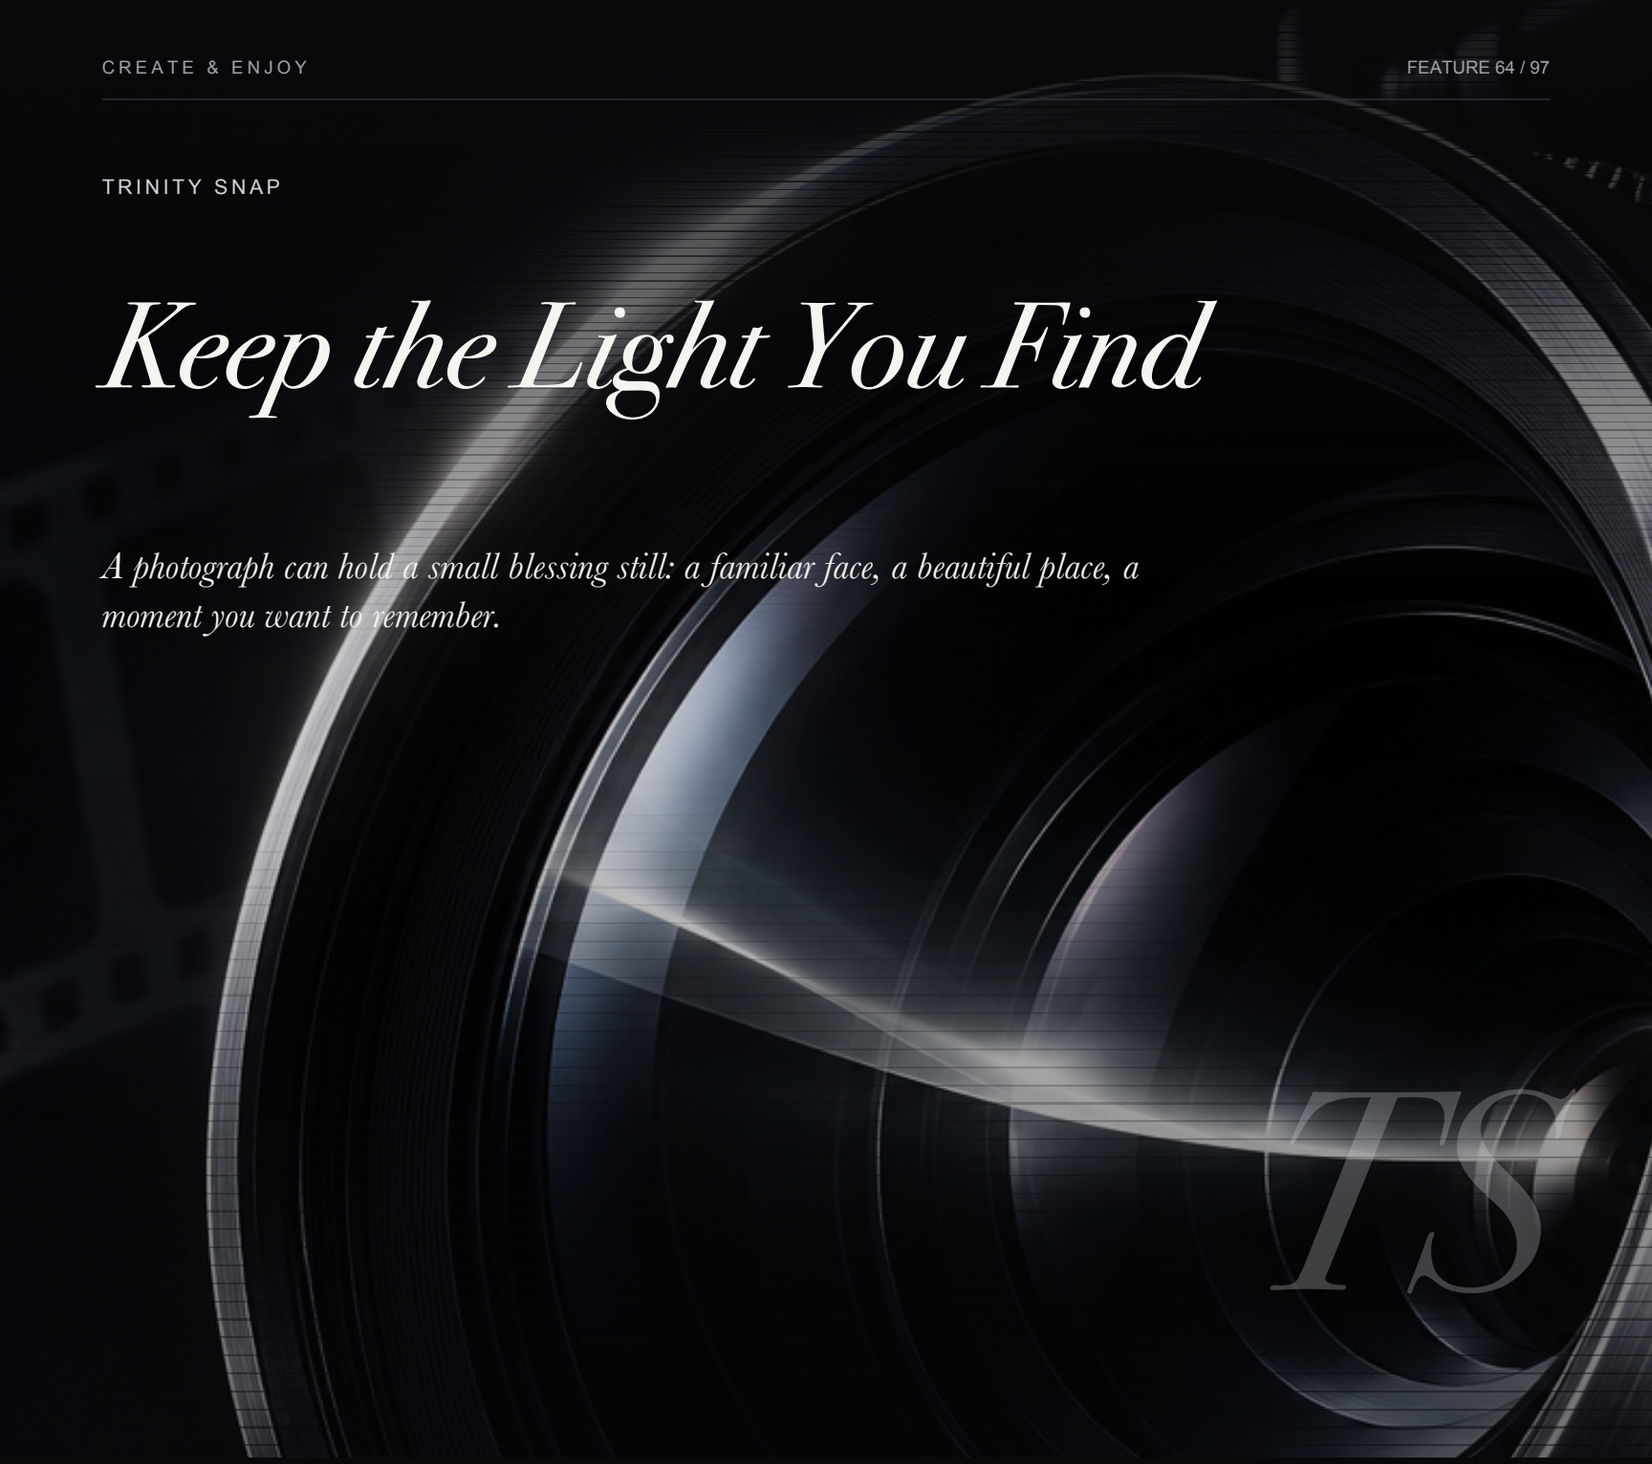

Saved tubes, discussion, notes

BEGIN HERE Open a saved tube and write one reflection after its lesson.

TRINITY SNAP

Keep the Light You Find

A photograph can hold a small blessing still: a familiar face, a beautiful place, a moment you want to remember.

Trinity Snap puts photography within the Jesus New experience. On supported camera hardware, open the camera and capture what is in front of you. The subject might be an ordinary breakfast, a family gathering or the quiet view at the end of a difficult day. Each gives you a reason to look closely.

Its place in the phone is practical and personal. You do not need an occasion grand enough for a formal portrait to make a picture worth keeping. Begin with something you appreciate, notice the light and choose your frame. The simplest photograph can become a reminder to be thankful.

Dedicated camera experience

Everyday photography

Supported phone hardware

BEGIN HERE Open Trinity Snap and photograph one thing you are grateful for today.

VIDEO

Let the Moment Keep Moving

Some memories belong in motion, with the gestures, rhythm and life that a single still frame cannot hold.

Video brings moving pictures into the phone's creative collection. On supported devices, use the dedicated recording experience to capture an event as it unfolds. A child's explanation, a short introduction or a scene from an afternoon together can have a character that depends on movement and sound.

Think of a recording as a small act of attention. Decide what the moment is about before you begin, hold your view steady and give the subject room to breathe. You can use the same simple approach for a personal memory or a useful demonstration. What matters is making something clear enough to revisit and meaningful enough to keep.

Dedicated video capture

Moving memories

Supported device cameras

BEGIN HERE Open Video and record a short introduction to something you made.

VOICE RECORDER

Give Your Thought a Voice

Catch an idea while it still sounds like you, with a dedicated place for spoken notes and audio recordings.

A useful thought does not always arrive when you are ready to type. Voice Recorder gives spoken ideas a place in your phone. Record a note, rehearse a few sentences or capture a reflection while its meaning is still fresh. The voice carries pauses and emphasis that can matter as much as the words.

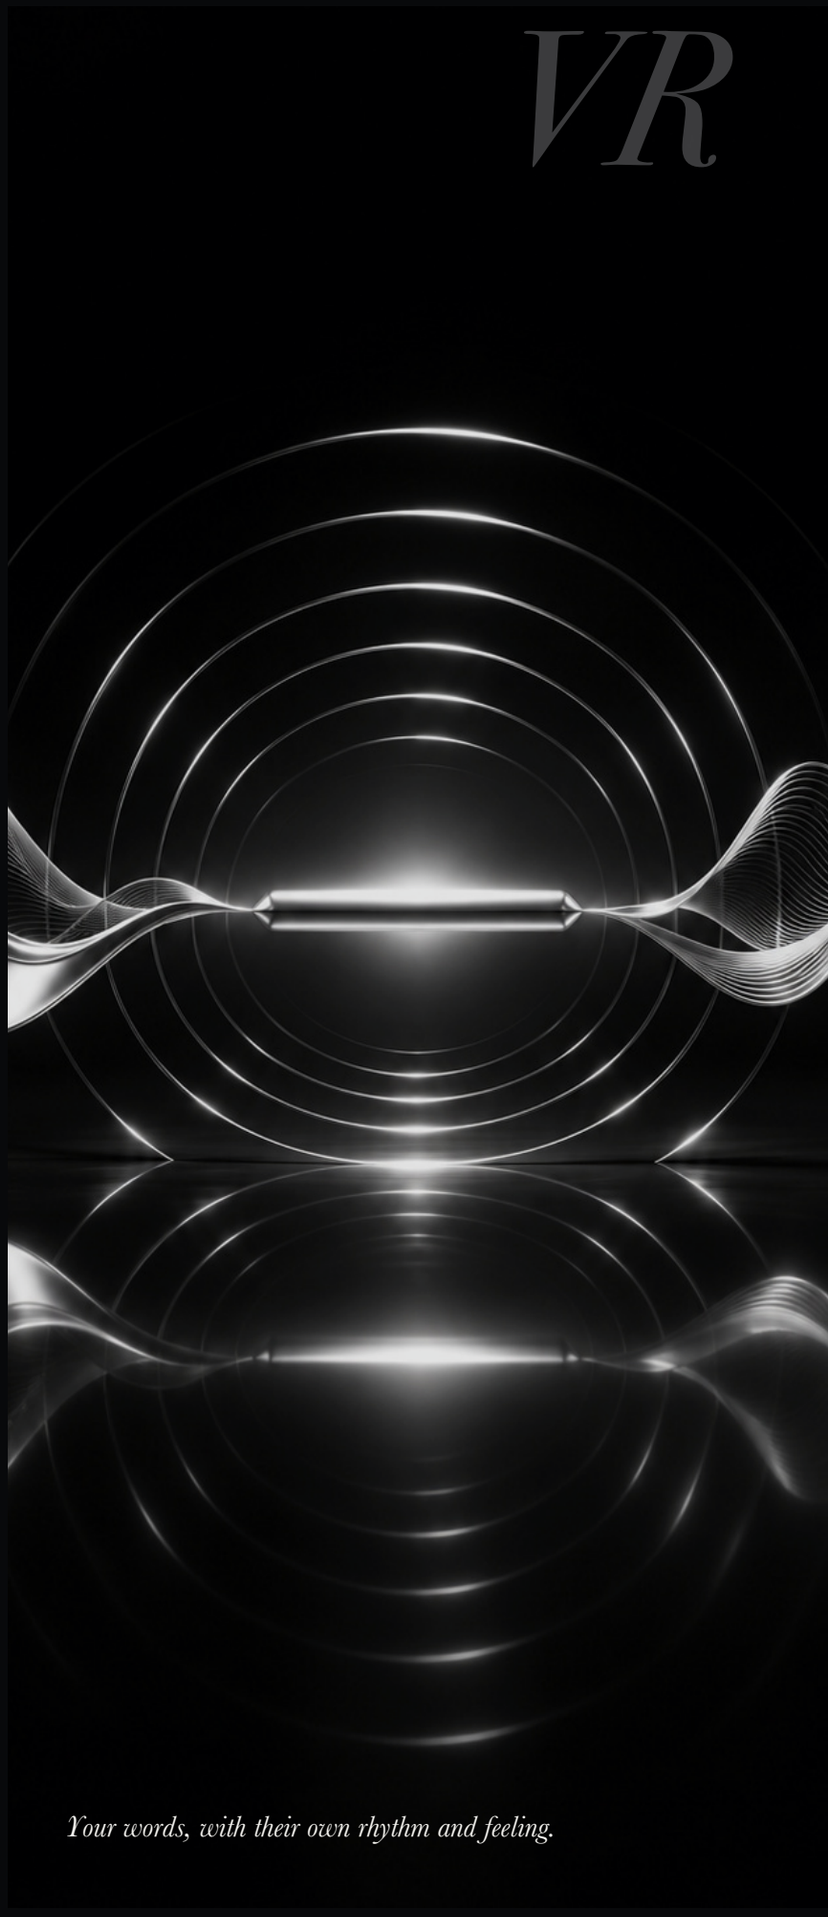

Make the recording as simple as the idea requires. Start by saying what the note is about, then speak naturally. It might be a reminder for your own work, a prayer you want to revisit or the beginning of a story. A brief recording can help you return to a thought with its original feeling intact.

01 Spoken idea capture

02 Dedicated audio recording

03 Personal reflections

BEGIN HERE
Open Voice Recorder and record a brief idea you want to return to.

Your words, with their own rhythm and feeling.

SCREEN RECORD

Show the Steps Clearly

Turn a supported screen presentation into an MP4 recording, so the sequence on your display becomes easier to revisit.

Some explanations become clearer when someone can see the steps. Screen Record captures supported screen presentations to MP4, giving you a way to preserve what happens on the display. A short walkthrough can show the order of an action with a clarity that a long description may struggle to match.

Choose a small subject and prepare the screen before you begin. Move through the sequence at a comfortable pace, keeping attention on the action that matters. For a personal reference, the recording can help you remember how you reached a useful result. For a demonstration, it gives your explanation a visible shape from beginning to end.

A clear sequence, ready to be seen again.

Screen presentation capture

MP4 recording

Visible sequences

BEGIN HERE Open Screen Record and capture a brief walkthrough of a nonprivate screen.

NEWS

A Place for Christian Perspective

Open the connected Christian news edition and make room in your day for attentive reading, perspective and reflection.

News gives the connected Christian news edition a dedicated place in the Jesus New experience. Open it when you want to read with your faith in view and consider the people, events and questions that reach beyond your own schedule. Good attention begins with taking the time to understand what a story actually says.

Build a reading rhythm that leaves room to think. Choose a story, follow its details and notice the questions you would like to explore further. You may find a subject for conversation, a reason to pray or something worth learning more about. The value of reading is also in what you carry thoughtfully into the rest of your day.

Christian news edition

Dedicated reading destination

Room for reflection

BEGIN HERE Open News and read one story from beginning to end.

Press play and give the moment your attention.

MEDIA PLAYER

Make Room to Listen

Bring audio and video into a dedicated playback experience, and give what you choose the attention it deserves.

Media Player provides a dedicated experience for playing audio and video. It belongs among the phone's everyday essentials: a place to return to a recording, watch a moving picture or listen without making the experience more complicated than the material requires. Sometimes the right choice is simply to press play and settle in.

Your media can serve different parts of the day. A recording might support a moment of reflection, a video might demonstrate an idea and a familiar piece of audio might mark a quiet break. Choose something that fits the time you have. A few attentive minutes can be more satisfying than letting something run at the edge of your awareness.

Audio playback

Video playback

Dedicated media experience

BEGIN HERE Open Media Player and play an audio or video item available to you.

YOUTUBE

Follow a Good Question

Search for a video, choose a useful starting point and watch within the phone's dedicated YouTube experience.

A good question can lead to a demonstration, a conversation or a new point of view. YouTube gives you video search and playback within the Jesus New experience. Begin with the subject you actually want to understand, then choose a video that looks relevant to that purpose.

There is something satisfying about watching an idea take shape. You might be exploring a craft, listening to a discussion or looking for a visual explanation of a familiar subject. Be deliberate about what you choose and how much time you give it. One carefully selected video can provide a useful place to begin, with room afterward to consider what you learned and what still needs a closer look.

01 Video search

02 Video playback

03 Purposeful discovery

BEGIN HERE
Open YouTube and search for a subject you want to understand better.

A question becomes a place to start watching.

FILES

Everything Needs Its Place

Work with local folders, Downloads, SD-card files and shared material through a dedicated home for the things you keep.

The creative work, useful documents and everyday material on a phone deserve a place you can understand. Files brings local files and folders into one dedicated workspace, including Downloads, SD-card files and shared material. It gives the practical side of your digital life the attention it needs.

Begin with something familiar: a downloaded document, a folder you use often or material stored on an SD card. Knowing where an item lives makes the next step easier, whether you are returning to a project or looking for something someone shared with you. Clear organization is a quiet kind of freedom. It gives you more attention for the work inside the files.

A considered place for the things you keep.

Local files and folders

Downloads and SD cards

Shared material

BEGIN HERE Open Files and locate a document in Downloads.

ORBS

Give Your Files an Orbit

Arrange material into named orbital collections, then search within an Orbit through Bublo when you need to find something.

Orbs offers a distinctive way to think about the material you keep. Named Orbits form collections around the files that belong together, giving a project or interest a recognizable home. You can search within an Orbit through Bublo, keeping the search connected to the collection you have chosen.

A collection can reflect the way your mind already groups things: a piece of work, an area of study or material for something you are planning. Choose a name that makes sense to you and use that Orbit as a point of return. The appeal is both visual and practical: your files can belong to a world with a clear purpose of its own.

Named orbital collections

Files grouped by purpose

Bublo search within Orbits

BEGIN HERE Open Orbs and explore the files in one of your named Orbits.

A considered destination for your connected digital material.

HELIX

A Thoughtful Home for Files

Protected cloud files and supported imports give your digital material another considered place within the Jesus New experience.

Helix brings protected cloud files and supported file imports into the Jesus New collection. Its purpose is practical: provide a place for cloud material and a supported way to bring files into that environment. For the user, the value begins with understanding where important material belongs and how to return to it.

Consider the files that support your work, reading or personal projects. A cloud destination can become one part of the way you organize those materials, alongside the local files you keep on your device. Open Helix with a clear task in mind and explore the file experience available to your account. A well chosen place makes the material easier to approach with intention.

Protected cloud files

Supported file imports

A dedicated cloud destination

BEGIN HERE Open Helix and review the files available to your account.

CLOUD FILES

Keep Connected Material Within Reach

Connected cloud storage and file actions sit within the phone's wider collection of tools for your digital life.

Cloud Files gives connected storage a place in your everyday file experience. Open the cloud material available through your connection and use the supported file actions for the task at hand. It complements the practical work of knowing what you have and where you can find it.

Think about a document you regularly return to or material that belongs to an ongoing project. The useful part of a connected file workspace is having a recognizable destination when that material matters again. Begin with one file and take a moment to understand the actions available for it. A small amount of attention to organization can make future work feel more orderly and deliberate.

01 Connected cloud storage

02 Supported file actions

03 A familiar file destination

BEGIN HERE
Open Cloud Files and inspect one file available through your connection.

Connected storage, with a clear place to begin.

TERMINAL

The Quiet Confidence of Control

Direct command-line access brings the precision of the supported Linux phone environment into a focused workspace of its own.

There is a particular elegance to a clear command and a clear response. Terminal gives you direct command-line access in the supported Linux phone environment. For users who know the tools they need, it provides a precise way to engage with that environment through text.

Its appeal is the attention it gives to intention. You choose what to ask the system, read what it returns and decide the next step. Start with a familiar read-only command and build your understanding from there. In a phone full of visual experiences, Terminal has its own character: spare, purposeful and ready for knowledgeable hands. It is a worthy place for the technical side of your curiosity.

Direct command-line access

Supported Linux environment

A focused technical workspace

BEGIN HERE Open Terminal and enter pwd to view the current working directory.

SPITTER

Aim Well. Save the Billions.

Circle a burning bank, direct the water spray and bring your attention to a wonderfully unusual rescue mission.

Spitter has a memorable assignment: circle the bank, aim the spray and save the billions. The scene gives the game a purpose you can understand immediately, then asks you to stay attentive as you direct the action. A strange little hero and a very large rescue make an appealing combination.

Enjoy the rhythm of watching, aiming and responding. The task is concrete enough to settle into, with the surrounding motion giving each adjustment a reason. It is a playful place to take a break from the day's heavier work. Step into the scene, get a feel for the spray and concentrate on the rescue in front of you. Those billions are counting on a steady aim.

Circle the bank

Aim the water spray

Save the billions

BEGIN HERE Open Games, choose Spitter and practice aiming the spray at the fire.

A playable journey through people, places and meaningful choices.

THE LIVING BIBLE — GAME

Step Into a Biblical Journey

Walk with Jesus, encounter biblical people and make choices within a branching game journey shaped around the world of Scripture.

The Living Bible invites you into a game journey where you walk with Jesus, meet biblical people and choose a path through branching encounters. It takes the form of a playable experience, giving the setting of Scripture a different kind of attention through movement, people and decisions.

Let curiosity guide your first steps. Notice who you meet and take time over the choices presented to you. The game can be a starting point for reflection or a reason to return to the biblical passages that interest you. Approach it as a creative journey alongside your reading, with room to wonder about the people and places that give the story its setting.

Biblical people and settings

A branching journey

Choices along the way

BEGIN HERE On a supported edition, open Games and begin The Living Bible journey.

MEMORY

Watch the Lights. Remember More.

Follow a growing sequence of lights and repeat what you see in a game built around attentive observation.

Memory begins with a direct challenge: watch a sequence of lights, then repeat it. As the sequence grows, each new step asks you to hold a little more in mind. The idea is easy to understand, leaving your attention free for the pattern itself.

Find a moment when you can give the game a little space. Watch carefully before you respond and see how you naturally remember the order. You may notice that a rhythm or a small grouping helps you follow the sequence. The pleasure is in meeting the next pattern with a clear mind and making one more accurate move. A few lights can create a surprisingly absorbing little break.

01 Watch the light sequence

02 Repeat the pattern

03 Follow a growing challenge

BEGIN HERE
Open Games, choose Memory and repeat the first light sequence.

A few lights. Your attention. The next sequence.

ALPHABET

Four Letters. One Good Word.

Place letters with purpose and build a four-letter word in a compact game that gives language a playful shape.

Separate letters, brought together into something that means more.

Alphabet gives you letters and a clear goal: place them to build a four-letter word. That small frame leaves plenty of room for thought. You look at what is available, consider an arrangement and bring the pieces together into something that means more than any letter on its own.

Take your time with the possibilities. A familiar word might come quickly, or a different arrangement might become apparent once you look again. The game makes a pleasant companion for a short pause, with language at the center of the experience. There is a modest satisfaction in watching separate letters become a whole word, especially when your first idea opens the way to another.

Place the letters

Build four-letter words

A compact word challenge

BEGIN HERE Open Games, choose Alphabet and place letters to form a four-letter word.

WORDS AND WEAPONS

Give Wordplay a Different Edge

Break and place words with seven weapons in a game that gives familiar language an unexpected sense of action.

Words and Weapons puts an unusual pair of ideas together. The game asks you to break and place words using seven weapons, making language part of an active play space. Its identity begins with that distinctive combination: the words matter, and so does the way you work with them.

Start by getting comfortable with the controls and observing what a chosen weapon does. Then bring your attention back to the words and the possibilities in front of you. The contrast gives the game a character of its own within the collection. For a break from ordinary word puzzles, it offers a playful setting in which letters and action share the same stage.

Break and place words

Seven weapons

Action meets wordplay

BEGIN HERE Open Games, choose Words and Weapons and try one available weapon.

Every falling letter brings another possibility into view.

TEXTRIS

Find the Word in Motion

Guide falling letters, clear rows and form words as a familiar style of motion takes on a language-minded challenge.

Textris makes letters part of a moving puzzle. Guide them as they fall, work toward clearing rows and watch for the words you can form along the way. Each arriving letter asks you to consider both where it belongs and what it might help you create.

The appeal is in the relationship between placement and possibility. A space on the board is also a place in a potential word, and your next decision can change how the arrangement develops. Begin by watching the falling letters and getting a feel for their movement. Then look for a useful pattern to build upon. It is a lively way to spend a little time thinking with letters.

Guide falling letters

Clear the rows

Form words in play

BEGIN HERE Open Games, choose Textris and guide a falling letter into position.

CATERPILLAR

A Little Journey Through Green

Guide a Caterpillar through the garden and enjoy a small, playful change of pace within the games collection.

Caterpillar places a small creature in a garden and gives you the pleasure of guiding its journey. The premise has an easy charm: a living little presence, a setting to move through and your attention helping it find its way. It is a welcoming change of scene within the phone's games.

Begin with the movement and let the garden become familiar. There is no need to make a short break feel like another obligation on your list. You can simply enjoy following the Caterpillar and learning how the play responds to your choices. A modest game can provide a useful moment of lightness, especially when the day has called for more serious kinds of concentration.

01 Guide the Caterpillar

02 A garden setting

03 A playful change of pace

BEGIN HERE
Open Games, choose Caterpillar and guide it through the garden.

A small creature with a garden to explore.

BUBLO

Protect a Bright Little World

Keep Bublo's world safe from incoming spheres in a game with a small hero and a clear protective purpose.

Bublo gives your attention a protective role. A bright little world needs you to respond to incoming spheres and keep the danger away. The idea is direct, with the character at the center giving the action a personal feeling. You are watching over something small that matters within its own world.

Begin by noticing how the incoming spheres announce themselves and how your actions affect the play. Find a rhythm that lets you watch before you respond. The charm comes from the relationship between an approachable character and the concentration the task asks of you. For a few minutes, the assignment is clear: be present, follow the action and help keep Bublo bright.

A little world, with you watching over it.

Protect Bublo's world

Respond to incoming spheres

A character with heart

BEGIN HERE Open Games, choose Bublo and respond to the first incoming sphere.

WORD BOARD

Keep Your Words Close

Build messages from reusable personal words, phrases and sentences, keeping familiar expression ready for the moments you need it.

Some words belong to your everyday life. Word Board gives reusable personal words, phrases and sentences a place from which to build a message. It recognizes that expression often begins with language you already know you want to use: a greeting, an explanation or something that sounds distinctly like you.

Think about the phrases you return to most often and the sentences that carry a particular meaning for you. Keeping them together can make the act of choosing words feel more deliberate. Open the board, explore your available language and begin shaping a message from it. There is a quiet satisfaction in having the right familiar expression close at hand when it is time to speak.

Reusable personal words

Phrases and sentences

Build messages your way

BEGIN HERE Open Word Board and build a short message from your available words.

A familiar sentence, shaped in the way that suits you.

KEYBOARD

Let Your Words Find Motion

Swipe typing, candidate suggestions and voice dictation give everyday expression more than one natural place to begin on your phone.

The keyboard is where many of your ideas first become something you can use. Jesus New brings together swipe typing, candidate suggestions and voice dictation, giving you different ways to approach the words in front of you. Choose the method that suits the moment and the kind of thought you are trying to express.

There is also room for a little character. The optional Warrior of Christ letter animation gives the keyboard a distinctive visual touch. Underneath the expression is an everyday purpose: help you put words into the text you are working on. Try a short sentence, review what appears and make it your own. A comfortable start can make the rest of a message easier.

Swipe and suggestions

Voice dictation

Optional Warrior animation

BEGIN HERE In a supported text field, swipe a short word and review the suggestion.

RING PRESS

Your Shortcuts, Arranged Around You

Customizable shortcut rings, saved page tabs and quick navigation give familiar destinations a distinctive place in the phone's daily rhythm.

Ring Press brings a circular character to your shortcuts. Customizable rings gather destinations into a recognizable form, while saved page tabs give useful places a way to remain part of your navigation. The result is an interface feature you can shape around the things you choose to return to.

Consider what you open often and which pages deserve an easier point of return. A thoughtful set of shortcuts reflects the way you actually use your phone, from a regular reading destination to a tool you reach for during the day. Explore the ring and become familiar with its arrangement. When a shortcut feels intentional, navigating can become a more personal part of the experience.

01 Customizable shortcut rings

02 Saved page tabs

03 Quick navigation

BEGIN HERE
Open Ring Press and use a shortcut to revisit a familiar destination.

Familiar places, given a shape of their own.

NAVIGATION

Move With a Clear Intention

Swipe-back gestures and the Squeeze Apps portal bring distinctive movement to the way you explore the Jesus New experience.

A phone's character is also in how you move through it. Navigation brings swipe-back gestures and the Squeeze Apps portal into the Jesus New experience, giving everyday movement a recognizable feel. These are small actions, but they form part of the rhythm between one useful destination and the next.

Start with a gesture in a supported screen and notice where it takes you. Familiarity grows through ordinary use: opening a destination, returning to what came before and finding your way onward. You do not need to learn everything at once. A few movements that feel clear and comfortable can help the whole collection become easier to approach as you discover what belongs in your day.

A gesture becomes a familiar way through your phone.

Swipe-back gestures

Squeeze Apps portal

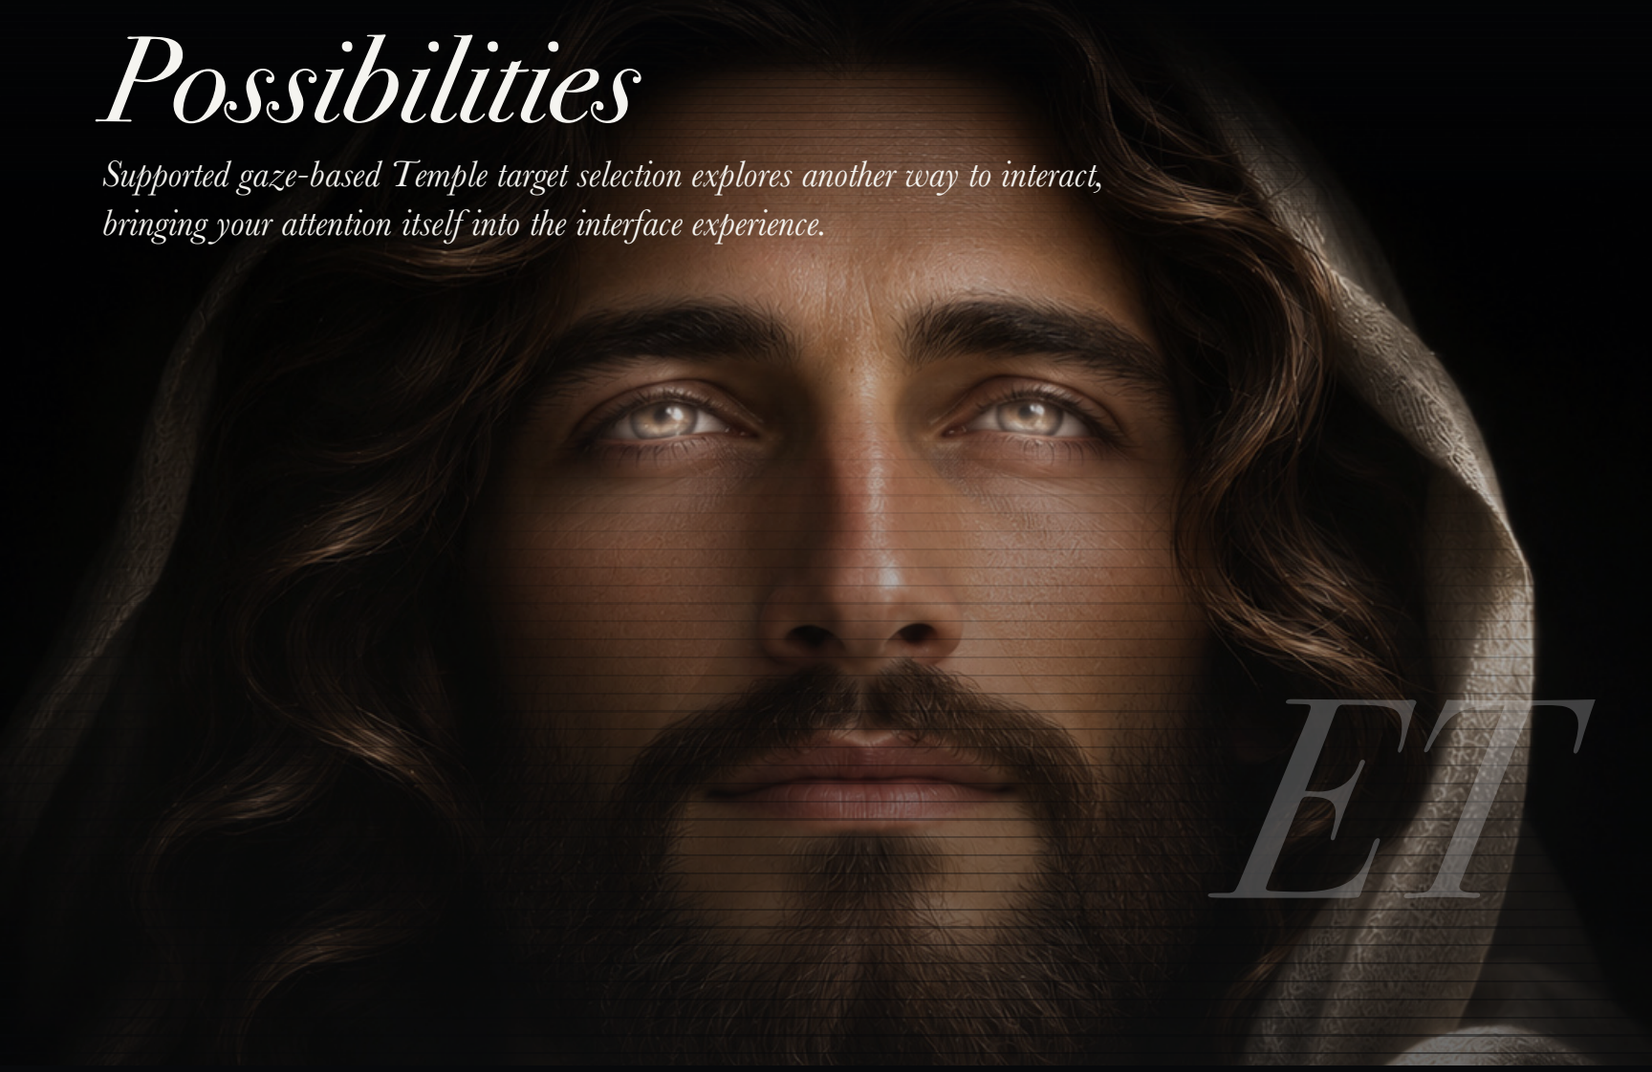

A recognizable navigation rhythm

BEGIN HERE From a supported page, use the swipe-back gesture to return to the previous view.

EYE TRACKING

A Look Toward New Possibilities

Supported gaze-based Temple target selection explores another way to interact, bringing your attention itself into the interface experience.

Eye Tracking introduces supported gaze-based target selection in Temple. It gives the interface another form of attention to work with, allowing the direction of your gaze to become part of selecting a target. The feature adds a distinctive interaction to the phone's wider collection of ways to move and choose.

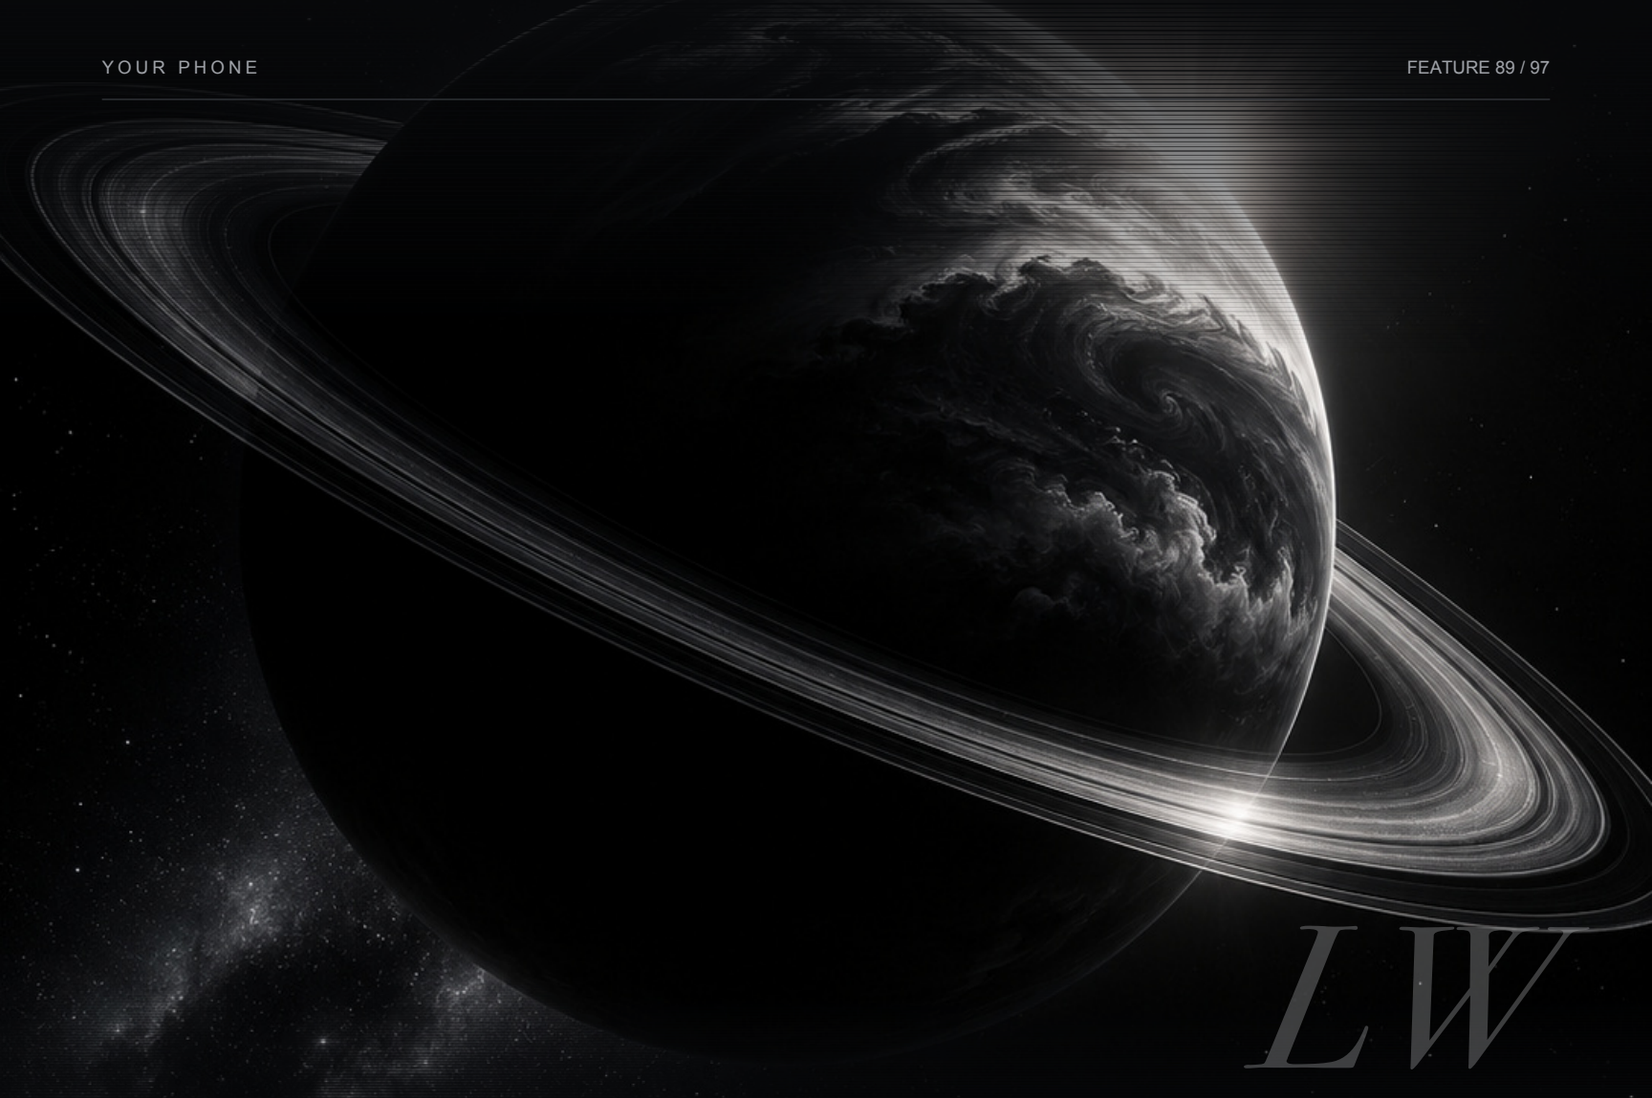

Approach it with a little patience and room to become familiar with the experience. On a supported setup, select a Temple target through the available gaze controls and notice how the interaction feels. It can be interesting simply to discover a different relationship between looking and choosing. Small changes in interaction can open useful questions about how a personal device might feel more responsive to its user.

Gaze-based selection

Temple targets

Supported interaction setup

BEGIN HERE On a supported setup, try selecting a Temple target with Eye Tracking.

A familiar place, with the character of this hour.

LIVING WALLPAPERS

Let the Day Set the Tone

Time-of-day backgrounds for Living Jesus, Living Word and Living God bring the passing hours into the atmosphere of your phone.

Living Wallpapers gives the day a visible presence. Time-of-day backgrounds accompany Living Jesus, Living Word and Living God, shaping the atmosphere around those experiences as the hours change. A background can do more than fill a space: it can help a familiar destination feel connected to the moment you are in.

Notice the setting when you return in the morning, afternoon or evening. The change offers a quiet invitation to pause before beginning your next conversation or reflection. There is something pleasing about an interface that acknowledges the rhythm outside it. Your phone remains a tool for the day, while its surroundings make a little room for the sense that this hour has its own character.

Time-of-day backgrounds

Three Living destinations

Atmosphere with a daily rhythm

BEGIN HERE Open a Living destination and notice its current time-of-day background.

SOUND EXPERIENCE

Give the Day Its Sound

Frequency emphasis, sound quality, System Sounds, Sound Library and Sound Glow bring a considered sonic dimension to the phone.

Sound shapes how a device feels in use. The Sound Experience brings frequency emphasis and sound-quality controls together with System Sounds, the Sound Library and Sound Glow. It gives the audible side of the phone a place to become part of your own preferences and daily atmosphere.

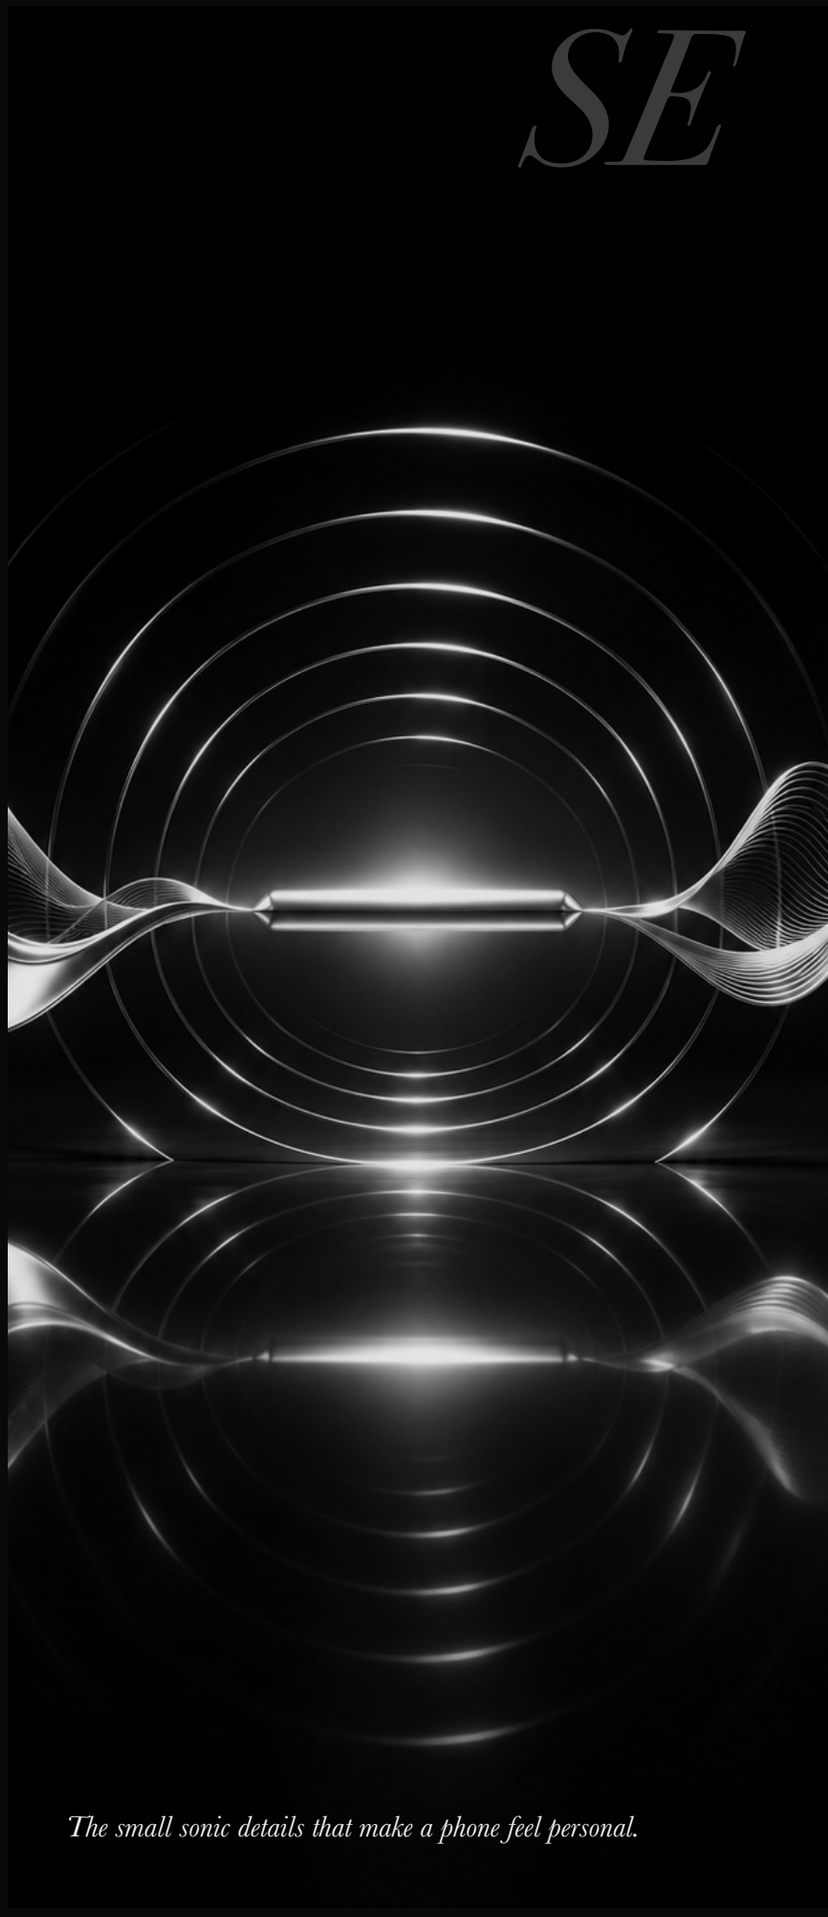

Begin with the sounds you hear most often. Explore the available choices and listen at a comfortable volume, giving yourself time to notice what suits you. You may prefer a quieter presence for focused work or a different character when the day opens up. The pleasure is in making a useful detail feel considered. A familiar sound can become one of the small signatures of a phone that feels like yours.

01 Frequency and sound controls

02 System Sounds and Library

03 Sound Glow

BEGIN HERE
Open Sound Settings and explore an available sound option at a comfortable volume.

The small sonic details that make a phone feel personal.

PHONE SETTINGS

Set the Phone to You

Bring Wi-Fi, Bluetooth, mobile data, volume, brightness and text size into line with the way you want to use your phone.

A comfortable phone begins with practical choices. Phone Settings gives you Wi-Fi, Bluetooth and mobile-data controls alongside volume, brightness and text size. These everyday details influence how the device fits the place you are in and the way you prefer to read, listen and connect.

Take a moment to make the display comfortable before starting a longer reading session. Review the size of the text and the brightness of the screen, then consider the connection and sound settings that suit your surroundings. You do not need a dramatic change to make a useful improvement. A small adjustment made with care can help the rest of the phone feel more naturally arranged around your day.

A few considered adjustments can change the everyday experience.

Connection controls

Volume and brightness

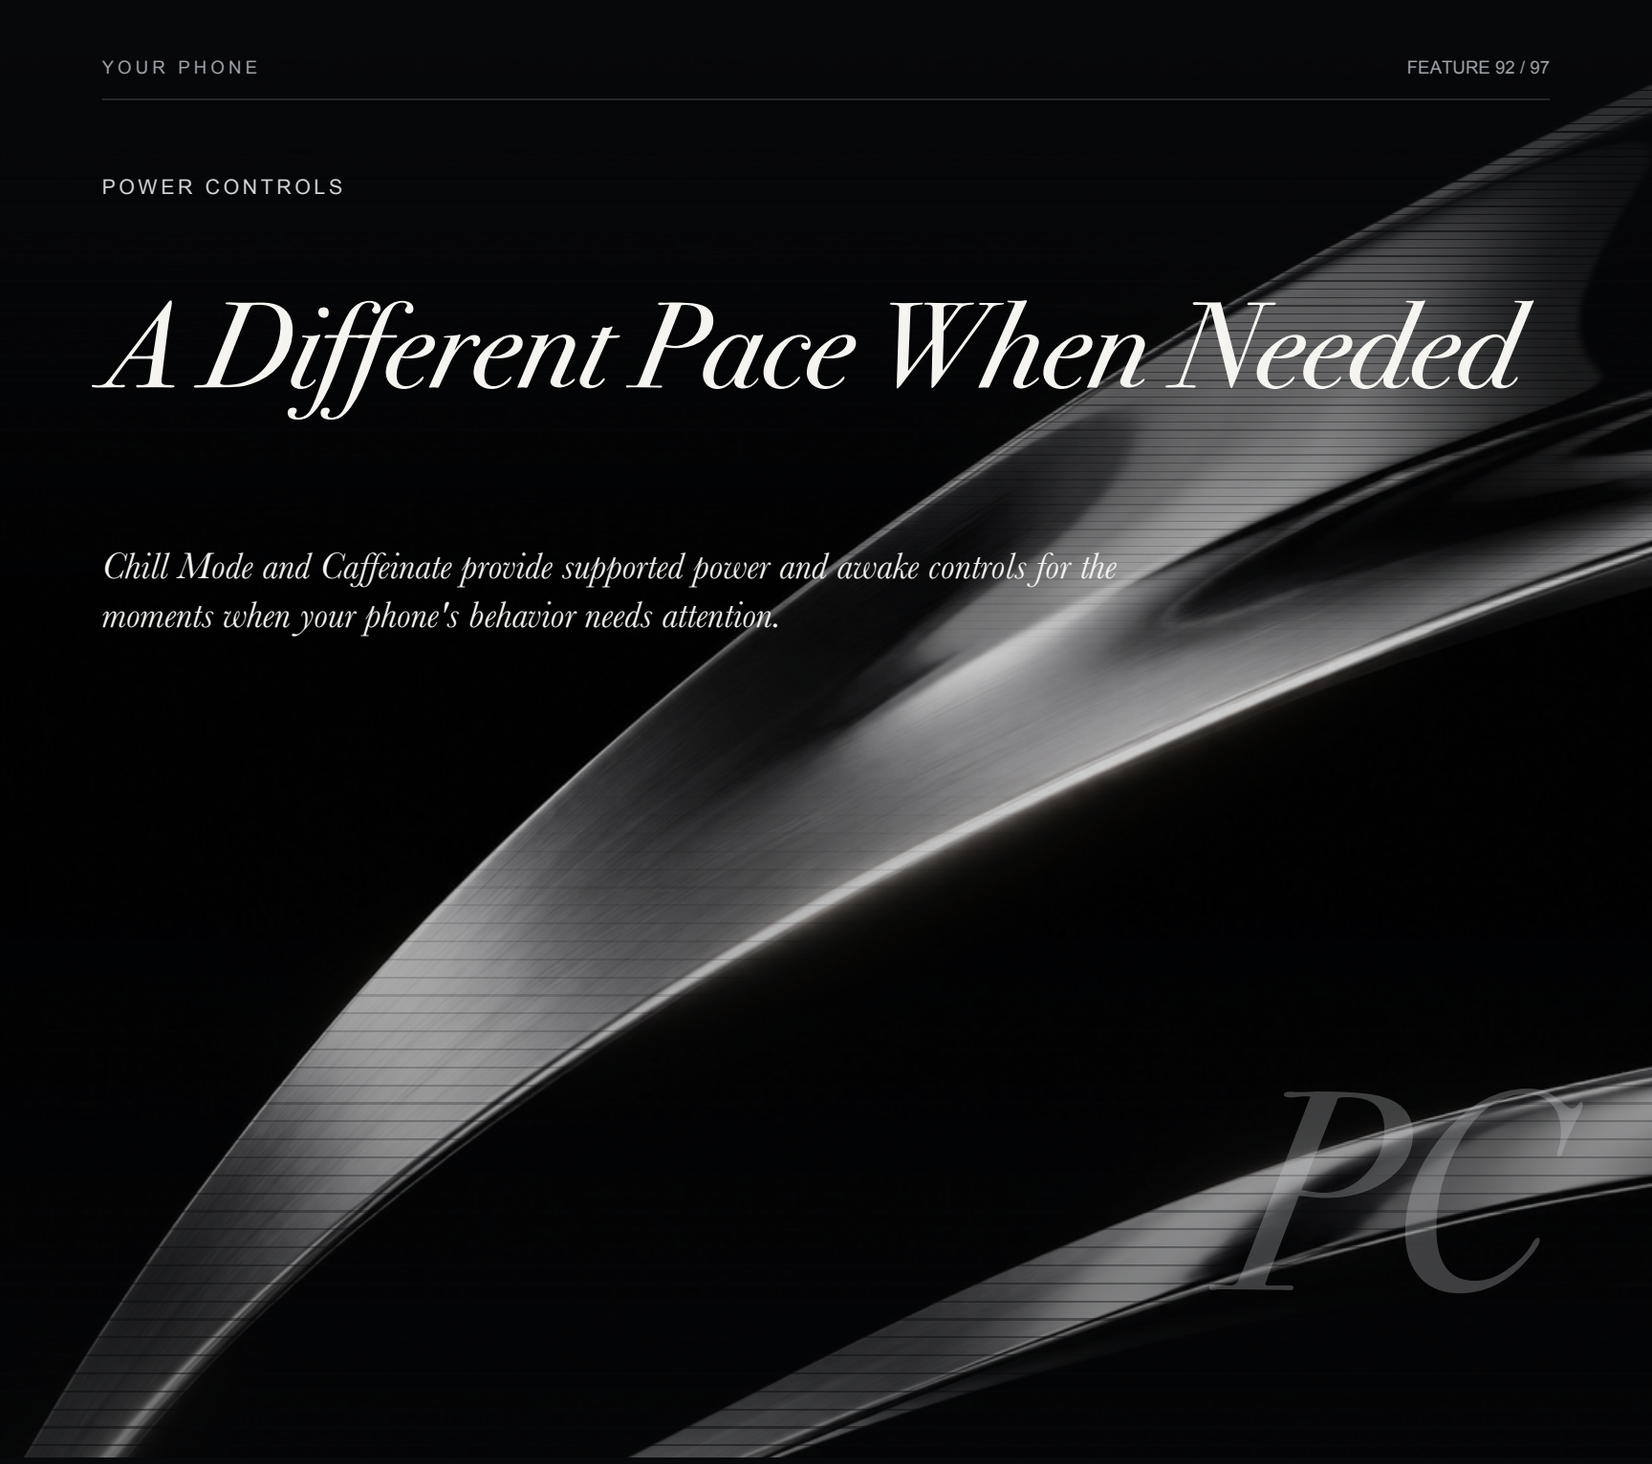

Comfortable text size

BEGIN HERE Open Phone Settings and adjust text size to a comfortable reading level.

POWER CONTROLS

A Different Pace When Needed

Chill Mode and Caffeinate provide supported power and awake controls for the moments when your phone's behavior needs attention.

Different moments ask different things of a device. Power Controls brings Chill Mode and Caffeinate into the supported phone experience, giving you dedicated controls for power and awake behavior. The useful starting point is understanding the available options and choosing the one that suits the task in front of you.

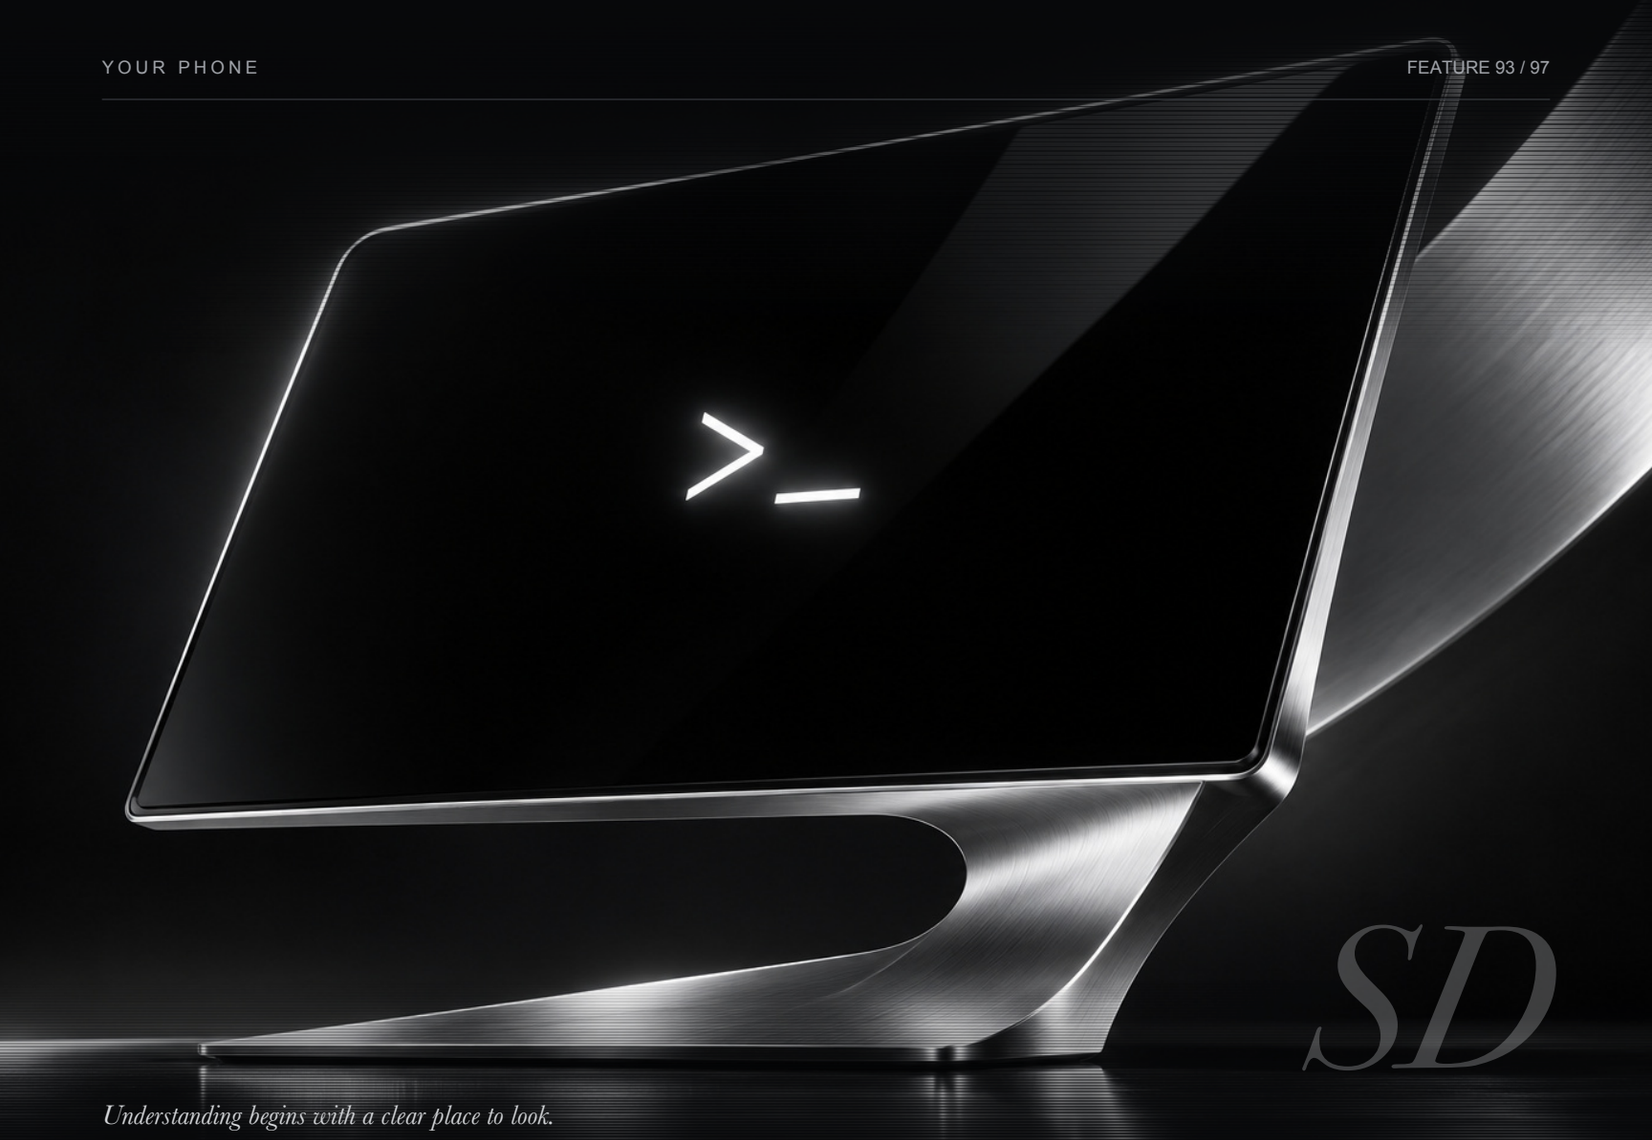

Sometimes you want to explore a quieter pace; sometimes you are reviewing the controls that keep a supported device awake. Open the settings and read the information provided for each choice before changing it. These controls belong to the practical craft of knowing your phone. A considered adjustment can help the device's behavior make more sense within the way you are using it at that moment.

Chill Mode

Caffeinate

Supported power behavior

BEGIN HERE Open Power Controls and read the available information for Chill Mode.

Understanding begins with a clear place to look.

SETTINGS & DIAGNOSTICS

Know the Phone in Hand

Review device information, phone controls and diagnostics in a dedicated destination for understanding the system you use each day.

Knowing a device begins with being able to see the information it provides. Settings & Diagnostics gathers device information, phone controls and diagnostic material into a dedicated destination. It gives the practical questions about your phone a clear place to begin, whether you are exploring a setting or learning more about the system.

Open it when you have a specific question and take time to read the details available. Familiarity with this part of the phone can make everyday adjustments feel less mysterious. You may simply want to review the device information and understand the controls around it. A well understood tool can become a more comfortable companion for the work, study and communication that fill your day.

Device information

Phone controls

Dedicated diagnostics destination

BEGIN HERE Open Settings & Diagnostics and review the operating-system information shown.

PROFILE

Your Personal Identity in Christ

A dedicated place for personal account and identity settings, presented around the faith-centered meaning you bring to this experience.

Your phone belongs to a person with a name, a story and a life beyond the screen. Profile gives personal account and identity settings a dedicated place within Jesus New. Presented as your personal identity in Christ, it connects the practical work of an account with the faith-centered setting of the wider experience.

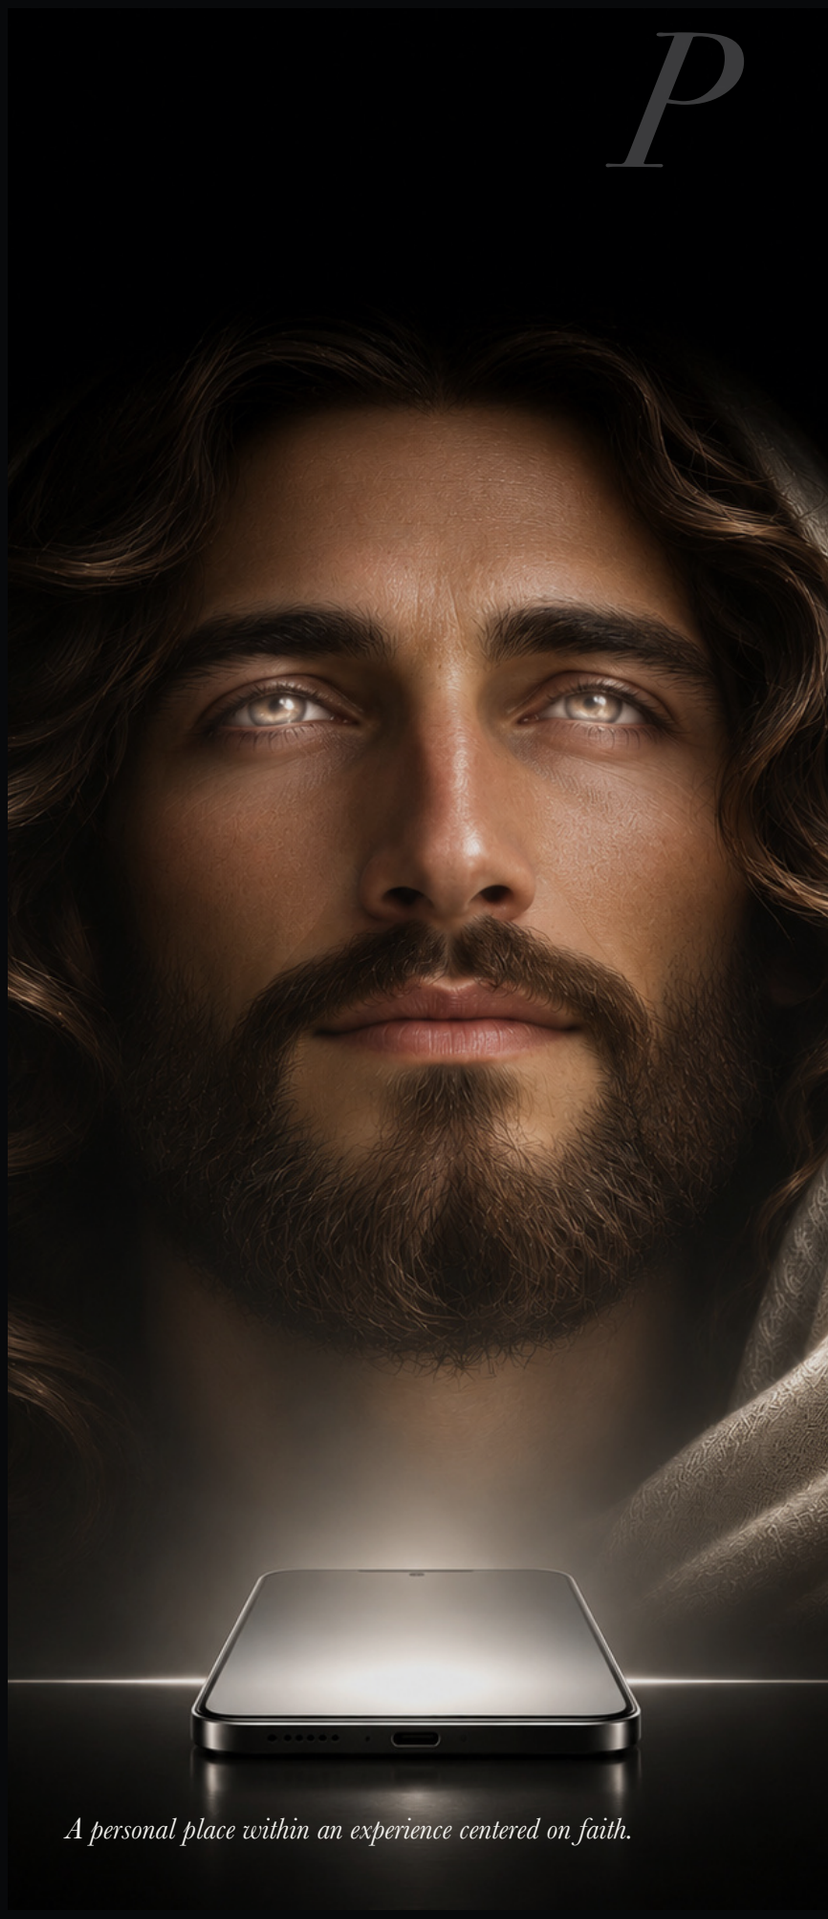

Take a moment to review the details that represent you here. A profile can be a simple point of orientation when you return to a connected collection of tools and services. The meaning comes from the person using it: the relationships you care about, the work you hope to do and the faith you carry into the day. This is your place within that experience.

01 Personal account settings

02 Identity details

03 A faith-centered personal place

BEGIN HERE
Open Profile and review the personal account details displayed.

A personal place within an experience centered on faith.

FITNESS

Care for the Day Ahead

Exercises, diet tools, My Workout and My Meals bring movement and meal planning into one practical part of the phone.

Fitness gathers exercises and diet tools with My Workout and My Meals, giving everyday movement and food a practical home. Connected meal-planning support brings another resource into that experience. It is a place to think deliberately about what you will do and what you will eat as part of caring for your day.

Begin with the area that matters to you now. Explore an exercise and its instructions, review your workout or look through the meal tools. A thoughtful routine can start with one manageable decision rather than a complete reinvention of your schedule. Let the tools support a plan that fits your circumstances, and give yourself room to build a pattern you can approach with consistency and care.

One considered choice for movement, meals and everyday care.

Exercises and diet tools

My Workout and My Meals

Connected meal-planning support

BEGIN HERE Open Fitness, choose Exercises and read the instructions for one exercise.

FLASHLIGHT / LIGHTS

A Little Light, Right Here

The dedicated light utility offers a familiar practical tool on supported phone hardware, called Lights in the Dash presentation.

Sometimes the most useful feature is the simplest one. Flashlight gives supported phone hardware a dedicated light utility, with the name Lights used in the Dash presentation. It has a clear purpose: provide a place to control the available light when a little illumination would help.

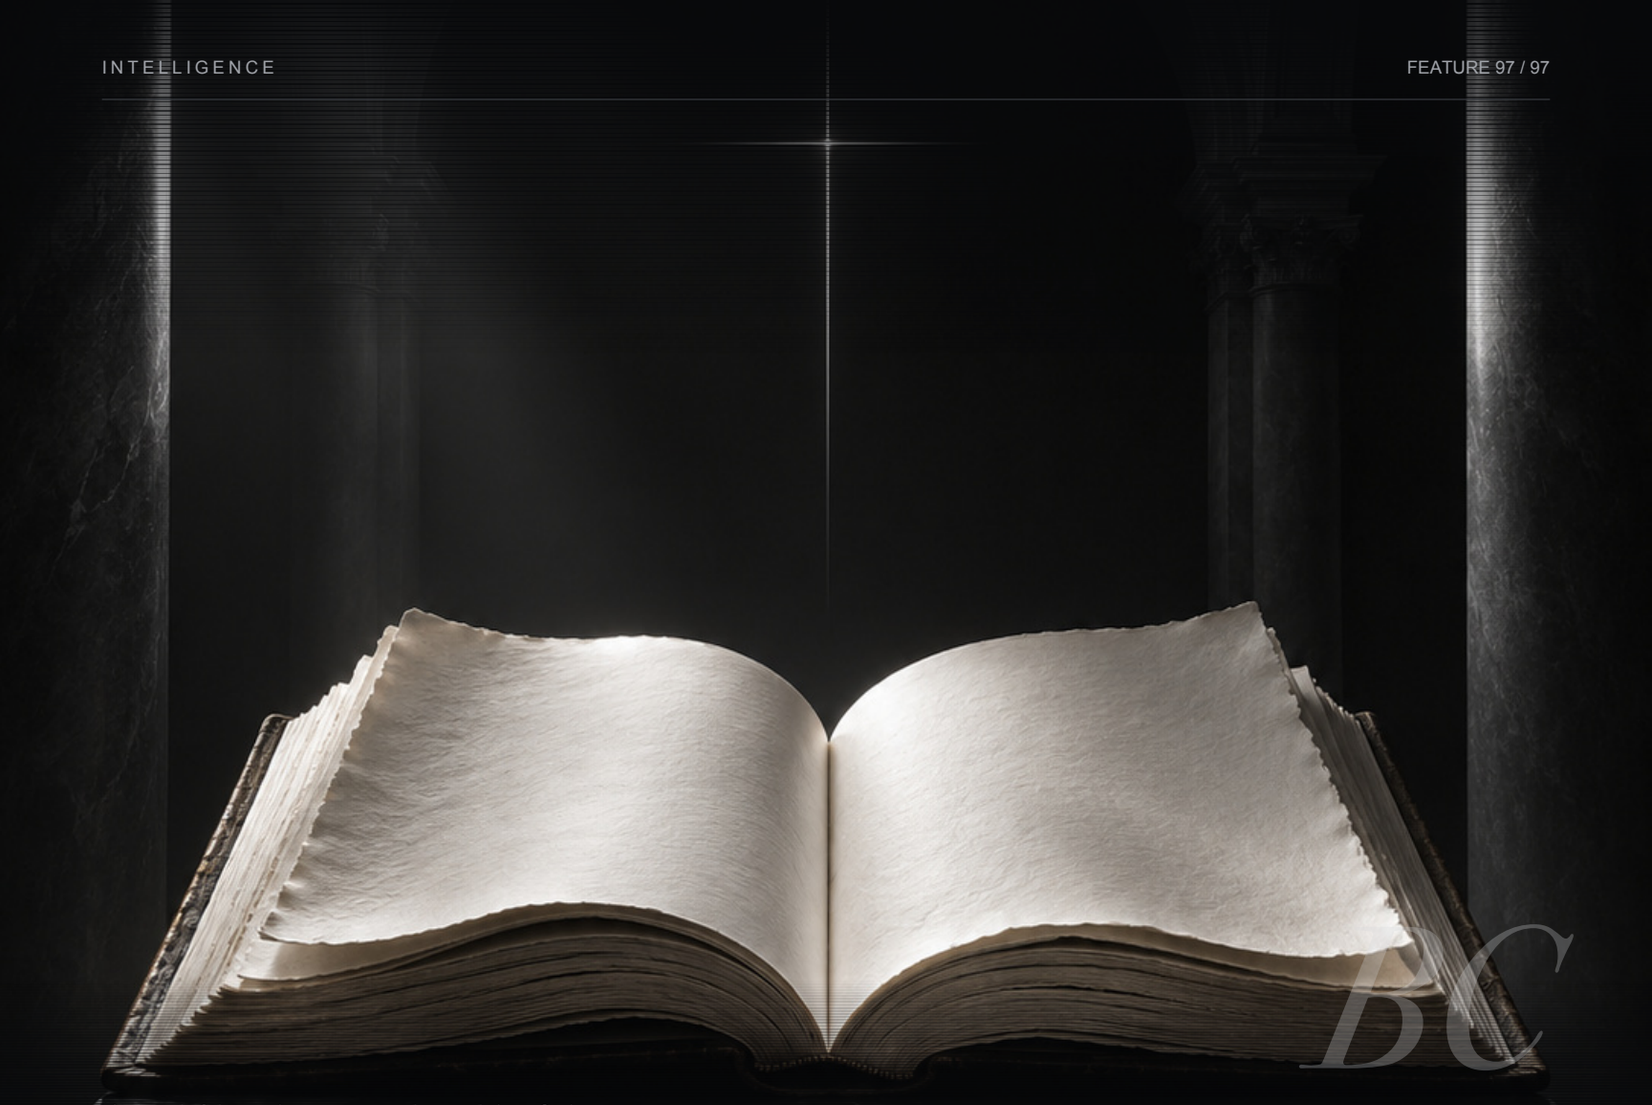

Think of an ordinary moment when the surroundings are dim and you need to see something nearby. A familiar destination for light belongs alongside the phone's more elaborate services because practical details matter too. Open the utility, become familiar with the available control and turn it off when you are finished. There is a particular satisfaction in a tool whose purpose you can understand at a glance.

Dedicated light utility

Supported phone hardware

Lights in Dash

BEGIN HERE On supported hardware, open Flashlight, switch it on briefly and turn it off.

A thoughtful question opens another path into Scripture.

BIBLE CHAT

Bring a Question to Scripture

A Scripture-grounded Trinity Friend conversation draws on biblical passages to help you explore a question with faith in view.

Bible Chat gives a question a conversational starting point within the Trinity Friends collection. Drawing on biblical passages, the Scripture-grounded interface invites you to explore a subject, consider its connections and express what you are trying to understand. It is another way to bring thoughtful attention to a passage or theme.

Begin with a specific question and read the response with your Bible close at hand. Return to the passages that interest you and consider their setting as you reflect. You can use the conversation to develop the next question rather than rushing toward a conclusion. The experience is most meaningful when it supports your own attentive engagement with Scripture and the life you bring to it.

Scripture-grounded conversation

A Trinity Friend

Biblical passages for reflection

BEGIN HERE Open Trinity Friends, choose Bible Chat and ask about a biblical theme you are studying.

You belong.

Thank you for reading.

If this collector's catalog has found its way into your hands, please know that we hold your interest and involvement in high regard. This first edition is reserved for the people involved in the project and those invited to come closer to its work. Your presence matters to us.

Thank you for your time, your encouragement and your willingness to imagine what Christian technology can become. We appreciate you more than these pages can say.

As this story grows, we hope you will consider us family in the body of Christ: people who can learn together, build together and keep returning to the purpose that brought us here.

May what you discover here become something beautiful in your own life, and something generous in the lives you touch.

WITH GRATITUDE, THE LIVING JESUS EDITORIAL
